this work is divided into two autonomous books the first book the state represents a radically new political system of society one which is the most democratic system ever possible this is a completely new society a real civil society which otherwise in the capitalist system is only a utopia in this book i scrutinize the principles of scientific socialism i e all those principles of marxism concerning the state that build socialism as a political system the second book the economic theory of

socialism is a sequel and as far as i know the only sequel of the greatest work by karl marx capital the economics of socialism makes marx s socialism already completely possible in this book i scrutinize the economic laws that build socialism as a more effective economic system than capitalism these laws are extracted from marx s main work capital from 1917 to 1991 the totalitarian system in ussr and east europe was called socialism and even by the scientific nonsense and absurd names of communism and communist system in this system the official ideology was allegedly marxism but really it could not endure any marxist criticism there was never any socialism anywhere in the twentieth century we passed through a system of utopian socialism as proof that this was not socialism that was not possible but for the utopia of writers before and after marx we were visited by a utopian socialism which at the contemporary stage is simply capitalism state monopolistic there is no better application of keynes s doctrine than the socialism of the twentieth century his planned capitalism is actually planned

challenging the often held belief that democratization necessarily leads to aggressive ethnic nationalism and even

violent conflict this book offers an alternative account of democratization and inter ethnic relations it suggests that democratization can in fact help to prevent violent conflict in divided societies as demonstrated by two case studies bulgaria and macedonia at a time when democracy promotion is increasingly becoming part of international relations and foreign policy this study offers some poignant lessons for democratization and conflict resolution in places such as iraq afghanistan and israel palestine to name but a few

this book deals with the social gospel and one of its leading proponents in twentieth century australia the anglican bishop of armidale new south wales from 1929 to 1964 john moyes it is an investigation and assessment of the career of bishop moyes as a study in christian social engagement it concerns

his vision for the role of the church in society and his contribution to that effect it is not a biography of john moyes neither is it an exhaustive history of the social gospel movement in australia or anywhere else although they both feature prominently throughout bishop moyes was a highly articulate public debater who participated in several of the critical episodes in australian history during the twentieth century the reader will find within the pages of this book discussion of highly contentious issues such as the attempt to ban the communist party of australia in 1950 and 1951 the decision to commit australian troops to the vietnam war in 1965 and the christian response to state legitimised violence moyes is placed in context with some of the most notable christian spokespeople on social and political issues in the twentieth century such as walter rauschenbusch ernest burgmann william temple george bell dietrich bonhoeffer reinhold niebuhr martin luther king jr and andré trocmé it is argued here that john moyes made intelligent prescient and compassionate contributions to many of the issues to which

he turned his mind but that like most others before or since he was unable to find a solution to the theological and moral challenges raised by the perceived threat to australia s sovereignty during world war ii this book challenges the view that when national sovereignty is threatened the christian response must be to support the government s call to war
