the existence of so many strangely puzzling even contradictory aspects of time is due i think to the fact that we obtain our ideas about temporal succession from more than one source from inner experience on the one side and from the physical world on the other time is thus a composite notion and as soon as we distinguish clearly between the ideas deriving from the different sources it becomes apparent that there is not just one time concept but several perhaps they should be called variants but in any case they need to be seen as distinct in this book i shall aim at characteri sing what i believe to be the three most basic of them these form a sort of hierarchy of increasing richness but diminishing symmetry any adequate inquiry into time is necessarily partly scientific and partly philosophical this creates a difficulty since what may be elementary reading to scientists may not be so to philosophers and vice versa for this reason i have sought to present the book at a level which is less advanced than that of a specialist monograph due to my own background there is an inevitable bias towards the scientific aspects of time certainly the issues i have taken up are very diffe rent from those discussed in several recent books on the subject by philoso phers

all cultures are concerned with the business of childbirth so much so that it can never be described as a purely physiological or even psychological event this volume draws together work from a range of anthropologists and midwives who have found anthropological approaches useful in their work using case studies from a variety of cultural settings the writers explore the centrality of the way time is conceptualized marked and measured to the ways of perceiving and managing childbirth how women midwives and other birth attendants are affected by issues of power and control but also actively attempt to change established forms of thinking and practice the stories are engaging as well as critical and invite the reader to think afresh about time and about reproduction

## **Time Concepts Series: Calendars (GR 4-6) 2005**

maritime data from the automatic identification system ais have emerged as a potential source for real time information on trade activity however no globally applicable end to end solution has been published to transform raw ais messages into economically meaningful policy relevant indicators of international trade our paper proposes and tests a set of algorithms to fill this gap we build indicators of world seaborne trade using raw data from the radio signals that the global vessel fleet emits for navigational safety purposes we leverage different machine learning techniques to identify port boundaries construct port to port voyages and estimate trade volumes at the world bilateral and within country levels our methodology achieves a good fit with official trade statistics for many countries and for the world in aggregate we also show the usefulness of our approach for sectoral analyses of crude oil trade and for event studies such as hurricane maria and the effect of measures taken to contain the spread of the novel coronavirus going forward ongoing refinements of our algorithms additional data on vessel characteristics and country specific knowledge should help improve the performance of our general approach for several country cases

## **Three Concepts of Time 2009-09-01**

heidegger s lecture course at the university of marburg in the summer of 1925 an early version of being and time 1927 offers a unique glimpse into the motivations that prompted the writing of this great philosopher s master work and the presuppositions that gave shape to it the book embarks upon a provisional description of what heidegger calls dasein the field in which both being and time become manifest heidegger analyzes dasein in its everydayness in a deepening sequence of terms being in the world worldhood and care as the being of dasein the course ends by sketching the themes of death and conscience and their relevance to an ontology that makes the phenomenon of time central theodore kiesel s outstanding translation premits english speaking readers to appreciate the central importance of this text in the development of heidegger s thought

## **Beyond the Visible Universe : from a New Space-time Concept of the Physical Vacuum 2020-05-14**

concepts of time in post war european music gives a historical and philosophical account of the discussions of the nature of time and music during the mid twentieth century the nature of time was a persistent topic among composers in paris and darmstadt in the decades after world war ii one which influenced their musical practice and historical relevance based on the author s specialized knowledge of the relevant philosophical discourses this volume offers a balanced critique of these composers attempts at philosophizing about time touching on familiar topics such as adorno s philosophy of music the writings of boulez and stockhausen and messiaen s theology this volume uncovers specific relationships among varied intellectual traditions that have not previously been described each chapter provides a philosophical explanation of specific problems that are relevant for interpreting the composer s own essays or lectures followed by a musical analysis of a piece of music which illustrates central theoretical concepts

this is a valuable study for scholars and researchers of music theory music history and the philosophy of music

