in the 1920s mexico established rural normales boarding schools that trained teachers in a new nation building project drawn from campesino ranks and meant to cultivate state allegiance their graduates would facilitate land distribution organize civic festivals and promote hygiene campaigns in unintended lessons of revolution tanalís padilla traces the history of the rural normales showing how they became sites of radical politics as padilla demonstrates the popular longings that drove the mexican revolution permeated these schools by the 1930s ideas about land reform education for the poor community leadership and socialism shaped their institutional logic over the coming decades the tensions between state consolidation and revolutionary justice produced a telling contradiction the very schools meant to constitute a loyal citizenry became hubs of radicalization against a government that increasingly abandoned its commitment to social justice crafting a story of struggle and state repression padilla illuminates education s radical possibilities and the nature of political consciousness for youths whose changing identity from campesinos to students to teachers speaks to mexico s twentieth century transformations initially branching out of the european contradance tradition the danzón first emerged as a distinct form of music and dance among black performers in nineteenth century cuba by the early twentieth century it had exploded in popularity throughout the gulf of mexico and caribbean basin a fundamentally hybrid music and dance complex it reflects the and dance studies the emergence hemisphere wide influence and historical and contemporary significance of this music and dance phenomenon co authors alejandro l madrid and robin d moore take an ethnomusicological historical and critical approach to the processes of appropriation of the danzón in new contexts its changing meanings over time and its relationship to other musical forms delving into its long history of controversial popularization stylistic development glorification decay and rebirth in a continuous transnational dialogue between cuba and mexico as well as new orleans the authors explore the production consumption and transformation of this afro diasporic performance complex in relation to global and local ideological discourses by focusing on interactions across this entire region as well as specific local scenes madrid and moore underscore the extent of cultural movement and exchange within the americas during the late nineteenth and early twentieth centuries and are thereby able to analyze the danzón the dance scenes it has generated and the various discourses of identification surrounding it as elements in broader regional processes danzón is a significant addition to the literature on latin american music dance and expressive culture it is essential reading for scholars students and fans of this music alike mexican filmmaking is traced from its early beginnings in 1896 to the present in this book of particular interest are the great changes from 1990 to 2004 the confluence of talented and dedicated filmmakers important changes in mexican cinematic
