

Free reading Medisin the causes and solutions to disease malnutrition and the medical sins that are killing the world none [PDF]

this book considers how scientists theologians priests and poets approached the relationship of the human body and ethics in the later middle ages is medicine merely a metaphor for sin or can certain kinds of bodies physiologically dispose people to be angry sad or greedy if so then is it their fault virginia langum offers an account of the medical imagery used to describe feelings and actions in religious and literary contexts referencing a variety of behavioral discussions within medical contexts the study draws upon medical and theological writing for its philosophical basis and upon more popular works of religion as well as poetry to show how these themes were articulated explored and questioned more widely in medieval culture this is a reproduction of the original artefact generally these books are created from careful scans of the original this allows us to preserve the book accurately and present it in the way the author intended since the original versions are generally quite old there may occasionally be certain imperfections within these reproductions we re happy to make these classics available again for future generations to enjoy drawing on new testament studies and recent scholarship on the expansion of the christian church gary b ferngren presents a comprehensive historical account of medicine and medical philanthropy in the first five centuries of the christian era ferngren first describes how early christians understood disease he examines the relationship of early christian medicine to the natural and supernatural modes of healing found in the bible despite biblical accounts of demonic possession and miraculous healing ferngren argues that early christians generally accepted naturalistic assumptions about disease and cared for the sick with medical knowledge gleaned from the greeks and romans ferngren also explores the origins of medical philanthropy in the early christian church rather than viewing illness as punishment for sins early christians believed that the sick deserved both medical assistance and compassion even as they were being persecuted christians cared for the sick within and outside of their community their long experience in medical charity led to the creation of the first hospitals a singular christian contribution to health care a succinct thoughtful well written and carefully argued assessment of christian involvement with medical matters in the first five centuries of the common era it is to ferngren s credit that he has opened questions and explored them so astutely this fine work looks forward as well as backward it invites fuller reflection of the many senses in which medicine and religion intersect and merits wide readership journal of the american medical association in this superb work of historical and conceptual scholarship ferngren unfolds for the reader a cultural milieu of healing practices during the early centuries of christianity perspectives on science and christian faith readable and widely researched an important book for mission studies and american catholic movements the book posits the question of what can take its place in today s challenging religious culture missiology an international review gary b ferngren is a professor of history at oregon state university and a professor of the history of medicine at first moscow state medical university he is the author of medicine and religion a historical introduction and the editor of science and religion a historical introduction few illnesses in the early modern period carried the impact of the dreaded pox a lethal sexually transmitted disease usually thought to be syphilis in the early sixteenth century the disease quickly emerged as a powerful cultural force just as powerful were the responses of doctors bureaucrats moralists playwrights and satirists these ten essays gauge the impact of sexual disease on early modern society by exploring the ways in which european culture reacted to the presence of a new deadly sexual infection articles about scientific and medical responses analyze how physicians incorporated the disease within existing intellectual frameworks studies in literary and metaphoric responses examine how early modern writers put images of sexual infection and the diseased body to a range of rhetorical and political uses finally essays about institutional and policing responses chronicle how authorities

