*The High Calling* 1860 from the day of his birth his grandfather was certain that alessio salsano would become a doctor to become a physician was to reach the pinnacle of success to achieve the ultimate goal as soon as his tiny hands could hold on to things his father made sure he held books on science and medicine now dr salsano takes you on a journey through the life of a physician telling of his italian heritage and upbringing as a child he shares the details of establishing medicine as his career goal and his early search for life s meaning as he learned to embrace evangelical christianity this book chronicles medical school falling in love and the welding together of faith and science it tells how dr salsano came to reside in virginia beach where he started a private practice and describes a personal revival of faith and how it impacted his practice of medicine revealing some of the most fascinating and trying times he has experienced in medicine dr salsano speaks to the medical student seeking this spiritually taxing career encouraging the reader with inspiring stories he shows how combining science and faith in the everyday practice of medicine may be risky but it is necessary to becoming a great doctor it s a story of sacrifice lawsuits and testing of morals and ethics learn how one doctor nearly lost all confidence in his ability to help people but fought the urge to flee and stayed to fight with god s help he chose the high calling

*The Christian Physician; Or, Reasons why the Physician Should be a Follower of Christ* 2005-04-01 i had always believed in the healing power of our lord and viewed my life as one of service to him via the practice of medicine but in retrospect i had a deeper trust in the power of modern medicine and science than i did in jesus christ and his fully accomplished work on the cross my thinking was flawed but as i grew in my walk with the lord and meditated on scripture more fully i began to see the superiority of faith over the limited interventions modern medical science had to offer and that this interplay between faith and science was not mutually exclusive but complimentary for the spiritual aspects of our lives illuminate and empower the carnal aspects of intellect and physical senses i began jotting notes to myself related to this interplay of faith and healing and science and just filed them away for years then in december of 2017 a baby was born to a first time mother of mine his little body riddled with the most fulminant form of acute lymphoblastic leukemia almost always fatal his absolutely miraculous healing was the impetus to start putting these thoughts into writing in the form of weekday morning emails entitled a christian doctor s view of healing faith and science it was soon made clear to me that these writings were to take the form of a year long devotional book comprised of short weekday messages that are intimately linked such that they can be read through as a book and that book was to paint a picture and that picture was to be of a face and the face was to be that of jesus for he is the source of all healing

*Practice by the Book* 2020-05-27 being a doctor and going to the doctor are theological issues a major thesis of the book is that a de medicalization of physicians is necessary and should be replaced by a scripto centric approach to life in the practice of medicine this call is radical humanly speaking but we have a god who has given much to us as christian physicians and expects much of us there is a biblical view of the practice of medicine and it is the major avenue that patients have for reaching true comfort and help each physician must be able to articulate it and the book is written for that purpose a rightly understood biblical view of medicine is the only way that doctors have for giving genuine hope to hurting people and for the advancement of god s kingdom

*Musings of a Christian Physician on the Physical and Spiritual Healing of Man* 2002-06-01 in this classic daily devotional a nineteenth century christian physician provides honest answers to tough questions about suffering the nature of god finding joy in life and more

**Life Secrets** 2013-04 biblical answers on how to establish god s kingdom through your medical practice and serve others just as jesus did

Confessions of a Christian Physician 2020-03-13 while the old fashioned doctor had little trouble relating religion to his practice by means of pious behavior the modern doctor is perplexed as to what difference religion makes in medical practice or what difference it ever did make like many moderns he finds religion if he has it something apart from life itself removed from occupational realities he does not understand how christian faith should affect the choice or conduct of an occupation to let religion affect occupational decisions seems to many to be a dubious mixing of religion and business and pious behavior in a professional setting seems artificial and unreal at many places in the following discussion it would seem that the christian doctor does not differ from the non believer in the everyday practice of his profession the physician in this portrait is the modern informed man of good will it is implied that he is a bit more perceptive of issues more philosophical more disciplined more aware of how all actions are morally ambiguous and alert to how pride destroys perspective but in this book the christian doctor is shown as shrinking from the claim that his faith distinguishes him from the agnostic or atheist in the practice of medicine the image which emerges is one of a believing and perhaps even beloved physician whose characteristic disclaimer is like that of our lord why callest thou me good a christian faith that can relate itself to modern life must speak the language of the new modern doctor it will not be heard if it urges a return to the expression of christian piety that captured the public imagination in former years the following is a begin where you are approach which attempts to say there are spiritual dimensions to the doctor s job sense them cultivate them deepen your insights as a physician and you will find that you are not far from the kingdom let no one suggest that the christian depicted in these pages is a mildly convinced ambivalent inarticulate believer and yearn for a volume entitled a doctor succeeds through prayer this is an exploratory inductive study to lead readers into the fruitful pilgrimage of faith in contact with vocation itself which can result in a real synthesis of religion and life it is offered in an earnest effort to help all physicians feel out the spiritual contours of their own vocation preface

