more complex and imposing than any other vehicle in the british emergency services the fire engine has a long and interesting history the earliest water pumps had been developed by the eighteenth century basic manual pumps that had to be

hailed around by people or horses and were often only used on fire insured premises in the nineteenth and twentieth centuries horse drawn steam powered fire engines and eventually motorised fire engines came to revolutionise firefighting offering far greater versatility and the brigades came to be run by the municipalities in this beautifully illustrated introduction eddie baker charts the history of fire engines and their variants and the increasingly complex equipment they have carried such as high rise ladders and high pressure hoses he also explains the wider history of the fire service and how the engines have been shaped by its needs and most importantly those of the firefighters themselves

the leading book on the market just got better with its unique approach covering all aspects of setting up and running a biogas plant this new edition has been

expanded to include recent advances in biomass processing the author is a key player in the field who has designed numerous small and industrial scale biogas plants and who is also a long time lecturer on biogas production thus combining didactical skill with real life expertise as such he covers both the biological and technical aspects of biogas generation the full range of biogas substrates and processing modes is explained from agricultural and industrial waste to marine algae and sediment on site use of biogas for conversion into electricity fuel and heat is also discussed as are safety and regulatory issues many real life examples of european biogas plants already in operation illustrate the contents as do numerous schemes diagrams and summary tables for this new edition biogas analytics and quality control required for feeding biogas into natural gas networks are included as is a completely new chapter on the microbiology of biogas producing bacterial communities
