## **Soil Organic Carbon Mapping Cookbook**

2018-05-21

the soil organic carbon mapping cookbook provides a step by step guidance for developing 1 km grids for soil carbon stocks it includes the preparation of local soil data the compilation and pre processing of ancillary spatial data sets upscaling methodologies and uncertainty assessments guidance is mainly specific to soil carbon data but also contains many generic sections on soil grid development as it is relevant for other soil properties this second edition of the cookbook provides generic methodologies and technical steps to produce soc maps and has been updated with knowledge and practical experiences gained during the implementation process of gsocmap v1 0 throughout 2017 guidance is mainly specific to soc data but as this cookbook contains generic sections on soil grid development it can be applicable to map various soil properties

## **Global Soil Organic Carbon Map (GSOCmap) Version 1.5**

2020-07-01

gsocmap is the first global soil organic carbon map ever produced through a consultative and participatory process involving member countries which makes this map totally new and unique in fact the map was prepared by member countries under the guidance of the intergovernmental technical panel on soils and the global soil partnership secretariat countries agreed on the methodology to produce the map and were trained on modern tools and methodologies to develop national maps the global soil partnership then gathered all national maps to produce the final product ensuring a thorough harmonization process this technical report is a companion report to the gsocmap v1 5 it presents methodologies and process of compiling the global soil organic carbon map
