~~are the fundamental secrets to strategic plan execution and accountability how~~
should a strategic plan's impact be monitored and measured what does it take to lead a successful strategic planning team and effort these are but a sample of the many valuable and insightful questions asked debated and addressed by the authors in the text it is their hope that the reader will ask and find answers to many other vital questions and engage in dialogue with the authors along the way to this end each chapter ends with a set of questions that the authors suggest the reader consider before moving on to the next chapter when done in earnest the reader's responses may be used as way to stimulate strategic conversations among executive teams this book will help you evaluate the efficacy of strategic planning efforts and outcomes in your own organization

Strategic Planning - a Pragmatic Guide

2016-02-16

as humans we get to choose what we believe and who we want to be this book is a ruthlessly pragmatic guide to creating your own answers to life's biggest questions each of this book's four chapters covers one of the most important questions a person must ask themselves what is the purpose of my life how can i best realize the purpose of my life who do i want to be how do i want other people to think of me rather than give you answers to these questions this guide provides a framework that helps you develop your own answers while equipping you with the neuroscientific tools necessary to transform yourself into whomever you choose to be if you are looking for a light read that will make you feel good about yourself this isn't the book for you if you want to take the time to think hard take full ownership of the person you have allowed yourself to become and permanently transform yourself into the best iteration of that person then you have found your book

The Pragmatist's Guide to Life

1918-02-13

we need effective leaders today more than ever before in fact the root cause behind failed businesses and failed governments is usually either a lack of leadership or the presence of destructive or ineffective leadership in this collection of dissertations on topics relevant to effective leadership you'll be challenged to think along the way you'll learn how to discover and clarify your mission vision and values learn how to handle difficult people and situations improve the performance of your people and teams and communicate with coworkers customers and colleagues you'll also learn about the leadership continuum and its gradations and how to find the action behavior or decision that balances as best as possible benefits with costs balance is getting something just right however since the world is always changing the sweet spot is always changing too what was in balance yesterday may not be today like riding a bicycle we constantly need to monitor our positions and make adjustments to compensate for

Balanced Leadership

2021-08-17

the human brain is the most complex object in the known universe the field of neuroscience has made remarkable strides in recent years in understanding aspects of the brain yet we still struggle with seemingly fundamental questions about how the brain works what lessons can we learn from neuroscience s successes and failures what kinds of questions can neuroscience answer and what will remain out of reach in the brain in context the bioethicist jonathan d moreno and the neuroscientist jay schulkin provide an accessible and thought provoking account of the evolution of neuroscience and the neuroscience of evolution they emphasize that the brain is not an isolated organ it extends into every part of the body and every aspect of human life understanding the brain requires studying the environmental biological chemical genetic and social factors that continue to shape it moreno and schulkin describe today s transformative devices theories and methods including technologies like fmri and optogenetics as well as massive whole brain activity maps and the attempt to create a digital simulation of the brain they show how theorizing about the brain and experimenting with it often go hand in hand and they raise cautions about unintended consequences of technological interventions the brain in context is a stimulating and even handed assessment of the scope and limits of what we know about how we think
