in this charming retrospective lee county native prudy taylor board writes with love respect and wry humor as she reveals the true history of lee county its communities and some of its most intriguing and prominent pioneers for

example in 1884 fort myers comprised 139 acres at the original site of the town that was platted into a working community but the burgeoning town that had grown to include about 50 families did not have a newspaper so when the opportunity to kidnap an editor and his press presented itself henry l roan captain of the schooner lily white wasted no time although a paradise for tourists today sanibel was originally noted for its prolific agriculture by 1896 farmers were shipping a thousand crates of tomatoes a week during their growing season a few years later crops included eggplant beets squash green peppers cucumbers and beans unfortunately the torrential tides of salt water accompanying a disastrous hurricane in 1921 destroyed the groves and arid farms that marked the finish to sanibel s agricultural prominence with these delightful historical vignettes board presents an interesting and fascinating history of the three cities that presently make up lee county florida locals visitors and newcomers alike are sure to enjoy board s witty and causal style and will view the area with a renewed appreciation for its rich past

eugene p moehring analyzes the development of reno and las vegas since 1945 with special emphasis on the years after 1970 major factors that shaped the development of both cities were the growth of corporate gaming and megaresorts and increased personal leisure and affluence moehring provides an engaging informative and readable history of the divergent paths that reno and las vegas took over the past forty years reno the nation s gambling mecca in the 1950s led the way developing the successful tourist economy that las vegas later embraced through the 1970s the two cities resembled each other greatly but las vegas grew to achieve global significance while reno slowly declined searching for new industries to power its future moehring shows that the development of the las vegas strip was crucial to southern nevada s success the casinos hotels and entertainments of the strip and the workers they supported formed a new urban center ringed by offices residences shopping and a major university in effect it became a third metropolis governed by county commissioners larger than reno and las vegas combined moehring brings the story of the three cities to the present day examining lessons learned from the great recession and the efforts under way in all three metropolises to diversify their economies moehring makes an important contribution with the only current study of nevada s cities focusing on urban development issues rather than social history or the gaming industry as the service economy continues to grow not only in nevada but throughout the united states moehring s work has many implications for urban studies and particularly the study of urban development in other metropolitan areas
