Out of the Bottle Sally Wise, 2011-01-17 The author of the bestselling SLOW COOKER and A YEAR IN A BOTTLE shows you how to incorporate homemade preserves into a range of recipes, turning what would have been a nice meal into a truly sublime one! Sally Wise has been a passionate preserver of fruits and vegetables for over three decades. Easy to make, nutritious and additive-free, preserves are sensational as stand-alone products - but that is just the beginning of their potential. A jam can be far more than an accompaniment to scones and cream, and a pickle is far more than a mere friend to meats or cheese. A simple dish can be turned into something sublime by the addition of a spoonful or two of home-preserved product - and that is why Sally's pantry shelves are lined with dozens of bottles of preserves each year, a veritable storehouse and toolbox from which to create amazing dishes. OUT OF THE BOTTLE contains tips and basic methods for the novice home preserver, as well as a collection of Sally's favourite preserving recipes and the dishes in which they play an integral part. From stir-fries to roasts, curries, vegetable dishes and savoury tarts; from delicious Mini Cherry Mud Cakes to Hummingbird Muffins, Sally's recipes have been developed over a lifetime of experimentation. they range from comfort food to contemporary dishes, and always focus on flavour, quick and easy preparation and natural ingredients. Never again will you reach for a bottle of pasta sauce - not when your own tomato relish will have friends and family demanding to know what your secret ingredient is, and keep them coming back for more!

Collecting, Processing and Presenting Geoscientific Information Martin H. Trauth, Elisabeth Sillmann, 2018-03-26 This second edition is an intensively revised and updated version of the book MATLAB® and Design Recipes for Earth Sciences. It aims to introduce students to the typical course followed by a data analysis project in earth sciences. A project usually involves searching relevant literature, reviewing and ranking published books and journal articles, extracting relevant information from the literature in the form of text, data, or graphs, searching and processing the relevant original data using MATLAB, and compiling and presenting the results as posters, abstracts, and oral presentations using graphics design software. The text of this book includes numerous examples on the use of internet resources, on the visualization of data with MATLAB, and on preparing scientific presentations. As with the book MATLAB Recipes for Earth Sciences-4rd Edition (2015), which demonstrates the use of statistical and numerical methods on earth science data, this book uses state-of-the art software packages, including MATLAB and the Adobe Creative Suite, to process and present geoscientific information collected during the course of an earth science project. The book's supplementary electronic material (available online through the publisher's website) includes color versions of all figures, recipes with all the MATLAB commands featured in the book, the example data, exported MATLAB graphics, and screenshots of the most important steps involved in processing the graphics.

New Age of Sustainable Capitalism Stuart L. Hart, C.K. Prahalad, 2013-05-02 A brand new collection of cutting-edge guides to sustainable capitalism Translate sustainability and “base of the pyramid” strategies into real profits It’s time for capitalism’s next reinvention. In the new Third Edition of his best-selling *Capitalism at the Crossroads*, Third Edition, Stuart L. Hart reveals tomorrow’s capitalism. He presents new case studies and practical strategies for building companies that are more sustainable, build deeper roots in their markets, play a central role in solving social and environmental problems – and are far more profitable. Hart helps you identify sustainable products and technologies that will drive urgently needed growth and help solve social and environmental problems at the same time. Drawing on his experience consulting with top companies and NGOs worldwide, he shows how to craft your optimal sustainability strategy, and overcome the pitfalls of traditional ‘greening’ approaches. This edition presents new and updated case studies from the US and beyond, demonstrating what’s working and what isn’t. It also guides business leaders in building an “infrastructure for sustainability” – one that can survive budgeting and boardrooms, recharging innovation and growth throughout your enterprise. Next, in the 5th Anniversary Edition of his classic *The Fortune at the Bottom of the Pyramid*, C.K. Prahalad reveals all that’s been learned about competing and profiting “at the bottom of the pyramid.” Prahalad outlines the latest strategies and tactics that companies are utilizing to succeed in the developing world. He interviews innovative CEOs to discuss what they’ve learned from their own initiatives, including the Unilever business leader who’s built a billion-dollar business in India. You’ll find a new case study on Jaipur Rugs’ innovative new global supply chain; updates to earlier editions’ key cases; and up-to-the-

minute information on key industries such as wireless, agribusiness, healthcare, consumer goods, and finance. Prahalad also offers an up-to-date assessment of the key questions his ideas raised: Is there truly a market? Is there scale? Is there profit? Is there innovation? Is this a global opportunity? Five years ago, executives could hope the answers to these questions would be positive. Now, as Prahalad demonstrates, they can be certain of it. From the world-renowned experts in sustainable capitalism Stuart L. Hart and C.K. Prahalad
