a practical manual written with the home restorer in mind well illustrated with clear instructions this manual guides the amateur through dismantling repair rebuilding special chapters on steering gear suspension brakes electrics trim by grahame bristow includes many diagrams 216 pages whenever i see a rebuild guide i am impressed by how easy everything looks every job seems to be so straightforward not surprisingly since they have been written by seasoned professionals who have all the tools own large workshops and have worked on the same cars for years what they all have in common is that seasoned professionals are not the same as many of us it s time that these guys started to think about real people no we don t own workshops probably not even a double door garage rarely even a single door garage many of us work on our cars outside on the road or a driveway where a level surface is a dream we are often tackling restoration problems for the first time for example a few years back over the course of seven or eight months i watched the slow building of a peugeot 205 rally car it was certainly an interesting and time consuming project which included painting the bare shell inside and out in fact i noticed that almost every day a bit more work had been done as did many others amongst

thousands of motorists who use the a316 chertsey road one of the great london arteries every single working day the owner stripped and built the car on the rough grass verge outside his flat much to the admiration and enlightenment of many a humble commuter just like the rest of us here was an enthusiast getting on with the job without a workshop or garage he just worked on the roadside no power tools no blackhawk jig nothing more than simple tools four axle stands and his wits not only is working space at a premium but so are specialist tools even a trolley jack is a luxury for many also surprisingly many of us cannot weld or wish to learn that black art even if we could where would we do it on the grass verge outside our house in a cramped garage or in the yard i didn t buy my mg with the intention of rebuilding it i just wanted to drive it the painful truth dawned later and boy did i learn the hard way i couldn t lay claim to being a great mechanic or being very knowledgeable about midgets or sprites as you ll see i made some fundamental errors building my own midget but i got there in the end without much help and without being too adept in the spanner department i simply intended to get it right and if i got things wrong well i just started again hopefully this guide in conjunction with a little of your own research will lead to a successful rebuild of your own i ve tried to cover as much as i can within these pages but my knowledge is pretty shaky in some areas especially with regard to the 1500 engine if your car proves to be at variance with what has been written here its not necessarily wrong just that you will need to do some detective work of your own have fun and when you ve finished building the car drive it that s what they made it for