## **Childbirth, Midwifery and Concepts of Time 2009-01-13**

the subject of this book is a subject specific business discussion on the paradigms of time management the time itself is not tradable not storable and also not purchasable to acquire time cannot be heard smelled tasted or felt nevertheless it is omnipresent for all persons in companies as well as in private life this book deals with a special question for companies the paradigms in time management the term paradigm was chosen in order to express the fundamental generally prevailing and no longer to be discussed opinion on predefined questions here the temporal arrangement in enterprises they reflect a generally accepted consensus on what solutions should be found for certain issues in terms of time the paradigm is that acceleration is the only direction underlying time management it seems to be a kind of one way street in other words ever faster means ever more successful or ever better three special categories of time management and their respective paradigms are discussed in this book the first category considers time as a measure of efficient operational business processes so time has an operative value the second category regards time as an expression of sustainable competitive strategy and as an opportunity to take a unique position towards competitors in other words time has a strategic value the third category considers time as a measure of the demarcation and characterization of societies this time management of all people involved in a society does not pass our social developments by without a trace on the contrary it strongly shapes them time in the meaning of a modern spirit makes a clear mark on all of us i e time has a social value

## **World Seaborne Trade in Real Time: A Proof of Concept for Building AIS-based Nowcasts from Scratch** **2020-10-29**

this book presents a collection of authoritative contributions on the concept of time in early twentieth century philosophy it is structured in the form of a thematic atlas each section is accompanied by relevant elementary logic maps that reproduce in a spatial form the directionalities arguments and or discourses reported on in the text the book is divided into three main sections the first of which covers phenomenology and the perception of time by analyzing the works of bergson husserl sartre merleau ponty deleuze guattari and derrida the second section focuses on the language and conceptualization of time examining the works of cassirer wittgenstein heidegger lacan ricoeur and foucault while the last section addresses the science and logic of time as they appear in the works of guillaume einstein reichenbach prigogine and barbour the purpose of the book is threefold to provide readers with a comprehensive overview of the concept of time in early twentieth century philosophy to show how conceptual reasoning can be supported by accompanying linguistic and spatial representations and to stimulate novel research in the humanistic field concerning the complex role of graphic representations in the comprehension of concepts

## **History of the Concept of Time 2020-02-25**

enterprises have to react instantly to changing market conditions and disturbances that occur during execution of value creation processes depending upon the processes context the goal is to significantly reduce lead times reaction times and time to market among others the vision of a real time enterprise rte which is able to sense and analyze events from internal and external sources and perform adequate re actions has been envisaged by manufacturing enterprises daniel metz presents a framework based on eda and cep towards the realization of rte in manufacturing the framework closes the vertical integration gap and further establishes feedback in near real time among enterprise levels as such the framework provides a holistic and closed loop control of manufacturing processes and encompasses results and insights from

management engineering and computer science the framework has been implemented for a small and medium sized foundry in germany the developed control approach has led to a significant increase in manufacturing processes efficiency i e performance quality and availability

## **Concepts of Time in Post-War European Music**

**2015-11-26**

is it time to teach time this creative and sequential book offers loads of practice to help students learn to tell time in this book students learn key vocabulary words relate their own activities to specific times of the day and understand the differences between seconds minutes hours days weeks and more

## **Concepts and paradigms in operative, strategic and social time management 2013-10-01**

the book is concerned with the concept of time in the bible and in later literature primarily that of the judaean desert sect by the term concept of time the author refers to the entire complex of issues relating to time as follows from our involvement in the writings of the corpus the work discusses issues of terminology substance and ideology that arise from the totality of texts dealing with the subject of time the conjoining of the eight groups of chapters of the book provides a comprehensive picture of the approach to time in ancient hebrew literature beginning with the bible and concluding with the first century ce the latest possible time frame for the scrolls

## ***The Concept of Time in Early Twentieth-Century Philosophy* 2010**

concepts of addictive substances and behaviours across time and place presents fascinating new historical and social scientific research examining the temporal and spatial variations in the ways that addiction problems are understood and addressed in european societies the book illustrates the changing and versatile nature of language use of stakeholders concepts and ideas and of the popular professional and political discourse around addiction the arguments that unfold concern the various cultural components invested in the ways in which the problems are viewed and addressed a framework is presented for discussing these circumstances in view of current knowledge based governance at a local regional and global level concepts of addictive substances and behaviours across time and place is based on research from alicia rap addiction and lifestyles in contemporary europe reframing addictions project a multidisciplinary european study of addictive substances and behaviours in contemporary society this is an essential resource for public health professionals stakeholders influencing policy for addictive substances and behaviours students and academics looking to better understand the historical and geographical variations of addictive behaviours across in europe and the role of stakeholder involvement in the construction of addiction prevention policy

## **The Concept of a Real-Time Enterprise in Manufacturing**
