essay from the year 2009 in the subject sociology media art music grade 1 1 central queensland university course media relations in arts administration language english abstract it can be quite difficult to source examples of effective crisis strategies in creative enterprise companies may be small they may not have product that if defective could bring harm to the masses inciting a recall or even if a crisis occurred would necessarily lead to financial ruin or impact enough jobs as to be considered newsworthy essentially being portrayed negatively in the media is what is considered a crisis rather than whatever was at fault in the first instance this is undoubtedly due to the unpredictability of what character revealing hue the media may taint their brush with when presented the opportunity to paint a picture of whatever business has managed the misfortune of unintentionally wandering into the spotlight even though being in the spotlight can be very good for business a crisis is when a business finds itself in there for the wrong reasons the biggest business there is in creative enterprise is of course actors their sheer bankability provides millions of dollars and hundreds of jobs for each movie they secure so much can be at stake if their reputation goes down and at the wrong time when analysing public image and crisis management strategies the business of being one person

follows the same principles of those strategies being employed by companies and corporations because they are in themselves a brand if a celebrity does not behave accordingly when a crisis occurs especially when it is usually their behaviour that has caused the crisis devastating consequences can ensue they employ publicists just as companies procure pr personnel for the management of crises and to nudge their image in the right direction or at times drag it kicking and screaming many act on their own volition which can be very precarious if they were a big company but celebrities are probably the easiest for the public to forgive as after all it is their job to entertain and a public discretion is hardly akin to a situation such as a large toy manufacturer producing their latest line of product which has just caused several child fatalities due to toxic parts the methods they employ during scandals can be measured by textbook crisis management procedures on a smaller scale humanly while generally on a much larger scale publically

this case book is about crises it is not about trauma or disaster although certainly crises occur in both overlap of the three areas exist and while crisis intervention is practiced with traumatic events ranging from lethal auto wrecks to natural disasters it is very different from long term trauma therapy crisis intervention may include assisting someone who is suicidal or homicidal but also includes non life threatening situations such as child custody fights school failure drug use and a host of other situational and transient problems myer james 2007 in contrast trauma counseling often follows crisis intervention with people who are not able to re establish a daily routine because the memory of the incident creates an independent schema that affects functioning over a period of time mcfarlane yehuda 1996 that said there are different types of crises and we will attempt to portray some of those and the ethical issues that may accompany them before going further we want you know that while writing this book something became clearer to us through our experiences we knew that the application of ethical principles during crisis intervention is awkward at best and nearly impossible in the worst case scenario how do you maintain confidentiality when working in a red cross shelter with a person or family whose house has been destroyed by a wildfire people are walking around and you are not in a comfortable private office what does a crisis worker do when someone is unable to make a phone call to get information or much needed resources how will

the client get the assistance that will help restore a sense of control you as the crisis worker may need to make that phone call to help the person we found that applying ethical principles in crisis intervention is like putting a square peg into a round hole not matter what you do there are gaps please don t misunderstand we are not suggesting that ethical principles do not apply to crisis intervention work rather we are attempting to find a way to apply them in a way that makes sense and we believe the concepts of relational cultural theory rct jordan 2018 miller 1976 duffey haberstroh 2020 is a framework to fill in those gaps

developments across the millennia suggest that even though democracies and free market economies are continuously challenged by crises and disturbances such as natural disasters wars or technological revolutions in the countries where they take roots civil liberties deepen and per capita prosperity increases to substantiate this claim analytically the authors emphasize the principles that make free markets a sine qua non condition for democracy and study the nature of the relationship between free market institutions and economic growth by examining the operating principles outcomes and challenges experienced by contemporary democracies many lessons are drawn with regard to how governments should act in order to avoid the pitfalls inherently associated with representative democracy to illustrate the dangers of deviating from these principles the authors apply their findings to the greek democracy and economy since the second world war
