it is frequently argued that u s corporations have shorter time horizons for planning and investment than their japanese and german competitors this argument though widely accepted in studies of u s competitiveness has rarely been examined in depth time horizons and technology investments explores the evidence that some u s corporations consistently select projects biased toward short term return and addresses factors influencing the time related preferences of u s corporate managers in selecting projects for investment it makes recommendations to policymakers and managers about policies to mitigate negative external influences and about strategies to remove internal biases toward noncompetitive decisions more than perhaps anybody else in the world the swedish social scientist björn wittrock has contributed both on the intellectual and institutional level to making a truly global science possible this book is devoted to an appreciation of his contributions this illuminating book broadly addresses the emerging field of diversity of capitalism from a comparative institutional approach it explores the varied patterns for achieving coordination in different economic systems applying them specifically to china japan and south korea these countries are of particular interest due to the fact that they are often considered to have developed their own peculiar blend of models of capitalism the expert contributors take a common institutional approach focusing on institutions at the macro level they present case studies to demonstrate the diversity of institutional patterns at the advent of the 21st century both within the east asian region and elsewhere examples of stability within existing institutions are illustrated alongside examples of comprehensive institutional change underpinning the case studies are a set of theoretical and empirical challenges for researchers concerned with national institutional settings path dependence and endogenous dynamics this volume investigates the relationship between economic globalization and institutions or global governance challenging the common assumption that globalization and institutionalization are essentially processes which exclude each other instead the contributors to this book show that globalization is better perceived as a dual process of institutional change at the national level and institution building at the transnational level rich supporting empirical evidence is provided along with a theoretical conceptualization of the main actors mechanisms and conditions involved in trickle up and trickle down trajectories through which national institutional systems are being transformed and transnational rules emerge the book collectively argues that transnational institution building is one of the most striking features of the current period of internationalization as a consequence debates concerning globalization and global governance have to be reformulated the authors posit that globalization is not threatening governance but in fact globalization reflects a particular type of governance the dilemma therefore is not between globalization and institutions but between different meanings of governance and the balance that should be reached between them globalization and institutions will be of special interest to academics and scholars of institutional economics globalization and management however with its focus on two key debates for which there is clearly rising interest many social scientists will find the book of interest advances in pacific basin business economics and finance is an annual publication designed to focus on interdisciplinary research in finance economics and management among pacific rim countries examines various issues concerning the strategies of institutional investors the role of institutional investors in corporate governance their impact on local and international capital markets as well as the emergence of sovereign and other asset management funds and their interactions with micro and macro economic and market environments in the past few years there has been a large increase in portfolio capital flows into emerging markets mostly fueled by mutual funds and other institutional investors based on a simple variance ratio test this paper finds that emerging stock markets as a group experienced a sharp increase in autocorrelation in total returns at a time when institutional investors began to significantly expand their holdings in these markets these results are consistent with the view that institutional investor sentiment toward emerging markets as an asset class can at times play a critical role in determining asset prices with shifts in sentiment resulting in periods of bubble like booms and busts and asset price overshooting the complexity of investments continues to grow and institutional pools of capital from endowments to pension funds are suffering from too much risk and not enough return yet managing these investments and creating and implementing governance structures are seldom an integral part of the organization s core mission or its operations that s the way it has always been say many directors and executives as a result a board of directors or investment committee often believes it needs to make all the decisions or outsource money management and hope for the best as winning the institutional investing race a guide for directors and executives makes clear that sentiment is a big mistake that can lead to poor returns reduced capital to employ on behalf of the organizational mission and even charges of malfeasance on the part of directors authors michael bunn and zack campbell who advise companies and institutions on best practices in institutional investment are determined to help institutions and companies learn to manage their capital funds like the real businesses they are this hands on book will show you the importance of governance in creating and overseeing investment policy the roles and responsibilities of key stakeholders especially board members how to construct an effective investment policy statement an overview of the four primary governance models available to trustees and the pros cons of each how to work with fund managers in