The Architecture of Happiness

2010-12-03

bestselling author alain de botton considers how our private homes and public edifices influence how we feel and how we could build dwellings in which we would stand a better chance of happiness in this witty erudite look at how we shape and are shaped by our surroundings alain de botton applies stendhal's motto that beauty is the promise of happiness to the spaces we inhabit daily why should we pay attention to what architecture has to say to us de botton asks provocatively with his trademark lucidity and humour de botton traces how human needs and desires have been served by styles of architecture from stately classical to minimalist modern arguing that the stylistic choices of a society can represent both its cherished ideals and the qualities it desperately lacks on an individual level de botton has deep sympathy for our

need to see our selves reflected in our surroundings he demonstrates with great wisdom how buildings just like friends can serve as guardians of our identity worrying about the shape of our sofa or the colour of our walls might seem self indulgent but de botton considers the hopes and fears we have for our homes at a new level of depth and insight when shopping for furniture or remodelling the kitchen we don t just consider functionality but also the major questions of aesthetics and the philosophy of art what is beauty can beautiful surroundings make us good can beauty bring happiness the buildings we find beautiful de botton concludes are those that represent our ideas of a meaningful life the architecture of happiness marks a return to what alain does best taking on a subject whose allure is at once tantalizing and a little forbidding and offering to readers a completely beguiling and original exploration of the subject as he did with proust philosophy and travel now he does with architecture

the bestselling author of the architecture of happiness and how proust can change your life revisits his utterly charming debut book essays in love the narrator is smitten by chloe on a paris to london flight and by the time they

ve reached the luggage carousel he knows he is in love he loves her chestnut hair watery green eyes the gap that makes her teeth kantian and not platonic and her views on heidegger s being and time but he hates her taste in shoes what makes this book extraordinary is the depth with which the emotions involved in the relationship are analysed love comes under the philosophical microscope plotting the course of their affair from the initial delirium of infatuation to the depths of suicidal despair through a fit of anhedonia defined in medical texts as a disease resulting from the terror brought on by the threat of utter happiness and finally through the terrorist tactics employed when the beloved begins inexplicably to drift away essays in love is filled with profound and witty observations on the pain and exhilaration of love an entire chapter is devoted to the nuances and subtexts of an initial date while another chapter mulls over the question of how and when to say i love you with allusions to aristotle sartre wittgenstein and groucho marx de botton has plotted an imaginative and microscopically detailed romance

what do medieval knights suicide bombers and victimhood culture have in common betraying dignity argues that in the second decade of the twenty first century individuals political parties and nations around the world are abandoning the dignity based culture we established in the aftermath of two world wars less than a century ago disappointed or intimidated many turn their backs on the humanitarian universalistic culture that presumes our inherent human dignity and celebrates it as the basis of every individual s equal human rights instead people and nations are returning to a much older honor based cultural structure because its ancient logic and mentality take new forms such as social network shaming and certain aspects of victimhood culture we fail to recognize them and overlook the pitfalls of the old honor based structure narrating the history of honor based societies this book distinguishes their underlying principle from the post wwii notion of dignity that underlies human rights it makes the case that in order to revive and strengthen dignity based culture the concept of human dignity must be defined

narrowly and succinctly and enhanced with the principle of respect continuing its historical and cultural narrative the book discusses contemporary phenomena such as al qaeda terrorists shaming via social network fomo and some features of the emerging victimhood culture the book pays homage to erich fromm s classic escape from freedom

the landscape of christian spirituality in the west is no longer lush with green grass and wild flowers blooming instead across the country we find dry terrain where churches no longer can expect interested seekers yet most of our solutions for addressing this predicament link to anxiety around our performance and personality rather than going back to the boardroom to cook up new techniques for a trendier church let's ask more meaningfully rooted questions do we know how to be present in our neighborhoods do we know how to be present in community do we know how to be present to the in breaking kingdom of god there is a growing groundswell discovering that we have become uprooted and detached from each other in the way we express being the church we need a subterranean movement that plunges below the surface into a way of being the people of god that carries an unwavering incarnational creed dan white jr uses crisp criticism narrative theology and tangible practices to uncover a hopeful pathway for being radically rooted in god's world

an insightful examination of why we compare ourselves to those above and below us the united states was founded on the principle of equal opportunity for all and this ethos continues to inform the nation's collective identity in reality however absolute equality is elusive the gap between rich and poor has widened in recent decades and the united states has the highest level of economic inequality of any developed country social class and other differences in status reverberate throughout american life and prejudice based on another's perceived status persists among individuals and groups in envy up scorn down noted social psychologist susan fiske examines the psychological underpinnings of interpersonal and intergroup comparisons exploring why we compare ourselves to those both above and below us and

analyzing the social consequences of such comparisons in day to day life what motivates individuals groups and cultures to envy the status of some and scorn the status of others who experiences envy and scorn most envy up scorn down marshals a wealth of recent psychological studies as well as findings based on years of fiske s own research to address such questions she shows that both envy and scorn have distinctive biological emotional cognitive and behavioral characteristics and though we are all wired for comparison some individuals are more vulnerable to these motives than others dominant personalities for example express envy toward high status groups such as the wealthy and well educated and insecurity can lead others to scorn those perceived to have lower status such as women minorities or the disabled fiske shows that one s race or ethnicity gender and education all correlate with perceived status regardless of whether one is accorded higher or lower status however all groups rank their members and all societies rank the various groups within them we rate each group as either friend or foe able or unable and accordingly assign them the traits of warmth or competence the majority of groups in the united states are ranked either warm or competent but not both with extreme exceptions the homeless or the very poor are considered neither warm nor competent societies across the globe view older people as warm but incompetent conversely the very rich are generally considered cold but highly competent envy up scorn down explores the nuances of status hierarchies and their consequences and shows that such prejudice in its most

virulent form dehumanizes and can lead to devastating outcomes from the scornful neglect of the homeless to the envious anger historically directed at tutsis in rwanda or jews in europe individuals groups and even cultures will always make comparisons between and among themselves envy up scorn down is an accessible and insightful examination of drives we all share and the prejudice that can accompany comparison the book deftly shows that understanding envy and scorn and seeking to mitigate their effects can prove invaluable to our lives our relationships and our society

this book examines the psychological dimensions of emotions and humour in buddhism while there is a wealth of material concerning human emotions related to humour and the mindful management of negative emotions very little has been written on the theory of buddhist humour uniting both buddhist and western philosophy the author draws upon the theory of incongruity humour espoused by figures such as kierkegaard kant and hegel and absorbed into the interpretation of humour by the buddhist monk and former western philosopher

Ñāṇavīra thero the author makes extensive use of rich primary sources such as the parables used by ajahn brahm while interweaving western theories and philosophies to illuminate this original study of humour and emotion this pioneering work will be of interest and value to students and scholars of humour buddhist traditions and existentialism more widely