responded to the crisis and how these public health responses linked up with wider campaigns to police sexuality the niv application commentary helps you communicate and apply biblical text effectively in today context to bring the ancient messages of the bible into today s world each passage is treated in three sections original meaning concise exegesis to help readers understand the original meaning of the biblical text in its historical literary and cultural context bridging contexts a bridge between the world of the bible and the world of today built by discerning what is timeless in the timely pages of the bible contemporary significance this section identifies comparable situations to those faced in the bible and explores relevant application of the biblical messages the author alerts the readers of problems they may encounter when seeking to apply the passage and helps them think through the issues involved this unique award winning commentary is the ideal resource for today s preachers teachers and serious students of the bible giving them the tools ideas and insights they need to communicate god s word with the same powerful impact it had when it was first written since benjamin rush first introduced the disease of wills as the cause of alcoholism a steady and slow infiltration of the disease model has infected how the church treats those who struggle with addictions the first organization that truly sought to remove the soul care of addicts from the church was alcoholics anonymous aa through their bestselling the big book of aa and the introduction of the 12 steps aa s influence on how the church confronts addiction still reverberates today with many of the ministries that address addiction firmly rooted in what can be found in aa literature addictions were once viewed as an issue caused by sin and best addressed through faith and prayer currently addiction is seen through the lens of disease the ramifications are consequential as more church members are struggling with addictions than ever before tracing the progression of addiction from sin to disease will reveal that the sbc and its churches have been negligent in understanding the underlying foundations of aa and the influence that the medicalization of substance abuse has had on how churches approach what should be classified as a sin issue discusses diseases and ailments that have been connected to sex throughout history and the reactions to them that have been shaped by religion or morality in this book portmann argues that especially since 9 11 the reality of sin has made a strong comeback even liberal christians such as bishop sprong have to take the pervasiveness of personal evil doing seriously the book starts off in the present and then loops back into the past to outline the key moments in the history of sin from the ancient greeks and israelites through jesus and paul to augustine and dante and then back to the present day diasporic africa presents the most recent research on the history and experiences of people of african descent outside of the african continent by incorporating europe and north africa as well as north america latin america and the caribbean this reader shifts the discourse on the african diaspora away from its focus solely on the americas underscoring the fact that much of the movement of people of african descent took place in old world contexts this broader view allows for a more comprehensive approach to the study of the african diaspora the volume provides an overview of african diaspora studies and features as a major concern a rigorous interrogation of identity other primary themes include contributions to western civilization from religion music and sports to agricultural production and medicine as well as the way in which our understanding of the african diaspora fits into larger studies of transnational phenomena there is a virtual epidemic of addiction in the united states both traditional addictions to drugs and alcohol but also newer addictions like sex gambling rage work and food eating some authorities have labeled addictions the number one mental health problem in america we are spending millions of dollars annually trying to prevent understand and treat this epidemic and yet by any measure of success we are losing this war in this cultural context dr sullender invites us to look again at the spiritually based scheme of the seven deadly sins which originated at the dawn of western civilization he suggests that what our spiritual forebears meant by deadly is best captured in the modern concept of addiction based on this thesis this book explores what is addictive about the sins of pride envy anger greed gluttony sloth and lust and suggests that these sins are all obsessive and as such become the mental component in the addictive cycle each chapter concludes by offering some spiritual resources practices and insights that can help us win the battle against addiction which is ultimately won or lost on a mental or spiritual plane this volume offers a comprehensive historical survey of medicine in sixteenth century europe and examines both medical theories and practices within their intellectual and social context nutton investigates the changes brought about in medicine by the opening up of the european world to new drugs and new

diseases such as syphilis and the sweat and by the development of printing and more efficient means of communication chapters examine how civic institutions such as health boards hospitals town doctors and healers became more significant in the fight against epidemic disease and special attention is given to the role of women and domestic medicine the final section on beliefs explores the revised galenism of academic medicine including a new emphasis on anatomy and its most vocal antagonists paracelsians the volume concludes by considering the effect of religious changes on medicine including the marginalisation and often expulsion of non christian practitioners based on a wide reading of primary sources from literature and art across europe renaissance medicine is an invaluable resource for students and scholars of the history of medicine and disease in the sixteenth century worship and sin religion related crime in the united states raises provocative questions about the role of religion in crime and criminal behavior arguing that religion related crime should be classified as a distinct subset of crime worthy of continued investigation by scholars this book brings together for the first time the disparate scholarly research related to various types of religion related crime presents numerous examples and considers the practical and legal issues facing practitioners of various disciplines this ground breaking work takes great care to present a comprehensive overview of the phenomenon and illustrates the complex and multidimensional nature of this crime category a three pronged typology is presented as a conceptual framework to distinguish the unique features of different types of religion related crime and to highlight the dynamic historical psychological social and cultural forces involved in each the author opens the text with several introductory chapters which serve to define religion related crime explore the role of religion in society and to provide an overview of legal and policy issues the remaining chapters provide detailed examples of three different types of religion related crime theologically based crimes which are those which are a result of a particular religious custom practice or belief while reactive defensive crimes are those which come about more as a result of social or political tensions between the religious member or group and the broader secular community the third type of religion related crime identified is the abuse of religious authority this category explores crimes committed by clergy who have taken advantage of their social political and religious status to further broaden an understanding of religion related crime the author provides chapters which explore crimes against women and children the use of illicit drugs in religious practice or to reach desired states of spiritual awareness the nature and function of destructive religious groups violence against reproductive health providers hate crime and crimes committed by clergy excerpt from the disease and remedy of sin one of our most pressing needs to day is that of making religion more vital in the common experience of men it is too often regarded either as a mere luxury expensive and unnecessary or as a burden painful to carry difficult to endure its doctrines seem remote from the lives of men and its rites empty and often wearisome god is only the residue of life and it is a residue men are more and more being tempted to grudge it is the aim of these pages to show that true religion so far from being apart from real life is the very essence of it that its truths are the laws of spiritual health and that far from being a dispensable luxury they are more necessary than the bread we eat or the air we breathe with this end the various experiences of the soul in health and disease have been examined from a medical point of view the volume therefore may be described as an essay in the psychology of sin and salvation from a medicinal standpoint christianity is everywhere regarded as the care and cure of spiritual disease the prevalent category of thought is spiritual health the commanding goal is eternal life how far the author has succeeded in carrying out his method it is for others to judge about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works the god diagnosis is the unique journey of a successful surgeon who finds the fulfillment of all his life dreams empty lonely and depressing embarking on a quest for truth and the answers to life s basic questions dr viehman finds himself at the epicenter of the most mind blowing diagnosis of his life in a riveting journey through investigation testing and personal struggles dr viehman recounts his journey from death to life in a way that will resonate with anyone seeking the facts

