a fascinating study that brings the power of
behavioral economics to how schools work how
students learn and how we can help them succeed
for decades schools have invested substantial
resources in boosting educational outcomes for
disadvantaged students but those investments have
not always generated positive outcomes although
many communities have expanded school choice for
example families often choose to keep their
children in failing schools and while the federal
government has increased the size of pell grants
many college bound students who would be eligible
for aid never apply then there is the troubling
trend of summer melt in which up to 40 percent of
high school graduates who have been accepted to
college mostly from underserved communities fail
to show up for the fall semester in the 160
character solution benjamin l castleman shows how
insights from behavioral economics the study of
how social cognitive and emotional factors affect
our decisions can be leveraged to help students
complete assignments perform to their full
potential on tests and choose schools and colleges
where they are well positioned for success by

employing behavioral strategies or nudges castleman shows administrators teachers and parents can dramatically improve educational outcomes from preschool to college castleman applies the science of decision making to explain why inequalities persist at various stages in education and to identify innovative solutions to improve students academic achievement and attainment by focusing on behavioral changes castleman demonstrates that small changes in how we ask questions design applications and tailor reminders can have remarkable impacts on student and school success

this book deals with the problems in translating literary prose and reveals some pertinent solutions and also concentrates on the need to expand the perimeters of translation studies the translation courses offered at many universities in bangladesh and overseas treat the subject mostly as an outcome of applied linguistics presently the teachers and students of translation are confused at the mounting impenetrability of the books and articles that flood the market unfortunately the translators lay more emphasis on the translation of poetry there should be more research regarding the particular problems of translating literary prose one explanation of this could be the fact that the status of poetry is considered higher but it is more possibly due to

the notable flawed notion that the novels essays fiction etc possess simple structures compared to that of a poem and is thus easier to translate however many debates have been organised over when to translate when to apply the close local equivalent when to invent a new word by translating clearly and when to copy simultaneously the untranslatable cultural bound words and phrases have been continuously fascinating the prose translators and translation theorists the plea made in this book is to admit the fact that there is a lot to be learnt from shaping the criteria for undertaking a prose translation and we should appreciate the hard work difficulties or frustration of the translators go between in the creation of good sense of the texts

between 1780 and 1800 authors of imaginative literature in the new united states wanted to assert that their works which bore obvious connections to anglophone literature on the far side of the atlantic nevertheless constituted a properly american tradition no one had yet figured out however what it would mean to write like an american what literature with an american origin would look like nor what literary characteristics the elusive quality of americanness could generate literature american style returns to this historical moment decades before the romantic nationalism of cooper the transcendentalism of emerson and thoreau or the iconoclastic poetics of whitman when a fantasy about the unique characteristics of u s literature first took shape and when that notion was linked to literary style while late eighteenth century u s literature advertised itself as the cultural manifestation of a radically innovative nation ezra tawil argues it was not primarily marked by invention or disruption in fact its authors self consciously imitated european literary traditions while adapting them to a new cultural environment these writers gravitated to the realm of style then because it provided a way of sidestepping the uncomfortable reality of cultural indebtedness it was their use of style that provided a way of

departing from european literary precedents tawil analyzes noah webster s plan to reform the american tongue j hector st john de crèvecoeur s fashioning of an extravagantly naïve american style from well worn topoi charles brockden brown s adaptations of the british gothic and the marriage of seduction plots to american plain style in works such as susanna rowson s charlotte temple and hannah webster foster s the coquette each of these works claims to embody something american in style yet according to tawil remains legible only in the context of stylistic generic and conceptual forms that animated english cultural life through the century

chemical solutions reagents useful to the chemist
biologist and bacteriologist by frank welcher
preface every practicing chemist and teacher of
chemistry is constantly required to prepare
special solutions and reagents of all kinds as a
fundamental part of his work these solutions which
include indicators standard acids and bases
solutions of salts special test reagents stains
fixatives culture media etc are among the basic
materials which are essential to all laboratory
work the directions for preparing these solutions
are not always conveniently available and are
usually found only in a reasonably complete
chemical library since most laboratories do not
have adequate library facilities a book of
formulas for the more commonly used solutions is
an extremely useful addition to the laboratory
shelf the purpose of this book is simply to
collect in one place for convenient reference the
methods for preparing those solutions most
frequently required by the chemist in order to
increase its usefulness however much additional

information has been included for each of the solutions to supplement the preparative methods this includes a the uses of each solution b the procedure for use of each in all cases where this is practicable c a list of those substances which interfere in making special tests d the sensitiveness of test reagents and e general remarks regarding the keeping qualities methods of storage etc of the various reagents in addition to this practical information one or more references has been included for each solution in all cases where a useful citation is available the purpose of this list is intended to be purely utilitarian rather than historically complete and so in many cases no reference to the original publication is included rather an effort has been made to refer where possible only to standard and easily available books and periodicals preferably in the English language the subject matter has been selected from the literature covering all phases of chemical laboratory work and is designed to serve chemists engaged in all branches of their profession the solutions are listed in alphabetical order under the name by which they are best known when a reagent is known by more than one name the various names are included in their proper place in the alphabetical tabulation with proper cross reference an index of the reagents which are classified according to their uses is provided to assist the chemist in locating solutions whose functions are known but which are not listed by the name known to him this index is also of value in suggesting reagents for various tests with which the chemist is not familiar or for which known reagents are not suitable
