American Jobs and Manufacturing Preservation Act of 1991 1992 america confronts a jobs crisis that has two faces the first is obvious when we read the newspapers or talk with our friends and neighbors there are simply not enough jobs to go around the second jobs crisis is more subtle but no less serious far too many jobs fall below the standard that most americans would consider decent work a quarter of working adults are trapped in jobs that do not provide living wages health insurance or much hope of upward mobility the problem spans all races and ethnic groups and includes both native born americans and immigrants but good jobs america provides examples from industries ranging from food services and retail to manufacturing and hospitals to demonstrate that bad jobs can be made into good ones paul osterman and beth shulman make a rigorous argument that by enacting policies to help employers improve job quality we can create better jobs and futures for all workers good jobs america dispels several myths about low wage work and job quality the book demonstrates that mobility out of the low wage market is a chimera far too many adults remain trapped in poor quality jobs osterman and shulman show that while education and training are important policies aimed at improving earnings equality are essential to lifting workers out of poverty the book also demolishes the myth that such policies would slow economic growth the experiences of countries such as france germany and the netherlands show that it is possible to mandate higher job standards while remaining competitive in international markets good jobs america shows that both government and the firms that hire low wage workers have important roles to play in improving the quality of low wage jobs enforcement agencies might bolster the effectiveness of existing regulations by exerting pressure on parent companies enabling effects to trickle down to the subsidiaries and sub contractors where low wage jobs are located states like new york have already demonstrated that involving community and advocacy groups such as immigrant rights organizations social services agencies and unions in the enforcement process helps decrease workplace violations and since better jobs reduce turnover and improve performance career ladder programs within firms help create positions employees can aspire to but in order for ladder programs to work firms must also provide higher rungs the career advancement opportunities workers need to get ahead low wage employment occupies a significant share of the american labor market but most of these jobs offer little and lead nowhere good jobs america reappraises what we know about job quality and low wage employment and makes a powerful argument for our obligation to help the most vulnerable workers a core principle of u s society is that good jobs be made accessible to all this book proposes that such a goal is possible if we are committed to realizing it

Save American Jobs Act 1992 what is it like to do the back breaking work of immigrants to find out gabriel thompson spent a year working alongside latino immigrants who initially thought he was either crazy or an undercover immigration agent he stooped over lettuce fields in arizona and worked the graveyard shift at a chicken slaughterhouse in rural alabama he dodged taxis not always successfully as a bicycle delivery boy for an upscale manhattan restaurant and was fired from a flower shop by a boss who he quickly realized was nuts as one coworker explained these jobs make you old quick back spasms occasionally keep thompson in bed where he suffers recurring nightmares involving iceberg lettuce and chicken carcasses combining personal narrative with investigative reporting thompson shines a bright light on the underside of the american

The War on Normal People 2018-04-03 today many americans regard globalization as a significant threat to our work force and to our very way of life as unemployment soars the american automotive and manufacturing industries crumble countless jobs continue to ship overseas and the retail sector faces the worst slump in decades cries of buy american have grown louder and louder in our communities in the headlines and in the halls of washington but at a time when an italian company has bailed out one of our oldest and most iconic automakers a french german consortium is closing in on a multibillion dollar military contract to build our tanker planes and helicopters companies based everywhere from switzerland to india to belgium are stocking our grocery aisles and the assets of some of our most venerable financial institutions have been stripped down and bought up by banks from hong kong and london what does buy american mean any more that said there is a great deal of discomfort about the influence that foreign companies are exerting on our economy are they making us more competitive in the global marketplace or less are they creating jobs for americans or importing their own workforces are they a threat to our national security or are they bringing us technology that actually makes us safer when they open plants and factories on our shores are they siphoning money from our economy or bolstering it in welcoming their investments are we as some critics contend selling our economy to the highest bidder in the selling of the american economy new york times senior business correspondent micheline maynard argues that despite the lingering xenophobia that colors american perception of foreign owned companies foreign investments are actually an overwhelmingly positive force not only do they create thousands of jobs and pump billions of dollars into national and local economies she says they reinvigorate and strengthen communities foster innovation and diversity in the marketplace and teach americans new ways to live and work at a time when our most cherished home grown institutions still reeling from the financial crisis are downsizing shuttering plants and factories and filing for bankruptcy the need for foreign investment has never been greater in this compelling narrative maynard shows that if we are in fact selling our economy to the highest bidder this may be very good news for america through moving stories of workers whose lives have been transformed by the arrival of companies like toyota airbus and tata probing interviews with a host of government officials and local leaders who have fought to lure foreign companies to their communities and states and revealing conversations with both american and foreign executives including a rare and hard won visit with toyota s elusive young new president maynard paints a fascinating portrait of the paradigm shift that is transforming the american economy and remaking the american dream

