the 4 volume set lncs 12112 12114 constitutes the papers of the 25th international conference on database systems for advanced applications which will be held online in september 2020 the 119 full papers presented together with 19 short papers plus 15 demo papers and 4 industrial papers in this volume were carefully reviewed and selected from a total of 487 submissions the conference program presents the state of the art r d activities in database systems and their applications it provides a forum for technical presentations and discussions among database researchers developers and users from academia business and industry this book is an in depth systematic and structured technical reference on 3gpp s lte advanced releases 10 and 11 covering theory technology and implementation written by an author who has been involved in the inception and development of these technologies for over 20 years the book not only describes the operation of individual components but also shows how they fit into the overall system and operate from a systems perspective uniquely this book gives in depth information on upper protocol layers implementation and deployment issues and services making it suitable for engineers who are implementing the technology into future

products and services reflecting the author's 25 plus years of experience in signal processing and communication system design this book is ideal for professional engineers researchers and graduate students working in cellular communication systems radio air interface technologies cellular communications protocols advanced radio access technologies for beyond 4g systems and broadband cellular standards an end to end description of lte lte advanced technologies using a top down systems approach providing an in depth understanding of how the overall system works detailed algorithmic descriptions of the individual components operation and inter connection strong emphasis on implementation and deployment scenarios making this a very practical book an in depth coverage of theoretical and practical aspects of lte releases 10 and 11 clear and concise descriptions of the underlying principles and theoretical concepts to provide a better understanding of the operation of the system's components covers all essential system functionalities features and their inter connections based on a clear protocol structure including detailed signal flow graphs and block diagrams includes methodologies and results related to link level and system level evaluations of lte advanced provides understanding and insight into the advanced underlying technologies in lte advanced up to and including release 11 multi antenna signal processing ofdm carrier aggregation coordinated multi point transmission and reception eicic multijawdigui

coexistence e mbms positioning methods real time and non real time wireless multimedia applications this two volume set lncs 6587 and lncs 6588 constitutes the refereed proceedings of the 16th international conference on database systems for advanced applications dasfaa 2011 held in saarbrücken germany in april 2010 the 53 revised full papers and 12 revised short papers presented together with 2 invited keynote papers 22 demonstration papers 4 industrial papers 8 demo papers and the abstract of 1 panel discussion were carefully reviewed and selected from a total of 225 submissions the topics covered are social network social network and privacy data mining probability and uncertainty stream processing graph xml xml and graph similarity searching and digital preservation spatial queries query processing as well as indexing and high performance this book features high quality research papers presented at the 3rd international conference on sustainable expert systems icses 2022 held in nepal during september 9 10 2022 the book focuses on the research information related to artificial intelligence sustainability and expert systems applied in almost all the areas of industries government sectors and educational institutions worldwide the main thrust of the book is to publish the conference papers that deal with the design implementation development testing and management of intelligent and sustainable expert systems and also to provide both theoretical and practical guidelines for the deployment of these systems each time we see grim pictures of aircjafa

wreckage on a rain drenched crash site or scenes of tired holiday travelers stranded in snow covered airports we are reminded of the harsh impact that weather can have on the flying public this book examines issues that affect the provision of national aviation weather services and related research and technology development efforts it also discusses fragmentation of responsibilities and resources which leads to a less than optimal use of available weather information and examines alternatives for responding to this situation in particular it develops an approach whereby the federal government could provide stronger leadership to improve cooperation and coordination among aviation weather providers and users processes and foundations for virtual organizations contains selected articles from pro ve 03 the fourth working conference on virtual enterprises which was sponsored by the international federation for information processing ifip and held in lugano switzerland in october 2003 this fourth edition includes a rich set of papers revealing the progress and achievements in the main current focus areas vo breeding environments formation of collaborative networked organizations ontologies and knowledge management process models and interoperability infrastructures multi agent approaches in spite of many valid contributions in these areas many research challenges remain this is clearly stated in a number of papers suggesting a new research agenda and strategic research roadmaps for advanced virtual organizations with thęava gui

