contemporary design first published in 2004 this text examines the politics of islam and the state of indonesia over recent decades during which time there has been a notable resurgence of islamic this title was first published in 2001 rigging elections in favour of those in power has become a common practice in bangladesh muhammad yeahia akhter focuses on the significance of elections in this ostensibly democratic state and portrays how electoral corruption has damaged the process of democratic consolidation the author reveals the failure of both civilian and military governments to obtain democratic legitimacy and or credibility through free and fair elections the study examines the relatively democratic but largely non transparent nature of electioneering under non partisan caretaker governments the study provides a source of understanding of fair electoral process for the politicians and electoral officials in bangladesh and other democratizing polities it provides valuable information to the policy makers and practitioners in order to reform the electoral process in bangladesh and in other similar countries the ministry of defence does not comment upon submarine anthony arnull alan dashwood franklin dehouse hans ulrich jessurun d oliveira and laurens jan brinkhorst and some twenty other essays offering the reflections and criticisms of leading academics in the field as well as the unique insights of contributors working within the community institutions john turner examines the way in which the issue of europe has led to a schism within the conservative party contributing to the party s election defeat in 1997 and how issues of sovereignty and federalism continue to preoccupy the party between 1941 and 1944 waffen ss Oberscharführer sergeant werner kindler took part in 84 days of close combat qualifying him for the close combat clasp in gold the third reich s highest decoration for a frontline soldier he was also awarded the german cross in gold the iron cross first and second class and the wound badge in gold drafted into the ss totenkopf in 1939 he served with a motorised unit in poland and in may 1941 was selected for the leibstandarte ss adolf hitler with which he fought in the invasion of the soviet union his unit converted to a panzer grenadier formation in 1942 and kindler went on to fight at kharkov and kursk on the eastern front and later in belgium and france in 1944 at the end of the war he was the last man of the leibstandarte ss to surrender to the americans this is one of the most dramatic first hand accounts to come out of the second world war the expansion of married women s property rights was a main achievement of the first wave of feminism in latin america as carmen diana deere and magdalena leon reveal however the disjuncture between rights and actual ownership remains vast this is particularly true in rural areas where the distribution of land between men and women is highly unequal in their pioneering twelve country comparative study the authors argue that property ownership is directly related to women s bargaining power within the household and community point out changes resulting from recent gender progressive legislation and identify additional areas for future reform including inheritance rights of wives of all the states of the former soviet union it is in latvia and in kazakhstan that titular latvian kazak culture can serve as a consolidating ele selected by choice magazine as an outstanding academic title the intelligence community s flawed assessment of iraq s weapons systems and the bush administration s decision to go to war in part based on those assessments illustrates the political and policy challenges of combating the proliferation of weapons of mass destruction in this comprehensive assessment defense policy specialists jason ellis and geoffrey kiefer find disturbing trends in both the collection and analysis of intelligence and in its use in the development and implementation of security policy analyzing a broad range of recent case studies pakistan s development of nuclear weapons north korea s defiance of u n watchdogs russia s transfer of nuclear and missile technology to iran and china s to pakistan the soviet biological warfare program weapons inspections in iraq and others the authors find that intelligence collection and analysis relating to wmd proliferation are becoming more difficult that policy toward rogue states and regional allies requires difficult tradeoffs and that using military action to fight nuclear proliferation presents intractable operational challenges ellis and kiefer reveal that decisions to use or overlook intelligence are often made for starkly political reasons they document the bush administration s policy shift from nonproliferation which emphasizes diplomatic tools such as sanctions and demarches to counterproliferation which at times employs interventionist and preemptive actions they conclude with cogent recommendations for intelligence services and policy makers this authoritative account details the doggedly persistent work of the unscom united nations special commission on iraq which has during the past eight years in the face of continued iraqi deception gradually uncovered more and more of the scope of the iraqi chemical and biological weapons programmes and established an ongoing monitoring and verification regime vital lessons are drawn for international security and for the

strengthening of the non proliferation regimes for both chemical and biological weapons the international monetary fund has been criticised from both the right and the left of the political spectrum with the right arguing that it is too interventionist and creates more problems than it solves and the left on occasion demanding that it be abolished altogether what seems almost beyond question is that the imf needs to be reformed defining a future role for the imf will always be a controversial issue but vital to any considerations will be a measured assessment of how it has operated in the past this excellent new book from an internationally respected expert on the imf intends to do just that starting with an historical background tracing the evolution of the imf the book goes on to cover such themes as the circumstances under which countries turn to the imf the various aspects of imf conditionality institutional issues such as lending facilities and how the fund is resourced bringing together an array of articles this excellent new book will undoubtedly be required reading for anyone with a serious interest in development studies as well as being an eye opening read for policy makers involved with the imf this thoroughly researched book reveals the true identity of the modern israeli israelis are unique in having changed their identity three times in only one hundred mere couleur locale to forge a creative synthesis of the indigenous and the western his vast oeuvre encompasses every genre from opera and ballet to chamber music orchestral works and song but he is also a fine essayist and his short fiction has received praise from andré p brink this is the first study of its kind to be devoted to a south african composer praise for previous edition a comprehensive meticulously researched study of contemporary international law governing the use of armed force in international relations andrew garwood gowers queensland university of technology law review volume 12 2 when this first english language edition of the law against war published it quickly established itself as a classic detailed analytically rigorous and comprehensive it provided an indispensable guide to the legal framework regulating the use of force now a decade on the much anticipated new edition brings the work up to date it looks at new precedents arising from the arab spring the struggle against the islamic state in iraq and syria and the conflicts in ukraine and yemen it also reflects the new doctrinal debates surrounding recent state practice previous positions are reconsidered and in some cases revised notably the question of consensual intervention and the very definition of

force particularly to accommodate targeted extrajudicial executions and cyber operations finally the new edition provides detailed coverage of the concept of self defense reflecting recent interpretations of the international court of justice and the ongoing controversies surrounding its definition and interpretation almost a half century has passed since the inception of the people's republic of china in that time a charismatic leader has ruled and died leaving a wake of destruction in his quest to transform china in that time too the prc's most powerful ally and mentor the soviet union has dismantled and announced that jcmunism had failed today china fluctuates between tradition and modernity ideology and pragmatism between an antiquated collectivist ethic and a new spirit of individualism it is a country precariously suspended between past and future maria hsia chang's *the labors of sisyphus* is a long overdue reassessment of the meaning and purpose of the chinese communist revolution in it she discusses the thought of mao zedong and deng xiaoping reform and its dilemmas regionalism in greater china and autonomous areas and nationalism she also examines china's immediate present and uncertain future if it manages to transform economic growth into development china filled with natural resources and a large capable labor force has the potential to become a world superpower it could also collapse under the weight of its own problems regionalism a flawed state sector corruption and a pronounced decline in state capacity if china succeeds an imposing new economic power will enter the global stage one that is often arbitrary and prone to despotism and xenophobia unless it is tempered by political reform prior accounts of communist china have failed to capture china's evolving present in all its complexity and variety misrepresenting maoist china in the process information shortfall was partly to blame as recently as august 1994 the chinese government itself decried falsification of statistics by government officials and cadres sinologists in the 1960s and 1970s had to approach analysis of contemporary china with clear recognition of the limitations involved and the questionable validity of the factual sources available maria hsia chang lends structure meaning and purpose to the very complex recent political and historical past of communist china with greater access to more accurate information chang is able to analyze objectively without political motive or intention providing readers with a fresh look at the people's republic her pathbreaking work will be of interest to scholars of international economics and politics sinologists and historians
