the safe drinking water act sdwa is the key federal law for protecting public water supplies from harmful contaminants first enacted in 1974 and substantially amended in 1986 and 1996 the act is administered through programs that establish standards and treatment requirements for public water supplies control underground injection of wastes finance infrastructure projects and protect sources of drinking water this report summarizes the sdwa and its major programs and regulatory requirements it includes summaries of the principal environmental statutes administered by the epa also includes the drinking water security provisions added to the sdwa in 2002 charts and tables this is a print on demand publication in this second edition of a landmark book author robin craig explores the structural implications for water quality regulation when the primary federal statute for regulating water quality the clean water act operates in a context complicated by a variety of constitutional requirements and dictates this new edition thoroughly updates the first edition particularly in areas where the supreme court has issued significant new decisions for example it includes discussions of the court s 2006 decision in *Rapanos v United States* plus the important recent developments in commerce clause jurisprudence other noteworthy additions include clean water act takings jurisprudence new discussions of increased risk as a basis for citizen suit standing and the issue of state citizen suit standing after *Massachusetts v EPA* the study of water pollution control regulation is a study of statutes and their administration this casebook explores water pollution and the federal statute chiefly designed to control it the clean water act and examines how water pollution is addressed first by the common law and then by statute an introduction provides the student with an understanding of what constitutes water pollution where it originates and how it can be controlled these materials were originally designed for the introductory course in environmental regulation environmental law at pace law school a teachers manual includes exercises that teach students advanced legal research familiarity with administrative law mechanisms and the ability to integrate what they have learned about the clean water act completely updated to capture all new revisions and new aspects of the law the new clean water handbook provides environmental professionals with a comprehensive roadmap to the requirements legal interpretations and critical issues of water pollution control law written from a legal perspective but intended as a practical resource the handbook contains both the legal text of the clean water act and the expert interpretation environmental professionals need to understand what their companies responsibilities are and how they can fulfill them this report summarizes the safe drinking water act sdwa and its major programs and regulatory requirements it excerpts with several additions the sdwa chapter of crs report r130798 environmental laws summaries of major statutes administered by the environmental protection agency epa which provides summaries of the principal environmental statutes administered by the environmental protection agency epa this report includes the drinking water security provisions added to the sdwa by the public health security and bioterrorism preparedness and response act of 2002 p l 107 188 the safe drinking water act title xiv of the public health service act is the key federal law for protecting public water supplies from harmful contaminants first enacted in 1974 and substantially amended in 1986 and 1996 the act is administered through programs that establish standards and treatment requirements for public water supplies control underground injection of wastes finance infrastructure projects and protect sources of drinking water the 1974 law established the current federal state arrangement in which states may be delegated primary implementation and enforcement authority for the drinking water program the state administered public water supply supervision program remains the basic program for regulating the nation s public water systems and 49 states have assumed this authority the last major reauthorization of the act was done through the safe drinking water act amendments of 1996 p l 104 182 which generally authorized appropriations for sdwa programs through fy2003 as with other epa administered statutes having expired funding authority congress has continued to appropriate funds for the ongoing sdwa programs in addition to reviewing key programs and requirements of the sdwa this report includes statistics on the number and types of

regulated public water systems it also provides tables that list all major amendments with the year of enactment and public law number and that cross reference sections of the act with the major u s code sections of the codified statute distributed to some depository libraries in microfiche considers s 433 s 1735 this volume explores the issues associated with the complex subject of water quality protection in an assessment of the successes and failures of the clean water act over the past twenty years in addition to examining traditional indicators of water quality the authors consider how health concerns of the public have been addressed and present a detailed examination of the ecological health of our waters taken together these measures present a far more complete and balanced picture than raw water quality data alone as well as reviewing past effectiveness the book includes specific recommendations for the reauthorization of the act which is to be considered by congress in 1995 this balanced and insightful account will surely shape the debate among legislative and policy experts and citizen activists at all levels who are concerned with issues of water quality previous editions published 2nd 2003 and 1st 1994 this report summarizes the safe drinking water act sdwa and its major programs and regulatory requirements this report includes the drinking water security provisions added to the sdwa by the public health security and bioterrorism preparedness and response act of 2002 p l 107 188 and lead reduction provisions as amended by p l 111 380 it also outlines amendments made in december 2013 by p l 113 64 h r 3588 to explicitly exempt fire hydrants from coverage under the act s lead plumbing restrictions the total maximum daily load program is becoming a fact of life for many industries the epa and state and local agencies make sure that you know all there is to know about the tmdl requirements of clean water legislation this is the definitive guide newly revised and updated to include new chapters information and appendices this new book covers drinking water regulations such as disinfectant by products synthetic organics inorganic chemicals microbiological contaminants volatile organic chemicals radionuclides fluoride toxicological approaches to setting new national drinking water regulations and trihalomethanes in addition organic and inorganic compounds scheduled to be regulated in 1989 and new candidates for the 1990s regulations are detailed key drinking water issues include problems caused by specific contaminants such as the gasoline additive methyl tertiary butyl ether mtbe perchlorate and lead as well as the related issue of the appropriate federal role in providing financial assistance for water infrastructure projects congress last reauthorized the safe drinking water act sdwa in 1996 and although funding authority for most sdwa programs expired in fy2003 broad reauthorization efforts are not expected as epa states and water utilities remain busy implementing the requirements of the 1996 amendments concerns about perchlorate in drinking water also have returned to the congressional agenda after the past congress enacted several provisions on this issue h r 213 has been introduced to require epa to set a drinking water standard for perchlorate in 2007 and a january 2005 national academy of sciences report on the health effects of perchlorate has increased oversight interest in perchlorate regulatory activities at epa concerns over the security of the nation s drinking water supplies were addressed by the 107th congress through the bioterrorism preparedness act p l 107 188 which amended sdwa to require community water systems to conduct vulnerability assessments and prepare emergency response plans subsequent congressional action has involved oversight and funding of water security assessment and planning efforts and research an ongoing sdwa issue involves the growing cost and complexity of drinking water standards and the ability of water systems especially small rural systems to comply with standards the issue of the cost of drinking water standards particularly the new arsenic standard has merged with the larger debate over the federal role in assisting communities with financing drinking water infrastructure an issue that has become more challenging in a time of tightened budgets congress authorized a drinking water state revolving fund dwsrf program in 1996 to help communities finance projects needed to meet standards for fy2005 congress provided 843 million for the dwsrf program and the president has requested 850 million for fy2006 notwithstanding this program studies show that a large funding gap exists and will grow as sdwa requirements increase and infrastructure ages this clean water action plan issued by the epa the ag dept provides a blueprint for restoring protecting the nation s precious water resources a key element in the plan is a new cooperative approach to watershed protection in which state tribal fed local governments the public first identify the watersheds with the most critical water quality problems then work together to focus resources implement effective strategies to solve those problems includes new

