examine national practices and laws regarding systematic government access to personal information held by private sector companies leading an effort sponsored by the privacy projects they commissioned a series of country reports asking national experts to uncover what they could about government demands on telecommunications providers and other private sector companies to disclose bulk information about their customers their initial research found disturbing indications of systematic access in countries around the world these data collection programs often undertaken in the name of national security were cloaked in secrecy and largely immune from oversight posing serious threats to personal privacy after the snowden leaks confirmed these initial findings the project morphed into something more ambitious an effort to explore what should be the rules for government access to private sector data and how companies should respond to government demands for access this book contains twelve updated country reports plus eleven analytic chapters that present descriptive and normative frameworks for assessing national surveillance laws survey evolving international law and human rights principles applicable to government surveillance and describe oversight mechanisms it also explores the concept of accountability and the role of encryption in shaping the surveillance debate cate and dempsey conclude by offering recommendations for both governments and industry the php quick scripting reference is a condensed scripting code and syntax reference to the php scripting systems of large organizations readers are responsible for designing implementing and managing the voice data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce this book investigates the changing opportunities in higher education for different social groups during china s transition from the socialist regime to a market economy the first part of the book provides a historical and comparative analysis of the development of the idea of meritocracy since its early origins in china and in more recent western thought the second part then explores higher education reforms in china the part played by supposedly meritocratic forms of selection and the implications of these for social mobility based on original empirical data ye liu sheds light on the socio economic gender and geographical inequalities behind the meritocratic façade of the gaokao ⁇ ⁇ liu argues that the chinese philosophical belief in education based meritocracy had a modern makeover in the gaokao and that this ideology induces working class and rural students to believe in upward social mobility through higher education when the gaokao broke the promise of status improvement for rural students they turned to the chinese communist party and sought political connections by actively applying for its membership this book reveals a bleak picture of visible and invisible inequality in terms of access to and participation in higher education in contemporary china written in an accessible style it offers a valuable resource for researchers and non specialist readers alike early christianity saw women in positions of authority and a fluid theology that included feminine figures in the notion of the divine however for centuries a male trinity has dominated theology with the characteristics of triumphalism clarity order eternality and unity unconventional wisdom examines the attempt within the last half of the twentieth century to unearth the hidden theological tradition of feminine wisdom the book presents the work of influential theorists notably foucault belenky and dorothy smith the recovery of the feminine in the divine is linked with the rediscovery of subjugated value systems and what this might mean for ecclesiology is more government aid needed who will pay for care of aging early christianity saw women in positions of authority and a fluid theology that included feminine figures in the notion of the divine however for centuries a male trinity has dominated theology with the characteristics of

triumphalism clarity order eternality and unity unconventional wisdom examines the attempt within the last half of the twentieth century to unearth the hidden theological tradition of feminine wisdom the book presents the work of influential theorists notably foucault belenky and dorothy smith the recovery of the feminine in the divine is linked with the rediscovery of subjugated value systems and what this might mean for ecclesiology
