women who dared 52 stories of fearless daredevils adventurers and rebels

2002 the international symposium on smart graphics 2003 was held on july 2 4 2003 in heidelberg germany it was the fourth event in a series that started in 1999 as an aaai spring symposium in response to the overwhelming success of the 1999 symposium its organizers decided to turn it into a self contained event in 2000 with the support of ibm the first two international symposia on smart graphics were held at the t j watson research center in hawthorne ny the 2003 symposium was supported by the klaus tschira foundation and moved to the european media lab in heidelberg thus underlining the international character of the smart graphics enterprise and its community the core idea behind these symposia is to bring together researchers and practitioners from the field of computer graphics artificial intelligence cognitive psychology and neuroscience each of these disciplines contributes to what we mean by the term smart graphics the intelligent process of creating expressive and esthetic graphical presentations while artists and designers have been creating communicative graphics for centuries artificial intelligence focuses on automating this process by means of the computer while computer graphics provides the tools for creating graphical presentations in the first place cognitive sciences contribute the rules and models of perception necessary for the design of effective graphics the exchange of ideas between these four disciplines has led to many exciting and fruitful discussions and the smart graphics symposia draw their liveliness from a spirit of open minds and the willingness to learn from and share with other disciplines

Smart Graphics 2003-08-02 pcmag.com is a leading authority on technology delivering labs based independent reviews of the latest products and services our expert industry analysis and practical solutions help you make better buying decisions and get more from technology