and examining the evidence for themselves dr viehman uses his medical mind to come at these issues in a profound way that is striking refreshing and fascinating he is vulnerable transparent and has the utmost integrity as he sorts out fact from fantasy this new author is exciting enjoyable to read and intriguing in his unique approach to this topic i believe we will hear much more from him and it will shake up many long held beliefs about christ christians and the church big mac publishers dr viehman was born and raised in wilmington de he attended and graduated magna cum laude from the university of delaware he attended medical school at jefferson medical college in philadelphia pennsylvania graduating number one in his class he completed an internship in internal medicine at the hospital of the university of pennsylvania in philadelphia and a dermatology residency at duke university medical center where he was chief resident dr viehman completed his fellowship in skin cancer surgery also at duke dr viehman co founded the cary skin center in cary north carolina and worked there 1998 2008 he is now in solo private practice at sea coast skin surgery in wilmington nc dr viehman has lectured nationally on dermatologic surgery and authored several published scientific research articles he has multiple interests including running cross fit training and missionary work for orphans in ukraine with new life ministries and collecting rare bibles dr viehman s family includes his wife ruth two sons brendan and cameron a daughter hannah and a border collie named pepper this book reveals the most significant medical fraud in history the theory that you can prevent illness by injecting poisons into the bodies of healthy people is dangerous quackery and sin all true science has proven the practice of vaccination to be ineffective and unsafe but the medical establishment has been lured into the superstitious practice hook line and sinker it is not merely a matter of ignorance that the debilitating practice flourishes it is at its core being promoted by those who know it is unsafe and ineffective there is a malevolent spirit behind the practice it is part of a conspiracy against god and man while most doctors are unwitting some are willing minions of that old serpent called the devil and satan who are quite happy to kill people for profit jesus describes such men ye are of your father the devil and the lusts of your father ye will do he was a murderer from the beginning and abode not in the truth because there is no truth in him when he speaketh a lie he speaketh of his own for he is a liar and the father of it john 8 44 christians get confused about exactly what to do with the commands in the bible do we need to give up pork and shellfish is it a sin to eat roadkill or to eat blood sausage is it a sin to wear mixed fabric is cross dressing a crime what about tattoos what do we do with that command not to boil a kid in its mother s milk and if none of these commands are for christians today then which bible commands are for today this book is designed to help you find solid answers to the question which parts of the bible s teaching are timeless and universal and which parts are only for the people to whom the bible was first written we will examine the laws in the old testament and the new testament sin lists and how they speak to issues such as sex alcohol and drugs obscene language and gambling as they existed in the first century world as we seek to discover what s on god s sin list for us today the sin that was his is a lovely story of a group of career criminals the story follows their slow redemption at the hands of a christ like healer that they had planned to exploit a cynical yukon gambler known as three ace artie has nothing but hate for religion ironically he had to pose as a priest in a small canadian village through a bizarre set of events it was the only way to avoid arrest for a crime artie didn t commit he planned to throw off the disguise as soon as he could make a safe escape but naturally both legal and romantic complications set in and artie must choose whether self preservation will continue to be his top priority it is a delightful story with intriguing characters and a subtle theme of redemption and righteousness running in the background this book traces the history of the interpretation of the disobedience of adam and eve in genesis 3 through the biblical period and the church fathers until augustine it explains the emergence of the doctrine of original sin with the theology of augustine in the late fourth century on the basis of a mistranslation of the greek text of romans 5 12 the book suggests that it is time to move past augustine s theology of sin and embrace a different theology of sin that is both more biblical and makes more sense in the postmodern west and in the developing world ferriter covers such subjects as abortion pregnancy celibacy contraception censorship infanticide homosexuality prostitution marriage popular culture social life and the various hidden irelands associated with sexual abuse all in the context of a conservative official morality backed by the catholic church and by legislation the book energetically and originally engages with subjects omitted from the mainstream historical narrative the breadth of this book and the richness of the source

material uncovered make it definitive in its field and a most remarkable work of social history based on the author's thesis from the University of Gregoriana in this compelling study Marian Morton traces the development of public and private health care policies for single mothers and identifies the ways in which attitudes about religion, race, and cultural definitions of womanhood affected their treatment, focusing on the history of the public hospital and four private maternity homes in Cleveland. Morton considers the care of unwed mothers in the context of developing American social policy from the mid-nineteenth century to today while social policy has taken on a growing responsibility for health care of dependent people. The perception of unwed mothers as sinful by the Christian church and undeserving because their situation was brought about by moral failure has differentiated them from other dependent populations. Government provides unmarried mothers with the least support and private maternity homes run mostly by churches have remained committed to the nineteenth-century notion of spiritual reclamation as Morton shows. Regardless of the time period, women pregnant out of wedlock have been the dependent population most easily disciplined by private agencies and the most resented and politically vulnerable recipients of public assistance. This vital work sheds new light on the current controversies over public assistance and legalized abortion and offers a powerful appraisal of the uncertainties and inequities of American social policy as it applies to women who fail to conform to social definitions of womanhood.