house or out to get the highest returns possible besides governance this book covers a wide array of investment topics modern portfolio theory risk application investment manager evaluation and manager search asset allocation and diversification among others while introducing a new and successful approach to managing investment portfolios the goal is to provide a grounding in investing for those involved in making financial decisions at the board level as the authors make clear it is not possible just to beat the averages but to do so consistently winning the institutional investing race a guide for directors and executives offers a healthy rethinking of investment management and governance for any organization or board that oversees institutional investments and manages those making investment decisions most important it shows how directors and managers can maintain their fiduciary responsibilities to the organizations they serve while maximizing investment returns the fifth in a series of five histories of the carnegie institution of washington offering an exciting the sixth disquisition of the omnidoxy astronism s founding treatise this final publication in the sixth segment of the little blue book series applies the study of being to the context of the astronist institution which can also be referred to as meta institutiology thus asking questions regarding what the institution is its role in and relationship to astronism and how its purpose can best be described the little blue book series was created and first published by cometan himself as a way to simplify and commercialise the immensity of the two million word length of the omnidoxy into smaller more bite size publications a successful series from its very first published entry the little blue book series has gone on to become a symbol of astronist commercial literature and a way for cometan s words to reach readers of all ages and abilities who remain daunted by the beauty and yet the sheer extensiveness of the omnidoxy as the longest religious text in history the foundations and anatomy of shareholder activism examines the landscape of contemporary shareholder activism in the uk the book focuses on minority shareholder activism in publicly listed companies it argues that contemporary shareholder activism in the uk is dominated by two groups one the institutional shareholders whose shareholder activism is largely seen as a driving force for good corporate governance and two the hedge funds whose shareholder activism is based on value extraction and exit the book provides a detailed examination of both types of shareholder activism and discusses critically the nature of motivations for and consequences following both types of shareholder activism the book then locates both types of shareholder activism in the theory of the company and the fabric of company law and argues that institutional shareholder activism based on exercising a voice at general meetings is well supported in theory and law the call for institutions to engage in more informal forms of activism in the name of stewardship may bring about challenges to the current patterns of activism that institutions engage in the book argues however that a more cautious view of hedge fund activism and the pattern of value extraction and exit should be taken more empirical evidence is likely to be necessary however to weigh up the long terms benefits and costs of hedge fund activism provides insights on how the different applications of path dependence have developed and evolved this book suggests that there has been a definite evolution from applications of path dependence in the history of technology towards other fields of social science it also discusses the various definitions of path dependence why do institutions emerge change persist and die this book challenges conventional welfare state through their contribution to their effectivity productivity and efficiency in most handbooks of public administration computers are seen as neutral instruments and most of the time the role of computer technologies in the transformation of public administration is completely neglected this deafening silence is a great contrast with the way ict s are actually changing public administration the faster the developments in a field of study are the more difficult it is to let the theories related to that field of study mature in such circumstances most statements will remain provisial and context dependent 25 years of research in irvine california and kassel germany and more than 10 years of research in tilburg rotterdam the netherlands and about seven years of research abolition elsewhere in the western world capital punishment continues in dozens of american states a fact that is frequently discussed but rarely understood the same puzzlement surrounds the peculiar form that american capital punishment now takes with its uneven application its seemingly endless delays and the uncertainty of its ever being carried out in individual cases none of which seem conducive to effective crime control or criminal justice in a brilliantly provocative study david garland explains this tenacity and shows how death penalty practice has come to bear the distinctive hallmarks of america s political institutions and cultural conflicts america s radical federalism and local democracy as well as its legacy of violence and racism account for our divergence from the rest of the west whereas the elites of other nations were able to impose nationwide abolition from above despite public objections american elites are unable and unwilling to end a punishment that has the support of local majorities and a storied place in popular culture in the course of hundreds of decisions federal courts sought to rationalize and civilize an institution that too often resembled a lynching producing layers of legal process but also delays and reversals yet the supreme court insists that the issue is to be decided by local political actors and public opinion so the death penalty continues to respond to popular will enhancing the power of criminal justice professionals providing drama for the media and bringing pleasure to a public audience who consumes its chilling
