pim including six essential activities of pim and six different ways in which information can be personal to us part i then goes on to explore key issues that arise in the great migration of our information onto the and into a myriad of mobile devices part 2 provides a more focused look at technologies for managing information that promise to profoundly alter our practices of pim and through these practices the way we lead our lives part 2 is in five chapters chapter 5 technologies of input and output technologies in support of gesture touch voice and even eye movements combine to support a more natural user interface nui technologies of output include glasses and watch watches output will also increasingly be animated with options to zoom chapter 6 technologies to save our information we can opt for life logs to record our experiences with increasing fidelity what will we use these logs for and what isn't recorded that should be chapter 7 technologies to search our information the potential for personalized search is enormous and mostly yet to be realized persistent searches situated in our information landscape will allow us to maintain a diversity of projects and areas of interest without a need to continually switch from one to another to handle incoming information chapter 8 technologies to structure our information structure is key if we are to keep find and make effective use of our information but how best to structure and how best to share structured information between the applications we use with other people and also with ourselves over time what lessons can we draw from the failures and successes in web based efforts to share structure chapter 9 pim transformed and transforming stories from the past present and future part 2 concludes with a comparison between lickliders world of information in 1957 and our own world of information today and then we consider what the world of information is likely to look like in 2057 lickliders estimated that he spent 85 of his thinking time in activities that were clerical and mechanical and might someday be delegated to the computer what percentage of our own time is spent with the clerical and mechanical what about in 2057 until recently library automation was an optional activity for libraries and limited to a few larger libraries with fewer operations such as cataloguing circulation of books etc but the concept has been gaining prominence many practicing librarians and lis schools in developing countries including india have become interested in the idea moreover some government departments quality assessment as well as accrediting agencies who have been encouraging foundations consortia to design and develop lis software for the benefit of their member libraries are making library automation mandatory commercial as well as open source lis software have entered the field with varied processes facilities and customizable options e g libsys libris newgenlib koha vtls e grandhalaya soul etc the objective of any library is primarily to serve the user community by providing the right information to the right reader at the right time with the latest technologies and tools but most of the public and academic libraries in india are not yet able to implement automation programs due to lack of funds as well as expertise these libraries are encountering customization issues as no software sufficiently supports all library operations according to procedures followed by indian libraries furthermore these libraries are also facing installation and update problems with open source software this book deals with all the current aspects of automation and the issues that need to be addressed while implementing automation in a librarian's respective library the
