2015 11 1

the dead volume of a chromatography system is defined by the international union of pure and applied chemistry iupac 1 as an obsolete term equal to the mobile phase volume that solutes experience outside of the column equivalent to the extracolumn volume

2023 9 13

what is dead volume dead volume is essentially the areas within an hplc system your analytes could get trapped and reside in harming the chromatographic efficiency of your separation this volume comes from multiple components and encompasses voids found in your fittings connections column and instrument design
