Active Shooter Events and Response

2013-06-12

the columbine tragedy on april 20 1999 began a new era in law enforcement as it became apparent that the police response to such mass shootings must be drastically altered by the time the sandy hook elementary school shooting occurred on december 14 2012 outdated police response strategies had been replaced with new aggressive tactics used by the first officers on the scene the frequency with which these events occur remind us time and again about the importance of training and preparing for these critical situations before they occur in our own backyards active shooter events and response is one of the first attempts to not only discuss historic active shooter events but also to actually dissect some of them empowering law enforcement professionals by leveraging the essential knowledge and experience of those who have gone before us the book also offers insight into the training methodologies and strategies used to prepare our nation s first responders to address the active shooter threat in addition the authors discuss the clear and present threat of terrorist organizations using these mass shooter tactics on american soil similar to the attacks in beslan russia and mumbai india written by members of the advanced law enforcement rapid response training alert center at texas state university this book is the culmination of more than a decade s worth of training and research into active shooter events and represents state of the art evidence based best practices

Developing a National Framework for Managing the Response to Nuclear Security Events

2020-01-22

this publication provides guidance to states on the development implementation maintenance and sustainment of a national framework for managing the response to nuclear security events such a framework involves a structure and a set of principles and agreements around which a state can frame its nuclear security response functions addressing the interfaces which need to exist between responding agencies to ensure effective coordinated response by using this implementing guide a state will ensure that it has considered all relevant key issues as it develops its national framework for responding to nuclear security events

Mitigating Catastrophic Events Through Effective Medical Response

2007

in 2004 the who regional office for europe and the european environment agency organized a meeting to exchange information and develop recommendations on public health and environmental responses to weather and climate extremes this book reflects a collection of case studies and experiences of experts ministries and international organizations

Mitigating catastrophic events through effective medical response : hearing

2006-01-16

trees are among the longest living organisms they are sensitive to extreme climatic events and document the effects of environmental changes in form of structural modifications of their tissues these modifications represent an integrated signal of complex biological responses enforced by the environment for example temporal change in stem increment integrates multiple information of tree performance and wood anatomical traits may be altered by climatic extremes or environmental stress recent developments in preparative tools and computational image analysis enable to quantify changes in wood anatomical features like vessel density or vessel size

thus impacts on their functioning can be related to climatic forcing factors similarly new developments in monitoring cambial phenology and mechanistic modelling are enlightening the interrelationships between environmental factors wood formation and tree performance and mortality quantitative wood anatomy is a reliable indicator of drought occurrence during the growing season and therefore has been studied intensively in recent years the variability in wood anatomy not only alters the biological and hydraulic functioning of a tree but may also influence the technological properties of wood with substantial impacts in forestry on a larger scale alterations of sapwood and phloem area and their ratios to other functional traits provide measures to detect changes in a tree's life functions and increasing risk of drought induced mortality with possible impacts on hydrological processes and species composition of plant communities genetic variability within and across populations is assumed to be crucial for species survival in an unpredictable future world the magnitude of genetic variation and heritability of adaptive traits might define the ability to adapt to climate change is there a relation between genetic variability and resilience to climate change is it possible to link genetic expression and climate change to obtain deeper knowledge of functional genetics to derive precise estimates of genetic determinism it is important to define adaptive traits in wood properties and on a whole tree scale understanding the mechanisms ruling these processes is fundamental to assess the impact of extreme climate events on forest ecosystems and to provide realistic scenarios of tree responses to changing climates wood is also a major carbon sink with a long term residence impacting the global carbon cycle how well do we understand the link between wood growth dynamics wood carbon allocation and the global carbon cycle papers contribution to this research topic will cover a wide range of ecosystems however special relevance will be given to mediterranean type areas these involve coastal regions of four continents making mediterranean type ecosystems extremely interesting for investigating the potential impacts of global change on growth and for studying responses of woody plants under extreme environmental conditions for example the ongoing trend towards warmer temperatures and reduced precipitation can increase the susceptibility to fire and pests the eu funded cost action stress studying tree responses to extreme events a synthesis addresses such crucial tree biological and forest ecological issues by providing a collection of important methodological and scientific insights about the current state of knowledge and by opinions for future research needs

Extreme Weather Events and Public Health Responses

a nuclear attack on a large u s city by terrorists even with a low yield improvised nuclear device ind of 10 kilotons or less would cause a large number of deaths and severe injuries the large number of injured from the detonation and radioactive fallout that would follow would be overwhelming for local emergency response and health care systems to rescue and treat even assuming that these systems and their personnel were not themselves incapacitated by the event the united states has been struggling for some time to address and plan for the threat of nuclear terrorism and other weapons of mass destruction that terrorists might obtain and use the

department of homeland security recently contracted with the institute of medicine to hold a workshop summarized in this volume to assess medical preparedness for a nuclear detonation of up to 10 kilotons this book provides a candid and sobering look at our current state of preparedness for an ind and identifies several key areas in which we might begin to focus our national efforts in a way that will improve the overall level of preparedness