initiatives to reduce public health threats improve the stewardship of natural resources strengthen  
polluted runoff controls make water quality information more accessible

**Safe Drinking Water Act (SDWA)** 2011-04-01 the safe drinking water act sdwa is the key federal law for protecting public water supplies from harmful contaminants first enacted in 1974 and substantially amended in 1986 and 1996 the act is administered through programs that establish standards and treatment requirements for public water supplies control underground injection of wastes finance infrastructure projects and protect sources of drinking water this report summarizes the sdwa and its major programs and regulatory requirements it includes summaries of the principal environmental statutes administered by the epa also includes the drinking water security provisions added to the sdwa in 2002 charts and tables this is a print on demand publication

**Safe Drinking Water Act Amendments of 1995** 1996 in this second edition of a landmark book author robin craig explores the structural implications for water quality regulation when the primary federal statute for regulating water quality the clean water act operates in a context complicated by a variety of constitutional requirements and dictates this new edition thoroughly updates the first edition particularly in areas where the supreme court has issued significant new decisions for example it includes discussions of the court's 2006 decision in *Rapanos v. United States* plus the important recent developments in commerce clause jurisprudence other noteworthy additions include clean water act takings jurisprudence new discussions of increased risk as a basis for citizen suit standing and the issue of state citizen suit standing after *Massachusetts v. EPA*

**The Clean Water Act and the Constitution** 2009 the study of water pollution control regulation is a study of statutes and their administration this casebook explores water pollution and the federal statute chiefly designed to control it the clean water act and examines how water pollution is addressed first by the common law and then by statute an introduction provides the student with an understanding of what constitutes water pollution where it originates and how it can be controlled these materials were originally designed for the introductory course in environmental regulation environmental law at pace law school a teachers manual includes exercises that teach students advanced legal research familiarity with administrative law mechanisms and the ability to integrate what they have learned about the clean water act

**An Act to Amend the Safe Drinking Water Act, and for Other Purposes** 1980 completely updated to capture all new revisions and new aspects of the law the new clean water handbook provides environmental professionals with a comprehensive roadmap to the requirements legal interpretations and critical issues of water pollution control law written from a legal perspective but intended as a practical resource the handbook contains both the legal text of the clean water act and the expert interpretation environmental professionals need to understand what their companies responsibilities are and how they can fulfill them

**Safe Drinking Water Act Amendments of 1993** 1994 this report summarizes the safe drinking water act sdwa and its major programs and regulatory requirements it excerpts with several additions the sdwa chapter of crs report r130798 environmental laws summaries of major statutes administered by the environmental protection agency epa which provides summaries of the principal environmental statutes administered by the environmental protection agency epa this report includes the drinking water security provisions added to the sdwa by the public health security and bioterrorism preparedness and response act of 2002 p l 107 188 the safe drinking water act title xiv of the public health service act is the key federal law for protecting public water supplies from harmful contaminants first enacted in 1974 and substantially amended in 1986 and 1996 the act is administered through programs that establish standards and treatment requirements for public water supplies control underground injection of wastes finance infrastructure projects and protect sources of drinking water the 1974 law established the current federal state arrangement in which states may be delegated primary implementation and enforcement authority for the drinking water program the state administered public water supply supervision program remains the basic program for regulating the nation's public water systems and 49 states have assumed this authority the last major reauthorization of the act was done through the safe drinking water act amendments of 1996 p l 104 182 which generally authorized appropriations for sdwa programs through fy2003 as with other epa administered statutes having expired funding authority congress has continued to appropriate funds for the ongoing sdwa programs in addition to reviewing key programs and requirements of the sdwa this report includes statistics on the number and types of

regulated public water systems it also provides tables that list all major amendments with the year of enactment and public law number and that cross reference sections of the act with the major u s code sections of the codified statute
