forced to combat an increasing array of transnational threats the study of roman sculpture has been an essential part of the disciplines of art history and classics since the eighteenth century famous works like the laocoön the arch of titus and the colossal portrait of constantine are familiar to millions again and again scholars have returned to sculpture to answer questions about roman art society and history indeed the field of roman sculptural studies encompasses not only the full chronological range of the roman world but also its expansive geography and a variety of artistic media formats sizes and functions exciting new theories methods and approaches have transformed the specialized literature on the subject in recent decades rather than creating another chronological catalogue of representative examples from various periods genres and settings the oxford handbook of roman sculpture synthesizes current best practices for studying this central medium of roman art situating it within the larger fields of art history classical archaeology and roman studies this comprehensive volume fills the gap between introductory textbooks and highly focused professional literature the oxford handbook of roman sculpture conveniently presents new technical scientific literary and theoretical approaches to the study of roman sculpture in one reference volume while simultaneously complementing textbooks and other publications that present well known works in the corpus the contributors to this volume address metropolitan and provincial material from the early republican period through late antiquity in an engaging and fresh style authoritative innovative and up to date the oxford handbook of roman sculpture will remain an invaluable resource for years to come the bbc proms is the world s biggest and longest running classical music festival and one of the jewels in the crown for the bbc it is one of the strongest brand names in the music world and this comprehensive handbook gives an overview of the political social economic and legal dimensions of citizenship in the middle east and north africa from the nineteenth century to the present the terms citizen and citizenship are mostly used by researchers in an off hand self evident manner a citizen is assumed to have standard rights and duties that everyone enjoys however citizenship is a complex legal social economic cultural ethical and religious concept and practice since the rise of the modern bureaucratic state in each country of the middle east and north africa citizenship has developed differently in addition rights are highly differentiated within one country ranging from privileged underprivileged and discriminated citizens to non citizens through its dual nature as instrument of state control as well as a source of citizen rights and entitlements citizenship provides crucial insights into state citizen relations and the services the state provides as well as the way citizens respond to these actions this volume focuses on five themes that cover the crucial dimensions of citizenship in the region historical trajectory of citizenship since the nineteenth century until independence creation of citizenship from above by the state different discourses of rights and forms of contestation developed by social movements and society mechanisms of inclusion and exclusion politics of citizenship nationality and migration covering the main dimensions of citizenship this multidisciplinary book is a key resource for students and scholars interested in citizenship politics economics history migration and refugees in the middle east

and north africa second edition updated march 2023 ancient rome is still with us more than ever every year with new metro lines roadworks digs restorations and repairs new discoveries are made and old errors corrected and new questions raised this electronic book is intended as both a walking guide to ancient rome and a resource for the city and the people who left their mark on history each of the eight excursions illustrates an aspect of the city from the foundation to the fall and in passing explains the bits of modern rome whose roots lie in that distant past these walks are not meant to be a tourist guide of the rome in 3 days style nor a nutshell guide to the well documented and overrun sites such as the colosseum and the forum instead they lead through the city itself along paths that have been trod for thousands of years advertising expenditure data across ten media consumer magazines sunday magazines newspapers outdoor network television spot television syndicated television cable television network radio and national spot radio lists brands alphabetically and shows total ten media expenditures media used parent company and pib classification for each brand also included originally formulated by ernst jünger nawrotek formulates the idea of accumulation of agency the ability to act to replace the logic of capital accumulation as a main driver of urban development he argues that this

accumulation of agency operates already in contemporary cities and should not be seen as essential element of capitalism but as a conceptual gateway to a post capitalist world the rough guide to turkey is a must for all discerning travellers heading to this fascinating country that straddles europe and asia the most comprehensive and informed travel guide on the market offering insightful coverage taking readers from the stunning trails of the lycian way on the turquoise coast to the iconic dome of aya sofia and from legendary sites such as troy and ephesus to the fairytale landscapes of cappadocia packed with practical advice on everything from how to buy the finest kilims rugs to details on catching dolmuses the rough guide to turkey has all you need to find the best places to stay and eat with trusted reviews you can rely on and options to suit all budgets complete with stunning photography itineraries to help plan your trip and detailed maps to navigate your way through even the most maze like towns it s easy to see why the rough guide to turkey is such an invaluable addition to your suitcase databases and information systems are now indispensable for the day to day functioning of businesses and society this book presents 25 selected papers from those delivered at the 12th international baltic conference on databases and information systems 2016 db is 2016 held in riga latvia in july 2016 since it began in 1994 this biennial conference has become an international forum for researchers and developers in the field of databases information systems and related areas and the papers collected here cover a wide spectrum of topics related to the development of information systems and data processing these include the development of ontology applications tools technologies and languages for model driven development decision support systems and data mining natural language processing and building linguistic components of information systems advanced systems and technologies related to information systems databases and information technologies in teaching and learning the book will be of interest to all those whose work involves the design application and use of databases and information systems this book provides formal and informal definitions and taxonomies for self aware computing systems and explains how self aware computing relates to many existing subfields of computer science especially software engineering it describes architectures and algorithms for self aware systems as well as the benefits and pitfalls of self awareness and reviews much of the latest relevant research across a wide array of disciplines including open research challenges the chapters of this book are organized into five parts introduction system architectures methods and algorithms applications and case studies and outlook part i offers an introduction that defines self aware computing systems from multiple perspectives and establishes a formal definition a taxonomy and a set of reference scenarios that help to unify the remaining chapters next part ii explores architectures for self aware computing systems such as generic concepts and notations that allow a wide range of self aware system architectures to be described and compared with both isolated and interacting systems it also reviews the current state of reference architectures architectural frameworks and languages for self aware systems part iii focuses on methods and algorithms for self aware computing systems by addressing issues pertaining to system design like modeling synthesis and verification it also examines topics such as adaptation benchmarks and metrics part iv then presents applications and case studies in various domains including cloud computing data centers cyber physical systems and the degree to which self aware computing approaches have been adopted within those domains lastly part v surveys open challenges and future research directions for self aware computing systems it can be used as a handbook for professionals and researchers working in areas related to self aware computing and can also serve as an advanced textbook for lecturers and postgraduate students studying subjects like advanced software engineering autonomic computing self adaptive systems and data center resource management each chapter is largely self contained and offers plenty of references for anyone wishing to pursue the topic more deeply

In the typical narrative of modern Sino-European relations, George Macartney's disastrous 1793 mission to China plays a central role. His failure to open China to trade and diplomatic relations with Britain sets the stage for a long and bitter clash of cultures that led to the Opium Wars of the nineteenth century and perhaps even to the mistrust that still pervades relations today. In this book, Tonio Andrade draws on a wealth of neglected archival material to tell a very different story: that of the last European delegation that was ever received in the traditional Chinese court: the Dutch mission of 1794-95.

in this book krzysztof nawratek explores the possibility of a post capitalist city and in so doing reclaims and develops the idea of total mobilisation as originally formulated by ernst jünger nawratek formulates the idea of accumulation of agency the ability to act to replace the logic of capital accumulation as a main driver of urban development he argues that this accumulation of agency operates already in contemporary cities and should not be seen as essential element of capitalism but as a conceptual gateway to a post capitalist world
