over several decades scholarship in new testament and early christianity has drawn attention both to the ways in which ancient mediterranean conceptions of embodiment sexual difference and desire were fundamentally different from modern ones and also to important lines of genealogical connection between the past and the present the result is that the study of gender and sexuality in early christianity has become an increasingly complex undertaking this is a complexity produced not only by the intricacies of conflicting historical data but also by historicizing approaches that query the very terms of analysis whereby we inquire into these questions in the first place yet at the same time recent work on these topics has produced a rich and nuanced body of scholarly literature that has contributed substantially to our understanding of early christian history and also proved relevant to ongoing theological and social debates the oxford handbook of gender and sexuality in the new testament provides a roadmap to this lively scholarly landscape introducing both students and other scholars to the relevant problems debates and issues leading scholars in the field offer original contributions by way of synthesis critical interrogation and proposals for future questions hypotheses and research trajectories

are good and bad outcomes significantly affected by the decision making process itself indeed they are in that certain decision making techniques and practices limit the ability of policymakers to achieve their goals and advance the national interest the success of policy often turns on the quality of the decision making process mark schaffer and scott crichlow identify the factors that contribute to good and bad policymaking such as the personalities of political leaders the structure of decision making groups and the nature of the exchange between participating individuals analyzing thirty nine foreign policy cases across nine administrations and incorporating both statistical analyses and case studies including a detailed examination of the decision to invade iraq in 2003 the authors pinpoint the factors that are likely to lead to successful or failed decision making and they suggest ways to improve the process schaffer and crichlow show how the staffing of key offices and the structure of central decision making bodies determine the path of an administration even before topics are introduced additionally they link the psychological characteristics of leaders to the quality of their decision processing there is no greater work available on understanding and improving the dynamics of contemporary decision making

although the kyoto protocol an international agreement to address global climate change has been regarded by many as an unsuccessful treaty both politically and environmentally it stands as one of the world s few truly global agreements why did such a diverse group of countries decide to sign and or ratify the treaty why did they choose to do so at different times and in different ways what explains their foreign policy behavior amy below s book builds off the increasing significance of climate change and uses the kyoto protocol as a case study to analyze foreign policy decision making in latin america below s study takes a regional perspective in order to examine why countries in latin america made disparate foreign policy choices when they were faced with the same decision the book looks at the decisions in argentina mexico and venezuela via a process tracing method below uses information obtained from primary and secondary documents and elite interviews to help reconstruct the processes and augments her reconstruction with a content analysis of conference of the parties speeches by presidents and country delegates the book complies with convention in the field by arguing

that systemic national and individual level factors simultaneously impact foreign policy decisions but makes the additional claim that role theory most accurately accounts for relationships between variables environmental politics and foreign policy decision making in latin america considers a variety of factors on individual national and international levels of analysis and show that the foreign policy decisions are best viewed through the prism of role theory the book also draws conclusions about the value of role theory in general and about environmental foreign policy decisions in developing countries which will be of value to both policy makers and academics

scientific research is often influenced by financial interests political interests or personal career interests of the scientists involved for instance the pharmaceutical giant merck manipulated clinical trial data in order to make sure that data confirmed the safety of one of its products viox in order to serve the company s short term commercial interests this case is obviously unacceptable but why exactly is it unacceptable one way to account for this judgment is on the basis of the ideal of purity according to this ideal scientific decision making should be pure that is unaffected by financial interests political interests career interests and so on although this ideal is questionable many people including philosophers of science still hold on to it in interests and epistemic integrity in science a new framework to assess interest influences in scientific research processes jan de winter first argues that it is better to fully abandon the ideal of purity then proposes an alternative ideal to assess interest influences in science the ideal of epistemic integrity he spells out and systematically defends a new concept of epistemic integrity using it not only to analyze the viox debacle but also to identify unacceptable interest influences in aerospace science climate science and biology and to explain exactly why these interest influences are unacceptable these analyses make a compelling case for the new concept of epistemic integrity which will be interesting and useful for philosophers of science scientists engineers science policymakers and anyone else concerned about the integrity of science
