Child Development Guides for Teachers of 3-, 4-, and 5-year-old Children

1968

child development for child care and protection workers is the first study of child development to be written specifically for practitioners in the child care and protection field summarising important current thinking on child development and applying it directly to practice the book considers ways in which development can be interrupted and explores concepts of vulnerability and resilience while relating them closely to helping children who have been abused or have suffered other trauma the quality of children s human interactions and the importance of assessing them as part of a social network forms an important theme in this book in particular the authors outline how attachment theory can be helpful for child care

and protection practice as it relates language and cognitive moral and social development to the quality of human relationships the impact of abuse and neglect on children in infancy at school age and during adolescence is contrasted with outlines of what can be considered normal development presenting case studies and opportunities to reflect on current methods of treating children this book encourages practitioners to respond to the circumstances of each child as unique and links theory and practice in an imaginative and sympathetic way

Child Development

1984

new edition of a standard introductory text

Understand Child Development: Teach Yourself

2012-07-27

child development theories and critical perspectives provides an engaging and perceptive overview of both well established and recent theories in child and adolescent psychology this unique summary of traditional scientific perspectives alongside critical post modern thinking will provide readers with a sense of the historical development of different schools of thought the authors also place theories of child development in philosophical and cultural contexts explore links between them and consider the implications of theory for practice in the light of the latest thinking and developments in implementation and translational science early chapters cover mainstream theories such as those of piaget skinner freud maccoby and vygotsky whilst later chapters present interesting lesser known theorists such as sergei rubinstein and more recent influential theorists such as esther thelen the book also addresses lifespan perspectives and systems theory and describes the latest thinking in areas ranging from evolutionary theory and epigenetics to feminism the voice of the child and indigenous theories the new edition of child development has been extensively revised to include considerable recent advances in the field as with the previous edition the book has been written with the student in mind and includes a number of useful pedagogical features including further reading discussion questions activities and websites of interest child development theories and critical perspectives will be essential reading for students on advanced courses in developmental psychology education social work and social policy and the lucid style will also make it accessible to readers with little or no background in psychology
