modern tax administrations seek to optimize tax collections while minimizing administration costs and taxpayer compliance costs experience shows that voluntary compliance is best achieved through a system of self assessment many tax administrations have introduced self assessment principles in the income tax law but the legal authority is not being consistently applied they continue to rely heavily on desk auditing a majority of tax returns while risk management practices remain largely underdeveloped and or underutilized there is also plenty of opportunity in many countries to enhance the design and delivery of client focused taxpayer service programs and better engage with the private sector and other stakeholders

china weathered the global financial crisis better than most thanks to a large and timely stimulus this stimulus however was mainly in the form of off budget infrastructure spending and thus not visible in the headline fiscal data we construct a time series for the augmented fiscal deficit and debt augmented to include off budget activity that better illustrates the counter cyclical role of fiscal policy the results also show that the augmented fiscal deficit and debt are both considerably higher than the headline government data suggest nonetheless at around 45 percent of gdp the augmented debt is still at a manageable level

since 1950 the south has undergone the most dramatic political transformation of any region in the united states the once solid meaning democratic south is now overwhelmingly republican and long disenfranchised african americans vote at levels comparable to those of whites in the rational southerner m v hood iii quentin kidd and irwin l morris argue that local strategic

dynamics played a decisive and underappreciated role in both the development of the southern republican party and the mobilization of the region's black electorate mobilized blacks who supported the democratic party made it increasingly difficult for conservative whites to maintain control of the party's machinery also as local republican party organizations became politically viable the strategic opportunities that such a change provided made the gop an increasingly attractive alternative for white conservatives blacks also found new opportunities within the democratic party as whites fled to the gop especially in the deep south where large black populations had the potential to dominate state and local democratic parties as a result republican party viability also led to black mobilization using the theory of relative advantage hood kidd and morris provide a new perspective on party system transformation following a theoretically informed description of recent partisan dynamics in the south they demonstrate with decades of state level sub state and individual level data that gop organizational strength and black electoral mobilization were the primary determinants of political change in the region the authors finding that race was and still is the primary driver behind political change in the region stands in stark contrast to recent scholarship which points to in migration economic growth or religious factors as the locus of transition the rational southerner contributes not only to the study of southern politics but to our understanding of party system change racial politics and the role that state and local political dynamics play in the larger context of national politics and policymaking
