greater concern for infrastructure renewal including upgrading the design and performance of wastewater treatment plants this revision contains a strong focus on advanced wastewater treatment

improvement of organic carbon recovery from wastewater by Oct 26 2022

the high rate contact stabilization hics process which can effectively recover organic carbon even from low strength wastewater is attracting attention to evaluate the effect of water temperature in the hics process

on the organic carbon recovery a bench scale test plant was used to treat real municipal wastewater the operating period was divided into six phases in terms of the solid

kinetic development and evaluation of membrane sequencing *Sep 24 2022*

anaerobic pond system can produce a bad smell by releasing H_2S and NH_3 metcalf and eddy 1991 activated sludge system achieved high organic removal efficiency for treating dairy wastewater with bod cod and tkn removal of 99 81 and 93 respectively carta et al 1999
