peculiarities and properties of water taking levels fitting down sills under water washing out a
mill race or foundation by sluicing pressure of water velocity of falling water tables iii
introduction the occupation of a millwright differs from that of almost all other tradesmen and
mechanics in that he is compelled to accommodate his work to a greater variety of circnmstances
conditions and contingencies for instance a millwright is employed to build two saw mills one is to
be in or near a city convenient to foundries and machine shops where a great variety of
waterwheels and all the other machinery required for its construction can be obtained cheaply
and in abundance but the water power and site are valuable here and he must select the water
wheels and adapt every part to do the required amount of work with the least possible waste of
water and room and all the machinery and many of the fixtures will be of iron the other saw mill
is to be built back in the interior of the wilderness where all supplies must be ^{street law a course in practical} improvised and carried
