Hellenizing Art in Ancient Nubia 300 B.C. - AD 250 and Its Egyptian Models 2011-07-12

presenting a large body of evidence for the first time this book offers a comprehensive treatment of nubian architecture sculpture and minor arts in the period between 300 bc ad 250 it focuses primarily on the nubian response to the traditional pharaonic hellenistic roman hellenizing and hybrid elements of ptolemaic and roman egyptian culture the author begins with a history of nubian art and a critical survey of the literature on ptolemaic and roman egyptian art special chapters are then devoted to the discussion of the egyptian greek interaction in the arts of ptolemaic egypt the place of egyptian hellenistic and hellenizing art within the oikumene the pluralistic visual world of ptolemaic and roman egypt as well as on the specific genre of terracotta sculpture utilizing examples from meroe city and musawwarat es sufra the author argues that cultural transfer from ptolemaic and roman egypt to nubia resulted in an inward focused adaptation therefore the resulting nubian art from this period expresses only those aspects of egyptian and greek art that are compatible with indigenous nubian goals

2004 IEEE Nuclear Science Symposium Conference Record 2004

the reality of the arab israeli balance now consists of two subordinate balances israel versus syria and israel versus the palestinians the book analyzes these two balances in detail and their impact on defense planning in each country and on the overall strategic risk to the region as a whole it covers military developments in each of six states egypt israel jordan lebanon syria and palestine and provides an analytical view with charts and tables of how the changing natures of the military and political threats faced by each is impacting its military force readiness and development the book has the most comprehensive data on past current and future military force structure currently available drawn from the widest range of sources responding to the most recent of events in the region this book is the first to deal with the effects on the arab israeli military balance of the strategic uncertainty created by the iraqi insurgency and the iranian nuclear program it also studies how the gaza pullout the syrian withdrawal from lebanon the changing political landscape in israel and the threat of nuclear proliferation are having impacts on the egyptian israeli and jordanian israeli peace accords and the prospects for a settlement between the palestinians and israelis the roles of hezbollah hamas and palestinian islamic jihad are analyzed in light of the changing political landscape in both israel and palestine given the role of syria in the palestinian israeli affairs the book also explores the ways that internal instability in lebanon could escalate into a regional conflict

Annual Message of ... Mayor of Philadelphia 1893

epidemiology of chronic disease global perspectives is the most current and authoritative resource on the epidemiology etiology pathogenesis risk factors and preventive factors of over 50 major chronic diseases and conditions this comprehensive text provides readers with an excellent basis for examining current hypotheses regarding chronic disease epidemiology

Report 1896

correct word identification and processing is a prerequisite for accurate reading and decades of psycholinguistic and neuroscientific research have shown that the magical moments of visual word recognition are short lived and markedly fast the time window in which a given letter string passes from being a mere sequence of printed curves and strokes to acquiring the word status takes around one third of a second in a few hundred milliseconds a skilled reader recognizes an isolated word and carries out a number of underlying processes such as the encoding of letter position and letter identity and lexico semantic information retrieval however the precise manner and order in which these processes occur or co occur is a matter of contention subject to empirical research there s no agreement regarding the precise timing of some of the essential processes that guide visual word processing such as precise letter identification letter position assignment or sub word unit processing bigrams trigrams syllables morphemes among others which is the sequence of processes that lead to lexical access how do these and other processes interact with each other during the early moments of word processing do these processes occur in a serial fashion or do they take place in parallel are these processes subject to mutual interaction principles is feedback allowed for within the earliest stages of word identification and ultimately when does the reader s brain effectively identify a given word a vast number of questions remain open and this research topic will cover some of them giving the readership the opportunity to understand how the scientific community faces the problem of modeling the early stages of word identification according to the latest neuroscientific findings the present research topic aimed to combine recent experimental evidence on early word processing from different techniques together with comprehensive reviews of the current work directions in order