CBRN and Hazmat Incidents at Major Public Events

2022-11-18

rojek s argument is a psychological one although his message is political global events build on people s needs to feel empowered and jointly engaged in the pursuit of a higher purpose they allow a break from daily routines provide an illusion of intimacy and social membership and create a sense of self validation and personal gratification in short participation in such events makes us feel good at the same time the real effect of global events seems to be the maintenance of global inequality and social injustice as well as huge profits for the organizations involved in planning commercializing and securing these happenings in sketching out this palliative function of global events from the perspective of people s needs on the one hand and unveiling their puppet masters backstage on the other rojek s book presents a compelling account of the role of organized events in modern society organization studies events dominate our screens our lives and increasingly global geopolitics analysis of events and their management has remained rooted in leisure and management studies until now this break through book provides an introduction to event management while also situating events in questions of power and social control rojek powerfully argues that events are essential elements in corporate state partnerships of invisible government that have revived the romance of charity as to form illusory communities while cloaking power imbalances and social inequalities events are moving politics from the old idea of the personal is political to the new more seductive notion that representation is resistance wielding rich case studies from the world cup and the olympics to live aid burning man and mardi gras rojek presents a dazzlingly original account of communication power social ordering and control it is essential reading in media communication studies and across the social sciences

a comprehensive and in depth review of analog circuit layout schematic architecture device power network and esd design this book will provide a balanced overview of analog circuit design layout analog circuit schematic development architecture of chips and esd design it will start at an introductory level and will bring the reader right up to the state of the art two critical design aspects for analog and power integrated circuits are combined the first design aspect covers analog circuit design techniques to achieve the desired circuit performance the second and main aspect presents the additional challenges associated with the design of adequate and effective esd protection elements and schemes a comprehensive list of practical application examples is used to demonstrate the successful combination of both techniques and any potential design trade offs chapter one looks at analog design discipline including layout and analog matching and analog layout design practices chapter two discusses analog design with circuits examining single transistor amplifiers multi transistor amplifiers active loads and more the third chapter covers analog design layout also mosfet layout before chapters four and five discuss analog design synthesis the next chapters introduce the reader to analog digital mixed signal design synthesis analog signal pin esd networks and analog esd power clamps chapter nine the last chapter covers esd design in analog applications clearly describes analog design fundamentals circuit fundamentals as well as outlining the various esd implications covers a large breadth of subjects and technologies such as cmos ldmos bcd soi and thick body soi establishes an esd analog design discipline that distinguishes itself from the alternative esd digital design focus focuses on circuit and circuit

design applications assessable with the artwork and tutorial style of the esd bookseries powerpoint slides are available for university faculty members even in the world of digital circuits analog and power circuits are two very important but under addressed topics especially from the esd aspect dr voldman s new book will serve as an essential and practical guide to the greater ic community with high practical and academic values this book is a bible for professionals graduate students device and circuit designers for investigating the physics of esd and for product designs and testing

Assessing Medical Preparedness to Respond to a Terrorist Nuclear Event

2013-02-21

whenever a major event requires police intervention questions are raised about the nature of the police response could the police have prevented the conflict been better prepared reacted more quickly could they have acted more forcefully or brought the altercation under control more effectively based upon real case studies of events from all over the world this volume explores the complex set of factors comprising the policing of major events topics covered include police procedures in serbia in response to sporting events and violence the 2010 world cup in south africa as a model of best practice in governance structures along with the region s struggles in routine policing initiatives security operations at the 2010 winter olympic games in canada and the summer olympic and paralympic games in london in 2012 community involvement to curb terrorist insurgency in north eastern nigeria governmental response to hurricane katrina in louisiana and texas revisions made to nypd protocols following the september 11 attacks policing strategies for major events on aboriginal and tribal lands across canada other topics include the police protestor relationship and low profile versus high profile policing strategies in crowd control the growing strategy of private security in working with public police forces and enhancing public safety in post conflict regions the concepts presented in policing major events perspectives from around the world will enable police departments to improve their readiness for policing major events across a diverse set of events and socio political contexts this book is a co publication with the international police executive symposium

2020-12-27

public events are at the heart of civic discourse in modern societies surveying the data of public events in cities and police response to them detailed case studies of selected major events and advanced statistical analyses this book looks at the relationship between public events and police response in india

Risk Management for Events

1966

in all groups from couples to nation states people influence one another much of this influence is benign for example giving advice to friends or serving as role models for our children and students some forms of influence however are clearly morally suspect such as threats of violence and blackmail a great deal of attention has been paid to one form of morally suspect influence namely coercion less attention has been paid to what might be a more pervasive form of influence manipulation the essays in this volume address this relative imbalance by focusing on manipulation examining its nature moral status and its significance in personal and social life they address a number of central questions what counts as manipulation how is it distinguished from coercion and ordinary rational persuasion is it always wrong or can it sometimes be justified and if so when is manipulative influence more benign than coercion can one manipulate unintentionally how does being manipulated to act bear on one's moral responsibility for so acting given various answers to these questions what should we think of practices such as advertising and seduction

chemical biological radiological nuclear and high yield explosive cbrne events have the potential to destabilize governments create conditions that exacerbate violence or promote terrorism this can trigger global repercussions these events can quickly overwhelm the infrastructure and capability of the responders especially in countries that do not have the specialized resources for response like those available in the united states when a cbrne incident occurs in a partner nation or other foreign country the u s is often called upon to provide assistance interoperability the ability to work together among u s agencies foreign governments and responders involved in the effort is key to an efficient response the effectiveness of the u s response and approach to cbrne events in partner nations depends on the capability of the u s government to provide timely and appropriate assistance and the resilience of the partner nation to a cbrne event an all of government approach to increase resilience for international chemical biological radiological nuclear and explosive cbrne events is the summary of a workshop convened in june 2013 by the national institute of standards and technology and the national research council to discuss ways to strengthen the u s ability to prepare for and respond to cbrne events that occur in u s partner nations the workshop brought together diverse experts and stakeholders to identify capabilities that are necessary for responding to an international cbrne event discuss best practices and resources needed for improved interoperability of the u s and partner nation during response to a cbrne event and identify key questions that need to be addressed in follow up activities focused on improving u s cbrne response in partner nations
