mechatronics is a synergic discipline integrating precise mechanics electrotechnics electronics and it technologies the main goal of mechatronical approach to design of complex products is to achieve new quality of their utility value at reasonable price successful accomplishment of this task would not be possible without application of advanced software and hardware tools for simulation of design technologies and production control and also for simulation of behavior of these products in order to provide the highest possible level of spatial and functional integration of the final product this book brings a review of the current state of the art in mechatronics as presented at the 8th international conference mechatronics 2009 organized by the brno technical university faculty of mechanical engineering czech republic the specific topics of the conference are modelling and simulation metrology diagnostics sensorics photonics control robotics mems design mechatronic products production machines and biomechanics the selected contributions provide an insight into the current development of these scientific disciplines

present the new results of research and development and indicate the trends of development in the interdisciplinary field of mechatronic systems therefore the book provides the latest and helpful information both for the r d specialists and for the designers working in mechatronics and related fields

childhood hearing loss is more common than most people assume and yet this invisible condition can rob a child of the ability to develop close emotional relationships with family and friends this book demystifies this condition and offers emotionally supportive approaches to caring for the child and the whole family it is written from the perspective of a pediatric audiologist who has diagnosed hearing loss in hundreds of newborns and young children and who has shaped clinical best practices during his career hearing loss is not an all or nothing condition but a range from very subtle slight challenges to very little ability to hear the impact that hearing loss can have on a child s language intellectual social and emotional development is enormous but when the team of healthcare providers developmental specialists and parents are all working together the hearing loss can become just another trait of this wonderful unique child rather than the single condition that defines the child and the family s experience raising that child this book offers an explanation of what is hearing loss for parents describes who is on the team working with the child and team members roles and practical guidance for navigating what can be an uncertain path for families any family living with a child with hearing loss will benefit from the gentle guidance and hopeful stories found in this work