selected papers included in this book provide pursues its double mission as a forum for presentation and discussion of achievements as well as a place to discuss and suggest new directions and research strategies modeling and simulation of computer networks and systems methodologies and applications introduces you to a broad array of modeling and simulation issues related to computer networks and systems it focuses on the theories tools applications and uses of modeling and simulation in order to effectively optimize networks it describes methodologies for modeling and simulation of new generations of wireless and mobile networks and cloud and grid computing systems drawing upon years of practical experience and using numerous examples and illustrative applications recognized experts in both academia and industry discuss important and emerging topics in computer networks and systems including but not limited to modeling simulation analysis and security of wireless and mobile networks especially as they relate to next generation wireless networks methodologies strategies and tools and strategies needed to build computer networks and systems modeling and simulation from the bottom up different network performance metrics including mobility congestion quality of service security and more modeling and simulation of computer networks and systems is a must have resource for network architects engineers and researchers who want to gain insight into optimizing network performance through the use of modeling and simulation

discusses important and emerging topics in computer networks and systems including but not limited to modeling simulation analysis and security of wireless and mobiles networks especially as they relate to next generation wireless networks provides the necessary methodologies strategies and tools needed to build computer networks and systems modeling and simulation from the bottom up includes comprehensive review and evaluation of simulation tools and methodologies and different network performance metrics including mobility congestion quality of service security and more this volume constitutes the refereed proceedings of the 24th eurospi conference held in ostrava czech republic in september 2017 the 56 revised full papers presented were carefully reviewed and selected from 97 submissions they are organized in topical sections on spi and vses spi and process models spi and safety spi and project management spi and implementation spi issues spi and automotive selected key notes and workshop papers gamifyspi spi in industry 4 0 best practices in implementing traceability good and bad practices in improvement safety and security experiences with agile and lean standards and assessment models team skills and diversity strategies this book provides a clear sighted analysis which suggests that architectural design may yet shape and order the future of cities a clear argument that emerges is that to retain their future agency architects must understand the contours and ecologies of practice that constitute the global system of architecture

production smart cities for technological and social innovation establishes a key theoretical framework to understand the implementation and development of smart cities as innovation drivers in terms of lasting impacts on productivity livability and sustainability of specific initiatives this framework is based on empirical analysis of 12 case studies including pioneer projects from europe asia the middle east and more it explores how successful smart cities initiatives nurture both technological and social innovation using a combination of regulatory governance and private agency typologies of smart city making approaches are explored in depth integrative analysis identifies key success factors in establishing innovation relating to the effectiveness of social systems institutional thickness governance the role of human capital and streamlining funding of urban development projects cases from a range of geographies scales social and economic contexts explores how smart cities can promote technological and social innovation in terms of direct impacts on livability productivity and sustainability establishes an integrative framework based on empirical evidence to develop more innovative smart city initiatives investigates the role of governments in coordinating fostering and guiding innovations resulting from smart city developments interrogates the policies and governance structures which have been effective in supporting the development and deployment of smart cities this book

proceedings of the first automotive software workshop aswd 2004 held in san diego ca usa in january 2004 the 10 revised full papers presented were carefully reviewed and selected from 26 lectures held at the workshop that brought together experts from industry and academia working on highly complex distributed reactive software systems related to the automotive domain each release of ibm data facility storage management subsystem dfsms builds on the previous version the latest release ibm z os v1 13 dfsms provides enhancements in these areas for the z os platform in a system managed storage environment storage management data access device support program management distributed data access this ibm redbooks publication provides a summary of the functions and enhancements in z os v1 13 dfsms it provides information that you need to understand and evaluate the content of this dfsms release along with practical implementation hints and tips this book also includes enhancements that are available by enabling ptf's that have been integrated into z os dfsms v1 13 this book was written for storage professionals and system programmers who have experience with the components of dfsms it provides sufficient information so that you can start prioritizing the implementation of new functions and evaluating their applicability in your dfsms environment information modelling and knowledge bases have become hot topics not only in academic communities concerned with information systems and computer science but also wherever information technology

applied in the world of business this book presents the proceedings of the 21st european japanese conference on information modelling and knowledge bases ejc 2011 held in tallinn estonia in june 2011 the ejc conferences provide a worldwide forum for researchers and practitioners in the field to exchange results and experiences achieved in computer science and related disciplines such as conceptual analysis design and specification of information systems multimedia information modelling multimedia systems software engineering knowledge and process management cross cultural communication and context modelling attention is also paid to theoretical disciplines including cognitive science artificial intelligence logic linguistics and analytical philosophy the selected papers 16 full papers 9 short papers 2 papers based on panel sessions and 2 on invited presentations cover a wide range of topics including database semantics knowledge representation software engineering information management context based information retrieval ontology image databases temporal and spatial databases document data management process management cultural modelling and many others covering many aspects of system modelling and optimization this book will be of interest to all those working in the field of information modelling and knowledge bases mental health is a growing field but one still limited by a lack of prior research and challenged by increased demand for new solutions and treatments mobile and web based technologies have the potent

