Introduction to Social Research

1997

introduction to social research explores the fundamentals of social research with a caribbean focus boxill chambers and wint draw on similar works in the long line of literature by caribbean social scientists to provide an essential guide to students of social research the areas covered include the research process and conceptual issues in social research the structure of the enquiry process different methods of observation techniques for analysing and presenting data ethical and political issues in social research

Qualitative Research

2001

extensively revised and updated this text considers the types of problems in nursing research that can be tackled by qualitative approaches and focuses on the schools of thought to which these relate phenomenology ethnography and grounded theory it then addresses the principles of carrying out research and collecting and analyzing data and concludes with an expanded section on how to report the research findings more effectively

the technology surrounding the design and fabrication of optical microresonators has matured to a point where there is a need for commercialization consequently there is a need for device research involving more advanced architectures and more esoteric operating principles photonic microresonator research and applications explores advances in the fabrication process that enable nanometer waveguide separations exceptionally smooth surfaces essential to reach q factors in the order of 10^6 10^8 and high index contrast materials

Single Subject Research

2019

this book provides a comprehensive reference source on next generation technologies and their applications provided by publisher

Applications of Case Study Research

1993

this book sharpens students understanding of the research process and the essential research methods and tools that researchers use to perform their work on the cutting edge of their fields far more than an introduction to research this book leaves students with the skills and applied know how to carry out their own

the second edition of this innovative textbook illustrates research methods for library and information science describing the most appropriate approaches to a question and showing you what makes research successful written for the serious practicing librarian researcher and the lis student this volume fills the need for a guide focused specifically on information and library science research methods by critically assessing existing studies from within library and information science this book helps you acquire a deeper understanding of research methods so you will be able to design more effective studies yourself section one considers research questions most often asked in information and library science and explains how they arise from practice or theory section two covers a variety of research designs and the sampling issues associated with them while sections three and four look at

methods for collecting and analyzing data each chapter introduces a particular research method points out its relative strengths and weaknesses and provides a critique of two or more exemplary studies for this second edition three new chapters have been added covering mixed methods visual data collection methods and social network analysis the chapters on research diaries and transaction log analysis have been updated and updated examples are provided in more than a dozen other chapters as well

research involving human fetuses and fetal tissue has been a subject of national debate and rancor for more than two decades despite the many demonstrated medical benefits of such research and the issuance of guidelines by various governmental and private ethics advisory bodies federal support of this research has been severely curtailed in 1993 the institute of medicine iom sponsored a conference on fetal research and applications this book examines the current state of fetal research and fetal tissue research it contains an overview of research in the field and a short history on the regulatory and legislative actions governing the field the bulk of the volume centers on ethical and legal issues of fetal research preembryo research fetal research and fetal tissue transplantation the volume also contains a full reprinting of the summary from the 1989 iom book medically assisted conception an

agenda for research including the recommendations and research agenda suggested in that volume readers can therefore view that information in context with the suggestions and topics discussed at the conference the background and research summarized in fetal research and applications should provide insights for future progress and contribute to a fuller understanding of the social and ethical issues involved in this field

research on help seeking has primarily focused on classrooms interactions that consist primarily of students asking teachers and peers for help the rapid emergence of information and communications technologies and interactive learning environments however requires expanding the help seeking landscape and rethinking such critical theoretical issues as the distinction between help seeking and information search and whether help seeking is inevitably a social self regulated learning strategy there is also the need to focus attention on help seeking in the broader learning enterprise which includes its role in the collaboration process how to support adaptive rather than the over or under reliance on help seeking as well as to scaffold help seeking skills that render the process more efficient and useful to examine these and other issues the present volume assembled contributions from internationally recognized scholars and researchers to capture the state of the art and to anticipate future developments in this expanding field its relevance extends to anyone attempting to understand the role of technology in education including educational researchers and teachers who do now or who expect to use technology to support instruction and the rapidly expanding numbers of those developing new technological applications