*Following the Great Physician: A Doctor's Guide to Trusting God and Serving Patients* 1960 a christian and a doctor the author saw a need for a guidebook for other christian doctors to help merge their faith and their medical practice christian physicians have a hard time being evangelical about their faith within their professional lives patients of these christian doctors are not sure how their faith is supposed to be considered in their medical treatment plan both doctors and patients have abandoned any mention of christianity within medical offices every christian doctor should be bold within and outside of the medical office thus allowing christian patients to share their beliefs with their doctor who shares the same faith this book provides the reasons to do so from a biblical standpoint as well as from the more formal evidence based medicine that doctors are taught to rely on when making a medical decision this guidebook shows how to incorporate christianity into the medical office on all levels ranging from office staff to treatment plans it is also meant to be a guide for christian patients who want their doctors to include their faith in their patient doctor relationship this book has been written to elevate the relationship shared by the doctor and patient both doctor and patient being in christ have a crucial role and responsibility to each other in the doctor patient relationship this book is meant to expand the consciousness of the christian medical community

The Christian as a Doctor 1829 this history of evangelical faith healing in nineteenth century america examines the nation s shifting attitudes about sickness suffering and health faith in the great physician tells the story of how participants in the divine healing movement transformed the ways americans coped with physical affliction and pursued bodily wellbeing heather d curtis offers critical reflection on the theological cultural and social forces that come into play when one questions the purpose of suffering and the possibility of healing belief in divine healing ran counter to a deep seated christian ethic that linked physical suffering with spiritual holiness by engaging in devotional disciplines and participating in social reform efforts proponents of faith cure embraced a model of spiritual experience that endorsed active service rather than passive endurance as the proper christian response to illness and pain emphasizing the centrality of religious practices to the enterprise of divine healing curtis sheds light on the relationship among christian faith medical science and the changing meanings of suffering and healing in american culture recipient of the frank s and elizabeth d brewer prize of the american society of church history for 2007

**Ideals in Medicine** 2012-11-12 being a doctor and going to the doctor are theological issues a major thesis of the book is that a de medicalization of physicians is necessary and should be replaced by a scripto centric approach to life in the practice of medicine this call is radical humanly speaking but we have a god who has given much to us as christian physicians and expects much of us there is a biblical view of the practice of medicine and it is the major avenue that patients have for reaching true comfort and help each physician must be able to articulate it and the book is written for that purpose a rightly understood biblical view of medicine is the only way that doctors have for giving genuine hope to hurting people and for the advancement of god s kingdom

**The Christian Physician** 1829 everyone needs a doctor at some time even if it is just to sign a death certificate this book is written with a view of jesus christ as not only a physician but the greatest physician who ever lived thirty seven miracles are recorded in the gospels and as mary fairchild says none were performed randomly for amusement or for show each was accompanied by a message and either met a serious human need or confirmed christ s identity and authority as the son of god having been a doctor for over forty years i have viewed the healing miracles of the lord jesus in the gospels under medical categories as seen from a modern classification of disease not every miracle is therefore included only those i see in a category of disease or medical specialty i have added some relevant thoughts at times relevant to the miracle the review is limited to the four gospels although in the first chapter of the acts of the apostles the physician luke tells us that in his gospel he recorded the things that jesus began both to do and teach until the day in which he was taken up verses 1 2 to heaven he thus infers that jesus is still doing and teaching through his apostles in the book of acts two of these are mentioned briefly in the book the chapters have been arranged in chronological order rather in order of any perceived importance

**Dialogue between a Sceptical Physician and his Christian Patient** 2013-10 or lord referred to his work as that of the physician healing all manner of disease applies to the spiritual as well as the mental and physical our business is of bringing the sin sick face to face with the one healer to do this demands some knowledge of his methods and these are most radiantly revealed in the records of his early ministry from the foreword

*The Least Among Thee* 2012-05 the concept of the physician priest is an ancient one existing pre christianity and historic references to the role can be found within the majority of religions and across all continents however despite a growing body of scientific evidence indicating the value of spirituality the 20th century medical profession within the western world has placed religion at arm s length effectively excluding such discussion from the medical consultation referring to both primary and secondary sources within theological medical legal historic and philosophical literature robert puts forward an argument in support of a 21st century role for the physician priest he argues that if the physician can exercise the role of priest in addition to their medical role they can thereby truly minister to the whole person in terms of mind body and soul with

consideration of modern nhs funding streams robert suggests a radical proposal whereby the church of england and medical educational institutions might combine to offer dual theological and medical training the result would establish a new breed of professional person ideally positioned in respect to the care of the elderly and those with terminal illness the healing enigma suggests that this not only assists with the provision of whole person care but also allows the church to firmly re establish itself in the 21st century within its christian healing tradition
