in learning more about scribing in retina cornea comprehensive glaucoma or oculoplastics this manual has you covered inside you will find over 100 full color figures and tables illustrating the most important concepts anatomy physiology organized high yield abbreviations must know medications must know imaging modalities and high yield specialty specific pathology about the author after graduating with a bachelor of science in biology from the university of north carolina at chapel hill and prior to enrolling in medical school my job search brought me back home to atlanta where i accepted a position as an ophthalmic medical scribe i had no prior experience as a scribe or in the healthcare field but i knew that quickly improving my understanding of ophthalmology would be essential for my success i searched the web to obtain every piece of relevant ophthalmology information that i could find and i spent hours experimenting with the functionalities of the eye clinic s electronic medical record to better prepare myself for my new role however i found that it took a significant amount of time and effort to sift through the excessive online information before i was able to hone in on the relevant material due to the lack of designated ophthalmic medical scribe training resources and the vast amount of irrelevant information online i decided that the creation of the ophthalmic scribe manual was warranted with over 3 years of scribing experience and over 20 000 patient encounters as well as having published a variety of first author case reports and review articles in prominent ophthalmic medical journals i am confident that my experiences will offer an immediate benefit to those seeking to excel in this rewarding profession review very well written this looks terrific and will be great for widespread use particularly in training programs especially with the growing need for trained ophthalmic personnel intravitreal injections are now standard treatment for various ocular conditions such as age related macular degeneration diabetic retinopathy and retinal vein occlusions ophthalmic nurse practitioners and allied health professionals are increasingly becoming invaluable team members for delivering these injections particularly as the clinical demand increases this full colour handbook details all that a practitioner needs to know about safely performing the procedure it will also be a useful reference for junior ophthalmic trainees benefits concise but comprehensive guide to the procedure dedicated chapters on anatomy imaging fluorescein angiography optical coherence tomography optical coherence tomography angiography and ultra wide field imaging common treatment regimes injection technique and complications introduction to available injection devices advice on setting up a local training scheme and wet lab well illustrated with both hand drawn illustrations and colour photographs this book is a practical symptom based how to guide to neuro ophthalmology and acquired strabismus for all trainee and practising ophthalmologists and optometrists each chapter focusses on a specific clinical symptom and includes an introduction to the clinical assessment of a symptom an examination checklist a management flowchart to be followed clinical diagnostic criteria checklists and further information on the diseases that can cause the symptom with a brief discussion of appropriate management a practical and accessible handbook for the ophthalmologist or optometrist without a specialist interest in neuro ophthalmology and acquired strabismus the text simplifies a subject which is often a cause of litigation against practising ophthalmologists and exam failure for trainees and residents

the book aids diagnosis in a field in which mistakes may lead to medico legal problems e g brain tumours presenting with blurred or double vision the book leads the reader from the symptom through a series of simple but safe flowcharts and check lists to the diagnosis or the tests which need to be ordered the first chapter presents 20 golden rules to keep you and your patients out of trouble a revised text with some new illustrations brings this highly praised book up to date new online videos demonstrate abnormal eye movements eyelid problems and pupil abnormalities this comprehensive and well illustrated book provides a reasoned approach to the everyday practice of ophthalmology this new edition has been updated to include contributions by thirteen highly qualified ophthalmologists with special experience in many aspects of the subject stereo photographs are included because some eye conditions require depth perception for a real understanding of their nature written to emphasise aspects found over many years to be of practical importance in a large undergraduate teaching hospital and two eye hospitals it will be especially useful to medical students as well as general practitioners and ophthalmologists in training in particular the section on common ophthalmic problems which like a book within a book indicates to students the most important eye conditions for study the new edition has been expanded to include the latest advances in research and practice it has been thoroughly revised and includes contributions from thirteen specialist sub editors 20 of the royalties from this book will be denoted to the patient based international glaucoma association is not only a student text a colour atlas with legends an account of sophisticated techniques but also a reasoned practical guide to the study of ophthalmology embraces diseases worldwide and basic methods of investigation and treatment where applicable includes a book within a book of common ophthalmic problems essential for students optometrists and general practitioners with full cross references and indexing presents stereo colour plates where in depth perception aids understanding this second edition is updated expanded comprehensive authoritative request inspection copy diagnosing a patient with unexplained ocular pain can be time consuming and difficult but taking an anatomic approach and excluding causes along the way can aid in the diagnosis this book provides the reader with a systematic evaluation plan for these cases written and edited by leaders in the field a case based guide to eye pain is written for both ophthalmologists and neuro ophthalmologists since there are not enough neuro ophthalmologists to treat the number of patients with unexplained ocular pain and general ophthalmologists are having to take on the diagnosis and treatment of these patients organized in an easy to use manner each case covers the following key elements the chief complaint history of the present illness the examination assessment and plan follow up alternate perspective summary points and key references tables are also available to help the reader rapidly sort through ## **Care of the Ophthalmic Patient**

2013-11-11

whilst this book is primarily compiled for nurses who care for patients with eye disease it will be useful to other health professionals who are also interested in the holistic care of such patients e.g. opticians, orthoptists, social workers and junior medical staff. The care is presented as a systematic approach to the more common actual and potential problems. Typically a problem is identified with a desired outcome and the nursing interventions possible to achieve this. Evaluation has not been included as this is dependent on an identified time limit for outcomes to be achieved which is individual to each patient. Part one covers the general aspects of ophthalmic care in the various situations where patients are nursed e.g. casualty, theatre, wards. Part two is based on a medical model where each section of the eye is studied separately: the applied physiology of that part of the eye, the more common conditions affecting it, the possible medical management of the condition and the nursing care of the patient taking into account the medical prescription. The list of medical conditions is not exhaustive and only a general guideline of medical management is given as far as it influences nursing care. A list of widely available books for further reference to ocular pathology and medical management is given in the appendix.
