Design of Racing and High-Performance Engines 1998-2003

2003-08-05 andrew dorman introduces sierra leone as blair s second great military adventure after kosovo and the first he undertook on his own it is tied to blair s 1999 chicago speech on the doctrine of the international community his move towards humanitarianism and the impact of the kosovo experience the book links this move with the rise of cosmopolitan militaries and the increasing involvement of western forces in humanitarian operations and their impact on the international system furthermore it places it within the context of defence transformation and the emerging western expeditionary capabilities in particular the european union s new battle group concept and developments in concepts such as network centric warfare and networked enabled capability

examining the whole campaign and considering the impact on the blair government this book will prove to be a key reader on the topic