to create a landmark forum in which experts in the field defined the state of the art and future directions we were willing to receive submissions of empirical as well as theoretical and review articles based on different computational and neuroscience oriented methodologies we especially encouraged researchers primarily using electrophysiological or magnetoencephalographic techniques as well as eye tracking to participate given that these techniques provide us with the opportunity to uncover the mysteries of lexical access allowing for a fine grained time course analysis the main focus of interest concerned the processes that are held within the initial 250 300 milliseconds after word presentation covering areas that link basic visuo attentional systems with linguistic mechanisms

this book gathers outstanding research papers presented at the 5th international joint conference on advances in computational intelligence ijca 2021 held online during october 23 24 2021 ijca 2021 is jointly organized by jahangirnagar university ju bangladesh and south asian university sau india the book presents the novel contributions in areas of computational intelligence and it serves as a reference material for advance research the topics covered are collective intelligence soft computing optimization cloud computing machine learning intelligent software robotics data science data security big data analytics and signal and natural language processing

Official Summary of Security Transactions and Holdings Reported to the Securities and Exchange Commission Under the Securities Exchange Act of 1934 and the Public Utility Holding Company Act of 1935 1982

arti cial immune systems ais is a diverse and maturing area of research that bridges the disciplines of immunology and computation the original research impetus in ais had a clear focus on applying immunological principles to c putationalproblemsinpracticaldomainssuchascomputersecurity datamining and optimization as the eld has matured it has diversi ed such that we now see a growing interest in formalizing the theoretical properties of earlier proaches elaborating underlying relationships between applied computational models and those from theoretical immunology as well a return to the roots of the domain in which the methods of computer science are being applied to munological modelling problems following the trends in the eld the icaris conference intends to provide a forum for all these perspectives the 9th internationalconference on ais icaris 2010 built on the success of previous years providing a convenient vantage point for broader re ection as it returned to edinburgh the venue of the second icaris in 2003 this time the conference was hosted by edinburgh napier university at its craiglockhart campus recently reopened after extensive refurbishment which has resulted in a stunning building and state of the art facilities the extent to which the eld has matured over the preceding years is clear a substantial track of theor ical research now underpins the discipline the applied stream has expanded in its outlook and has examples of ais algorithms being applied across a wide spectrum of practicalproblems rangingfrom sensornetworksto semi conductor design

The Year-book of Wireless Telegraphy & Telephony 1924

social networks have emerged as a major trend in computing and social paradigms in the past few years the social network model helps to inform the study of community behavior allowing qualitative and quantitative assessments of how people communicate and the rules that govern communication social networking and community behavior modeling qualitative and quantitative measures provides a clear and consolidated view of current social network models this work explores new methods for modeling characterizing and

constructing social networks chapters contained in this book study critical security issues confronting social networking the emergence of new mobile social networking devices and applications network robustness and how social networks impact the business aspects of organizations

Local Climatological Data 1977

easy global liquidity conditions stronger risk appetite and a retrenchment in cross border bank lending led to a surge in emerging market firms bond issuance in international markets what we term the bon d anza using firm level data for five large latin american economies we provide evidence of a significant change in companies external funding strategies and liability structures after 2010 as well as in the balance sheet risks that firms face we find that stepped up bond issuance was mostly aimed at re financing rather than funding investment projects as firms extended the average duration of their debt while securing lower fixed rates reducing roll over and interest rate risks the shift towards safer maturity structures has come at the expense of a leveraging up in foreign currency denominated financial debt in several countries reversing a de dollarization trend seen during the last decade we also provide evidence that a substantial part of these bonds were issued through offshore vehicles suggesting regulatory and tax arbitrage strategies for some corporations rising dollar debt and high leverage will be particularly taxing in an environment of us dollar strengthening less buoyant commodity prices and slowing domestic activity

OECD Economic Surveys: China 2013 2013-03-22

publishes research on energy transfer in equipment and applied thermodynamic processes in all fields of mechanical engineering and related industries topic areas include aerospace heat transfer environmental heat transfer gas turbine heat transfer heat and mass transfer in biotechnology heat transfer in electronic equipment heat transfer in energy systems heat transfer in fire and combustion systems and heat transfer in manufacturing and materials processing
