 algebraic number theory is written primarily  
 for beginning graduate students in pure  
 mathematics and encompasses everything that  
 most such students are likely to need others  
 who need the material will also find it  
 accessible it assumes no prior knowledge of  
 the subject but a firm basis in the theory of  
 field extensions at an undergraduate level is  
 required and an appendix covers other  
 prerequisites the book covers the two basic  
 methods of approaching algebraic number theory  
 using ideals and valuations and includes  
 material on the most usual kinds of algebraic  
 number field the functional equation of the  
 zeta function and a substantial digression on  
 the classical approach to fermat s last  
 theorem as well as a comprehensive account of  
 class field theory many exercises and an  
 annotated reading list are also included  
 numbers and you a numerology guide for