John Reimer, a Mennonite preacher in Lakeview, Chicago, might be on the downslope of his ministerial career at least that's how he feels most days. Then one morning in March, a hungover waitress at the Melrose Diner tells him to look into the murder of a bike messenger at North Pond and begs him to keep the cops out of it before too long. Reimer is making tracks through Chicago, asking a lot of questions and leaving many people uncomfortable. Reimer encounters a menagerie of characters in his beloved city: among them, a brooding detective who trusts Reimer's instincts, a moody Bible institute dropout trying to stay on his antipsychotic medication, a charismatic alderman, and the church moderator Nancy Huefflinger, an attorney who knows when to swagger and when to turn on the charm. Complicating things is Reimer's despair for his wife, Vi, in hospice with an incurable neurological disease and whose condition has shaken his faith to the core. When Reimer figures out that whoever killed the young man at North Pond is coming after him, too, he must summon all his inner resources, including some he didn't learn in seminary, if he wants to survive.

MediSin 2005 this book considers how scientists theologians priests and poets approached the relationship of the human body and ethics in the later middle ages is medicine merely a metaphor for sin or can certain kinds of bodies physiologically dispose people to be angry sad or greedy if so then is it their fault virginia langum offers an account of the medical imagery used to describe feelings and actions in religious and literary contexts referencing a variety of behavioral discussions within medical contexts the study draws upon medical and theological writing for its philosophical basis and upon more popular works of religion as well as poetry to show how these themes were articulated explored and questioned more widely in medieval culture

adam and eve in genesis 3 through the biblical period and the church fathers until augustine it explains the emergence of the doctrine of original sin with the theology of augustine in the late fourth century on the basis of a mistranslation of the greek text of romans 5 12 the book suggests that it is time to move past augustine s theology of sin and embrace a different theology of sin that is both more biblical and makes more sense in the postmodern west and in the developing world

Medical and Surgical Reporter 1885 ferriter covers such subjects as abortion pregnancy celibacy contraception censorship infanticide homosexuality prostitution marriage popular culture social life and the various hidden irelands associated with sexual abuse all in the context of a conservative official morality backed by the catholic church and by legislation the book energetically and originally engages with subjects omitted from the mainstream historical narrative the breadth of this book and the richness of the source material uncovered make it definitive in its field and a most remarkable work of social history

A History of Sin 2007 based on the author s thesis rome università gregoriana

Sin No More 2007-11-01 in this compelling study marian morton traces the development of public and private health care policies for single mothers and identifies the ways in which attitudes about religion race and cultural definitions of womanhood affected their treatment focusing on the history of the public hospital and four private maternity homes in cleveland morton considers the care of unwed mothers in the context of developing american social policy from the mid nineteenth century to today while social policy has taken on a growing responsibility for health care of dependent people the perception of unwed mothers as sinful by the christian church and undeserving because their situation was brought about by moral failure has differentiated them from other dependent populations government provides unmarried mothers with the least support and private maternity homes run mostly by churches have remained committed to the nineteenth century notion of spiritual reclamation as morton shows regardless of the time period women pregnant out of wedlock have been the dependent population most easily disciplined by private agencies and the most resented and politically vulnerable recipients of public assistance this vital work sheds new light on the current controversies over public assistance and legalized abortion and offers a powerful appraisal of the uncertainties and inequities of american social policy as it applies to women who fail to conform to social definitions of womanhood

Ancient Sins . . . Modern Addictions 2013-07-05 john reimer a mennonite preacher in lakeview chicago might be on the downslope of his ministerial career at least that s how he feels most days then one morning in march a hungover waitress at the melrose diner tells him to look into the murder of a bike messenger at north pond and begs him to keep the cops out of it before too long reimer is making tracks through chicago asking a lot of questions and leaving many people uncomfortable reimer encounters a menagerie of characters in his beloved city among them a brooding detective who trusts reimer s instincts a moody bible institute drop out trying to stay on his antipsychotic medication a charismatic alderman and the church moderator nancy huefflinger an attorney who knows when to swagger and when to turn on the charm complicating things is reimer s despair for his wife vi in hospice with an incurable neurological disease and whose condition has shaken his faith to the core when reimer figures out that whoever killed the young man at north pond is coming after him too he must summon all his inner resources including some he didn t learn in seminary if he wants to survive
