for the first time the discipline of modern inorganic chemistry has been systematized according to a plan constructed by a council of editorial advisors and consultants among them three nobel laureates e o fischer h taube and g wilkinson rather than producing a collection of unrelated review articles the series creates a framework which reflects the creative potential of this scientific discipline thus it stimulates future development by identifying areas which are fruitful for further research the work is indexed in a unique way by a structured system which maximizes its usefulness to the reader it augments the organization of

the work by providing additional routes of access for specific compounds reactions and other topics

The Pocket Calorie Counter, 2013 Edition **2012-12-10**

mirroring the growth and direction of science for a century the handbook now in its 93rd edition continues to be the most accessed and respected scientific reference in the world an authoritative resource consisting tables of data its usefulness spans every discipline this edition includes 17 new tables in the analytical chemistry section a major update of the CODATA recommended values of the fundamental physical constants and updates to many other tables the book puts physical formulas and mathematical tables used in labs every day within easy reach the 93rd edition is the first edition to be available as an ebook
