00000000 000 0000000_000 (Korean Made Easy - Vocabulary 0000) 2021-11-10 i have often been frustrated and amused by natives who want to be understood only by the collusive other natives and thus resort to the use of esoteric expressions the meanings of which are only privy to their people or even group the most enduring manner to memorialize the truth is to render the language understandable even if it entails going back to its proper roots typical of me i chose the hardest of them all english specifically because its rules have been intentionally overlooked or in some cases glossed over in favor of a wider comprehensibility as happened in plastics computer science or military jargon let me put it this way if there already is a way to say something well there is no need to create a new way of saying itto the glaring degradation of the language the purpose of a language is universal understand of what is said in the case of the english language make that what is said how it is said how it is written and even how it is pronounced it is pointless for english speaking people to wrongly interpret the intent of another of their kind or to answer in an equally obfuscating fashion if i say something i want to be universally understood in as clear a manner as possible
