this booklet is intended to provide practical help for authors of mathematical papers it is written mainly for non english speaking writers but should prove useful even to native speakers of english who are beginning their mathematical writing and may not yet have developed a command of the structure of mathematical discourse the first part provides a collection of ready made sentences and expressions occurring in mathematical papers the examples are divided into sections according to their use in introductions definitions theorems proofs comments references to the literature acknowledgements editorial correspondence and referee s reports typical errors are also pointed out the second part concerns selected problems of english grammar and usage most often encountered by mathematical writers just as in the first part an abundance of examples are presented all of them taken from actual mathematical texts the author has packed an awful lot in a few pages and has obviously been collecting his best or worst examples for a long time edwin f beschler the reviewer highly recommends this

guide to authors as well as to editors in mathematics o ninnemann zentralblatt math about the author jerzy trzeciak formerly of polish scientific publishers is now the senior copy editor at the institute of mathematics polish academy of sciences he is responsible for journals including studia mathematica fundamenta mathematicae acta arithmetica and others he is also the author of mathematical english usage a dictionary available at impan gov pl dictionary
