straight from the classic era of american high performance cars today s rarest priciest and most highly

sought after muscle cars are also the least practical these are the striking convertibles of the 1960s and 1970s that were optioned out for drag racing wide open muscle showcases these rare cars and proves that sometimes it pays to throw practicality out the window in order to make something purely cool and fun to drive at the peak of drag racing popularity it was common knowledge that racers needed the lightest most rigid framed cars available convertibles represent the exact opposite of that description so it s amazing that these drop tops ever emerged amid the circle of full throttle dragsters while typical convertible drivers cruised around listening to the latest lovin spoonful release in the eight track tape deck these muscle car convertibles were equipped for rock n roll speed these topless muscle cars are so rare because few people had the dedication or money to buy a vehicle this impractical they re valuable because they represent the absolute extreme of the entire muscle car genre all the cars in wide open muscle are shot in similar fashion studio style with a black background using a process known as light painting it is the ultimate portrayal of the ultimate muscle cars