fill some of the gaps advanced technological solutions for e health and dementia patient monitoring provides comprehensive coverage of issues in patient health and support from the perspectives of doctors nurses patients and caregivers with its focus on challenges and opportunities as well as future research in the field this book is a vital reference for researchers scholars advanced students software developers managers and stakeholders working at the forefront of e health systems this book discusses recent research and applications in intelligent service computing in mobile environments the authors first explain how advances in artificial intelligence and big data have allowed for an array of intelligent services with complex and diverse applications they then show how this brings new opportunities and challenges for service computing the book made up of contributions from academic and industry aims to present advances in intelligent services new algorithms and techniques in the field foundational theory and systems as well as practical real life applications some of the topics discussed include cognition modeling description and verification for intelligent services discovery recommendation and selection for intelligent services formal verification testing and inspection for intelligent services and composition and cooperation methods for intelligent services for more than 20 years network world has been the premier provider of information intelligence and insight for network and it executives responsible for the digitaljnewavgu

systems of large organizations readers are responsible for designing implementing and managing the voice data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce this volume encompasses many aspects of intelligent transportation technology bridge monitoring and maintenance road engineering and materials science volume is indexed by thomson reuters cpci s was the 67 peer reviewed papers are grouped into 3 chapters intelligent transportation technique bridge monitoring safety and maintenance advanced techniques in road engineering and materials science this book picks cisco as an example to propose a framework of ambidextrous integration of innovation and operation which is the key to the success of global companies along their evolutions especially for those technology companies the authors try to find how the company combines active innovation and efficient operation for its sustainable development on the basis of comprehensive analysis of the strategic leadership change management innovation system m as it enabled value chains collaboration etc in cisco as well as the interviews with cisco staff this book shows that management practices shape the balance of internal external resources for explorative exploitative innovations it strategies and implementation enable efficient operations when innovations are identified and justified in the leading company managerial insights for sustainable competitiveness can be gained from cisco practices in thisjbookgui

the companion of the book huawei from catching up to lead telling another growth path of technology company in china by similar framework this volume presents the results of bulgarian and international tourism research and brings together selected papers from the international conference tourism and innovations held in varna bulgaria in 2018 it contains theoretical and empirical approaches towards various aspects of tourism concerning both innovations in tourism development and in foreign languages education as a whole the book presents innovative solutions and processes in tourism including management and staff training provoked by today s opportunities and challenges for future tourism development the first part is dedicated to issues in tourism innovation ranging from those provoked from the changing global environment and tourism demand through to social innovations concerning tourism products and human resources management the second section of the book deals with traditions and innovations in foreign language education oriented to managers operational staff and decision makers in tourism deliver greater value to your organisation through hr transformation transforming hr second edition offers robust practical advice on changing the way human resource management is undertaken walking you through the transformational process from initial planning to the evaluation of outcomes since the first edition of the book many organisations have restructured their hr functions and invested in better hr information systems but wj

issues emerging all the time the journey towards transformation must continue to support this journey the authors draw on their own experience and insights in this new edition which features practical tools and approaches to guide planning implementation and evaluation of transformation strategies aimed at increasing the value of hr s contribution in organisations new chapters on hr s value proposition 2 0 and benefits realisation to demonstrate their critical role in transformation cutting edge research on topics such as the use of social media technology by hr with views and experience from senior practitioners across a broad range of organisations fresh thinking on the people agenda to be addressed by progressive hr functions intended as an inspiring hands on guide to planning implementing and evaluating transformation strategies transforming hr second edition is an essential companion as you work to increase the value of hr in your organisation technological advancements have extracted a vast amount of useful knowledge and information for applications and services these developments have evoked intelligent solutions that have been utilized in efforts to secure this data and avoid potential complex problems advances in secure computing internet services and applications presents current research on the applications of computational intelligence in order to focus on the challenge humans face when securing knowledge and data this book is a vital reference source for researchers lecturers professors students and developers who

