most common measures of competitive balance and the existing literature on the topic equipped with this knowledge the paper takes the reader on a recap of the european top leagues history with a focus on the competitive balance beginning in 1980 the final chapter then provides an econometric deep dive into the data for the bundesliga the commercialization of european football strongly accelerated in the early 1990s and brought tremendous revenue increases to the industry rapidly broadcasting revenues became the clubs main source of income some professional football leagues jointly sell their teams broadcasting rights as bundles and share the incomes with a certain degree of solidarity among them this study tries to find evidence for the positive impact of such revenue sharing agreements on the competitive balance in europe s strongest football leagues therefore a newly developed measure is applied which contains combined information about leagues absolute level of competitive balance as well as relative changes in standings over time the results of the study mainly speak in favor of an enhancement of solidarity among teams because of its positive impact on competitive balance and thus on a leagues attractiveness to customers the impressive collection of 18th century french paintings at the national gallery london includes important works by boucher chardin david fragonard watteau and many others this volume presents over seventy detailed and extensively illustrated entries that expand our understanding of these paintings comprehensive research uncovers new information on provenance and on the lives of identified portrait sitters humphrey wine explains the social and political contexts of many of the paintings and an introductory essay looks at the attitude of 18th century britons to the french as well as the market for 18th century french paintings then in london salerooms published by national gallery company distributed by yale university press ja93 features the complete works of kazuo shinohara and showcases his approach to post war japanese architecture starting with the 1954 house in kugayama to his posthumous and unbuilt house in tateshina project kazuo shinohara is known globally as an architect representative of japan s post war era and ja93 is devoted to his complete works most of his designs have been for private residences and many of the projects have been published in magazines and other media the manner in which his work was

represented was very important to him and he was known to be selective in choosing the photography diagrams and descriptions that were published. Shinohara previously collaborated on how his work was included in *Shinkenchiku* and *JA*. This issue combines this content into a complete works edition from the house in Kugayama in 1954 to his posthumous and unbuilt work of the house in Tateshina project. These projects showcase his approach towards architecture since his passing in 2006. Shinohara has been awarded with the special commemorative Golden Lion from the Venice Biennale and a series of retrospective exhibitions were held in China and the United States. among nurses as well as poor patient outcomes and satisfaction these results are consistent with what has been observed at southeastern hospital