The Betrayal of Work 2011-05-10 this book is a welcome reassertion of an old tradition of interdisciplinary research that tradition has tended to atrophy in the last decade largely because of an enormous expansion of the domain of neoclassical economics the expansion has fed on two scientific developments first human capital theory second contract theory both developments have taken phenomena critical to the operation of the economy but previously understood in terms of categories separate and distinct from those with which economists generally work and sought to apply the same analytical techniques that we use to understand other economic problems human capital theory has applied conventional techniques to questions of labor supply it began this endeavor with the supply of trained labor and then expanded to a general theory of labor supply by broadening the analysis to the allocation of time over the individual s life the interdependencies of supply decisions within the family and finally to the formation of the family itself similarly contract theory has moved from a theory that explains the existence of classical economic institutions to a theory of their formation and internal operation the hallmark of

both of these developments is the extension and application of analytical techniques based on purposive maximization under constraints and the interaction of individual decision makers through a competitive market or its analogue

Take This Job and Ship It 2015-06-09 john d kasarda by all accounts the united states has led the world in job creation during the past 20 years its economy added nearly 40 million jobs while the combined european economic community added none since 1983 alone the u s generated more than 15 million jobs and its unemployment rate dropped from 7.5 percent to approximately 5 percent while the unemployment rate in much of western europe climbed to double digits even japan's job creation record pales in comparison to the united states with its annual employment growth rate less than half that of the

united states over the past 15 years 0.8 percent vs 2 percent yet as the u.s. economy has been churning out millions of jobs annually conflicting views and heated debates have emerged regarding the quality of these new jobs and its implications for standards of living and u.s. economic competitiveness many argue that the great american job machine is a mirage or grand illusion rather than adding productive secure well paying jobs most new employment critics contend consists of poverty level dead end service sector jobs that contribute little or nothing to the nation's productivity and international competitiveness much of the blame is placed on reagan bush policies that critics say undermine labor unions encourage wasteful corporate restructuring foster exploitative labor practices and reduce fiscal support for education and needed social services

Supporting American Jobs and the Economy Through Expanded Energy Production 2017-12-11 for decades the idea that more education will lead to greater individual and national prosperity has been a cornerstone of developed economies indeed it is almost universally believed that college diplomas give americans and europeans a competitive advantage in the global knowledge wars challenging this conventional wisdom the global auction forces us to reconsider our deeply held and mistaken views about how the global economy really works and how to thrive in it drawing on cutting edge research based on a major international study the authors show that the competition for good middle class jobs is now a worldwide competition an auction for cut priced brainpower fueled by an explosion of higher education across the world they highlight a fundamental power shift in favor of corporate bosses and emerging economies such as china and india a change that is driving the new global high skill low wage workforce fighting for a dwindling supply of good jobs will compel the middle classes to devote more time money and effort to set themselves apart in a bare knuckle competition that will leave many disappointed the authors urge a new conversation about the kind of society we want to live in and about the kind of global economy that can benefit workers but without condemning millions in emerging economies to a life of poverty the global auction is a radical rethinking of the ideas that stand at the heart of the american dream it offers a timely exposé of the realities of the global struggle for middle class jobs a competition that threatens the livelihoods of millions of american and european workers and their families

The Selling of the American Economy 2009-10-20 in spite of the existence of statistics and numerical data on various aspects of african american life including housing earnings assets unemployment household violence teen pregnancy and encounters with the criminal justice system social science literature on how racism affects the everyday interactions of african american

For Jobs and Freedom 2014-04-23 the literature on rural america to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns as a result the real rural america remains much misunderstood neglected or ignored by scholars and policymakers alike in response emery castle offers the changing american countryside a volume that will forever change how we look at this important subject castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands these authors examine the role of non metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty industry the environment education family social problems ethnicity race religion gender government public policy and regional diversity the authors are especially effective in demonstrating why rural america is so much more than just agriculture it is in fact highly diverse complex and interdependent with urban america and the international market place most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections to do so is misguided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural together these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life