interest in secure computing and recent advanced in real life applications this book constitutes the refereed proceedings of the 17th international conference on group decision and negotiation gdn 2017 held in stuttgart germany in august 2017 the field of group decision and negotiation focuses on decision processes with at least two participants and a common goal but conflicting individual goals research areas of group decision and negotiation include electronic negotiations experiments the role of emotions in group decision and negotiations preference elicitation and decision support for group decisions and negotiations and conflict resolution principles the 14 full papers presented in this volume were carefully reviewed and selected from 87 submissions they were organized in topical sections named general topics in group decision and negotiation conflict resolution emotions in group decision and negotiation negotiation support systems and studies and preference modeling for group decision and negotiation the book also contains two invited talks in full paper length tokelau is a group of three small coral atolls located in the south pacific the population of this tiny island nation is just under 1 500 and has been isolated from the rest of the world for centuries the people of tokelau have a unique polynesian identity and are connected to the ocean through their traditional ways of life including fishing and navigating the waters due to their remote location and small population the people of tokelau face java gui

challenges such as limited economic opportunities and a lack of access to resources and infrastructure however the government of tokelau has been working to improve the lives of its citizens through sustainable development projects and partnerships with neighboring countries tokelau is also a leader in renewable energy with plans to transition to 100 solar power despite its challenges tokelau remains a proud and vibrant community with a rich cultural heritage and close ties to the ocean this book provides one of the first interdisciplinary reviews of the relationship between services globalisation and trade liberalisation as we enter the twenty first century written by academics and policymakers it contains a detailed analysis of the characteristics of service trade and of recent and current service trade negotiations

Database Systems for Advanced Applications 2020-09-21

the 4 volume set lncs 12112 12114 constitutes the papers of the 25th international conference on database systems for advanced applications which will be held online in september 2020 the 119 full papers presented together with 19 short papers plus 15 demo papers and 4 industrial papers in this volume were carefully reviewed and selected from a total of 487 submissions the conference program presents the state of the art r d activities in database systems and their applications it provides a forum for technical presentations and discussions among database researchers developers and users from academia business and industry

Windows 2000 Advanced Server Technology Microsoft [????????] [????] 2003-03-01

this book is an in depth systematic and structured technical reference on 3gpp s lte advanced releases 10 and 11 covering theory technology and implementation written by an author who has been involved in the inception and development of these technologies for over 20 years the book not only describes the operation of individual components but also shows how they fit into the overall system and operate from a systems perspective uniquely this book gives in depth information on upper

protocol layers implementation and deployment issues and services making it suitable for engineers who are implementing the technology into future products and services reflecting the author's 25 plus years of experience in signal processing and communication system design this book is ideal for professional engineers researchers and graduate students working in cellular communication systems radio air interface technologies cellular communications protocols advanced radio access technologies for beyond 4g systems and broadband cellular standards an end to end description of lte lte advanced technologies using a top down systems approach providing an in depth understanding of how the overall system works detailed algorithmic descriptions of the individual components operation and inter connection strong emphasis on implementation and deployment scenarios making this a very practical book an in depth coverage of theoretical and practical aspects of lte releases 10 and 11 clear and concise descriptions of the underlying principles and theoretical concepts to provide a better understanding of the operation of the system's components covers all essential system functionalities features and their inter connections based on a clear protocol structure including detailed signal flow graphs and block diagrams includes methodologies and results related to link level and system level evaluations of lte advanced provides understanding and insight into the advanced underlying technologies in lte advanced up to and including release 11

mental health is a growing field but one still limited by a lack of prior research and challenged by increased demand for new solutions and treatments mobile and web based technologies have the potential to fill some of the gaps advanced technological solutions for e health and dementia patient monitoring provides comprehensive coverage of issues in patient health and support from the perspectives of doctors nurses patients and caregivers with its focus on challenges and opportunities as well as future research in the field this book is a vital reference for researchers scholars advanced students software developers managers and stakeholders working at the forefront of e health systems

Architecture as a Global System 2019-11-08

this book discusses recent research and applications in intelligent service computing in mobile environments the authors first explain how advances in artificial intelligence and big data have allowed for an array of intelligent services with complex and diverse applications they then show how this brings new opportunities and challenges for service computing the book made up of contributions from academic and industry aims

to present advances in intelligent services
new algorithms and techniques in the field
foundational theory and systems as well as
practical real life applications some of the
topics discussed include cognition modeling
description and verification for intelligent
services discovery recommendation and
selection for intelligent services formal
verification testing and inspection for
intelligent services and composition and
cooperation methods for intelligent services
