organizations for sustainable development in emerging countries focuses on the main challenges and opportunities of managing firms and emerging economies in the light of sustainable development one of the key questions of sustainable development is how organizations from developing countries are achieving their economic goals while considering simultaneously environmental issues like conservation of natural resources eco efficiency biodiversity conservation and climate change mitigation these questions are relevant for government industry and urban sustainability however in the modern literature that discusses organizational management for sustainable development few studies focus on the reality of organizations from emerging countries moreover changing environmental legislation in emerging countries such as china and brazil will affect organizational managers in this context this book may contribute to organizational management in the search for more sustainable organizations as well as deal with the challenges of managing organizations in the context of increased social problems degradation of natural resources loss of biodiversity and climate change this book was published as a special issue of the international journal of sustainable development world ecology this volume documents international national and small scale testing and assessment projects of statistical tables cover preceding 5 years in this book professor jeanine grenberg defends the idea that kant s virtue theory is best understood as a system of eudaemonism indeed as a distinctive form of eudaemonism that makes it preferable to other forms of it a system of what she calls deontological eudaemonism in deontological eudaemonism one achieves happiness both rationally conceived as non felt pleasure in the virtually unimpeded harmonious activity of one s will and choice and empirically conceived as pleasurable fulfilment of one s desires only via authentic commitment to and fulfilment of what is demanded of all rational beings making persons as such one s end in all things to tell this story of deontological eudaemonism grenberg first defends the notion that kant s deontological approach to ethics is simultaneously and indeed foundationally and most basically teleological she then shows that the realization of an aptitude for the virtuous fulfilment of one s obligatory ends provides the solid basis for simultaneous realization of happiness both rationally and empirically conceived along the way she argues both that kant s notion of happiness rationally conceived is essentially identical to aristotle s conception of happiness as unimpeded activity and that his notion of happiness empirically conceived is best realized via an unwavering commitment to the fulfilment of one s obligatory ends collection of selected peer reviewed papers from the 2013 2nd international conference on mechatronics and control engineering icmce 2013 august 28 29 2013 else interested in how policy shapes healthcare options and limits patients and providers during life s most profound moments soft law increasingly shapes and impacts the content of international law in multiple ways from being a first step in a norm making process to providing detailed rules and technical standards required for the interpretation and the implementation of treaties this is especially true in the area of human rights while relatively few human rights treaties have been adopted at the un level in the last two decades the number of declarations resolutions conclusions and principles has grown significantly in some areas soft law has come to fill a void in the absence of treaty law exerting a degree of normative force exceeding its non binding character in others areas soft law has become a battleground for interpretative struggles to expand and limit human rights protection in the context of existing regimes despite these developments little attention has been paid to soft law within human rights legal scholarship building on a thorough analysis of relevant case studies this volume systematically explores the roles of soft law in both established and emerging human rights regimes the book argues that a better understanding of how soft law shapes and affects different branches of international human rights law not only provides a more dynamic picture of the current state of international human rights but also helps to unsettle and critically question certain political and doctrinal beliefs following introductory chapters that lay out the general conceptual framework the book is divided in two parts the first part focuses on cases that examine the role of soft law within human rights regimes where there are established hard law standards its progressive and regressive effects and the role that different actors play in the incubation process the second part focuses on the role of soft law in emerging areas of international law where there is no substantial treaty codification of norms these chapters examine the relationship between soft and hard law the role of different actors in formulating new soft law and the potential for eventual codification international outlook 2016 an updated statistical reference with energy projections is provided as a service to energy managers and analysts both in government and in the private sector the projections are used by international agencies federal and state governments trade associations and other planners and decision makers they are published pursuant to the department of energy organization act of 1977 public law 95 91 section 205 c the report begins with a review of world trends in energy demand and the major macroeconomic assumptions used in deriving the international energy outlook 2016 ieo2016 projections along with the major sources of uncertainty in the projections which extend through 2040 in addition to the reference case projections high economic growth and in this book professor jeanine grenberg defends the idea that kant s virtue theory is best understood as a system of eudaemonism indeed as a distinctive form of eudaemonism that makes it preferable to other forms of it a system of what she calls deontological eudaemonism in deontological eudaemonism one achieves happiness both rationally conceived as non felt pleasure in the virtually unimpeded harmonious activity of one s will and choice and empirically conceived as pleasurable fulfilment of one s desires only via authentic commitment to and fulfilment of what is demanded of all rational beings making persons as such one s end in all things to tell this story of deontological eudaemonism grenberg first defends the notion that kant s deontological approach to ethics is simultaneously and indeed foundationally and most basically teleological she then shows that the realization of an aptitude for the virtuous fulfilment of one s obligatory ends provides the solid basis for simultaneous realization of happiness both rationally and empirically conceived along the way she argues both that kant s notion of happiness rationally conceived is essentially identical to aristotle s conception of happiness as unimpeded activity and that his notion of happiness empirically conceived is best realized via an unwavering commitment to the fulfilment of one s obligatory ends

soft law increasingly shapes and impacts the content of international law in multiple ways from being a first step in a norm making process to providing detailed rules and technical standards required for the interpretation and the implementation of treaties this is especially true in the area of human rights while relatively few human rights treaties have been adopted at the un level in the last two decades the number of declarations resolutions conclusions and principles has grown significantly in some areas soft law has come to fill a void in the absence of treaty law exerting a degree of normative force exceeding its non binding character in others areas soft law has become a battleground for interpretative struggles to expand and limit human rights protection in the context of existing regimes despite these developments little attention has been paid to soft law within human rights legal scholarship building on a thorough analysis of relevant case studies this volume systematically explores the roles of soft law in both established and emerging human rights regimes the book argues that a better understanding of how soft law shapes and affects different branches of international human rights law not only provides a more dynamic picture of the current state of international human rights but also helps to unsettle and critically question certain political and doctrinal beliefs following introductory chapters that lay out the general conceptual framework the book is divided in two parts the first part focuses on cases that examine the role of soft law within human rights regimes where there are established hard law standards its progressive and regressive effects and the role that different actors play in the incubation process the second part focuses on the role of soft law in emerging areas of international law where there is no substantial treaty codification of norms these chapters examine the relationship between soft and hard law the role of different actors in formulating new soft law and the potential for eventual codification
