Progress in Environmental Assessment Policy, and Management Theory and Practice Participatory rangeland and grassland assessment (PRAGA) methodology Core Topics in Pre-Operative Anaesthetic Assessment and Management Violence Assessment and Intervention Assessment Centres and Global Talent Management Taking Stock of Environmental Assessment Drought Assessment, Management, and Planning: Theory and Case Studies Conceptualising Risk Assessment and Management across the Public Sector Violence Assessment and Intervention Novel Measurement and Assessment Tools for Monitoring and Management of Land and Water Resources in Agricultural Landscapes of Central Asia Place-Based Evaluation for Integrated Land-Use Management Handbook of Social Impact Assessment and Management Assessment and Governance of Sustainable Soil Management Draft Bald Hills Vegetation Management Plan and Environmental Assessment Handbook of Neurourology Adaptive, participatory and integrated assessment of the impacts of irrigation on fisheries evaluation of the approach in Sri Lanka ITF Roundtable Reports Ex-Post Assessment of Transport Investments and Policy Interventions The International Handbook of Social Impact Assessment Good Practice in Risk Assessment and Risk Management 2 FISMA and the Risk Management Framework Flood Risk Assessment and Management Handbook of Environmental Impact Assessment Floods and Landslides: Integrated Risk Assessment Environmental Impact Assessment and Strategic Environmental Assessment Processes, Assessment and Remediation of Contaminated Sediments Encyclopedia of Environmental Management, Four Volume Set Water Resources Management X Pain Assessment and Pharmacologic Management - E-Book Economic assessment of drought risk management Assessment, management and future directions for coastal fisheries in Asian countries Title List of Documents Made Publicly Available Flood Damage Survey and Assessment General Management Plan/environmental Assessment, Wilderness Suitability Study Regulatory Impact Assessment Methods of Environmental and Social Impact Assessment Handbook of Strategic Environmental Assessment Introduction to Environmental Impact Assessment Risk Assessment and Risk Management Innovative Applications of Knowledge Discovery and Information Resources Management ECMLG 2016 - Proceedings of the 12th European Conference on Management, Leadership and Governance

Progress in Environmental Assessment Policy, and Management Theory and Practice 2015-12-15 since becoming editor in chief in 2009 thomas fischer has overseen the publication of 22 issues of the journal of environmental and policy management this wide ranging and thought provoking volume presents a selection of papers from this period a number of these papers discuss the topics of the journal s special issues the others offer various international and comparative perspectives on the development and implementation of environmental assessment ea and strategic environmental assessment sea by drawing on the expertise of a number of global experts this comprehensive volume considers the challenges successes and progress of ea sea policy and management since 2009 this volume is perfect for students and researchers interested in environmental policy and its implementation and management

Participatory rangeland and grassland assessment (PRAGA) methodology 2022-09-08 this participatory grassland and rangeland assessment praga methodology was developed for the assessment of rangelands and grasslands in selected project countries it was developed through the project participatory assessment of land degradation and sustainable land management in grassland and pastoral systems financed by the global environment facility gef and executed by the food and agriculture organization of the united nations fao and the international union for conservation of nature iucn the methodology was piloted in five countries burkina faso kenya kyrgyzstan niger and uruguay to test its effectiveness and value necessary revisions were made to the methodology based on lessons learned from its application this document contains background information on global grasslands and rangelands and describes the need and the guiding principle for rangeland health assessments and practical guidance on how to conduct cost effective assessment it is divided into two parts part i background information on grasslands and rangelands part ii guidance for the preparation assessment and monitoring of grasslands and rangelands at the local level the methodology has been designed with enough flexibility to adapted to specific contexts and countries along the nine steps laid out in the document

Core Topics in Pre-Operative Anaesthetic Assessment and Management 2018-04-05 a practical guide to pre operative management planning for trainee and consultant anaesthetists

Violence Assessment and Intervention 2008-12-22 behavioral science has revealed a wealth of information concerning violence assessment in a wide variety of situations but the challenge confronted by those dealing with potentially hostile populations is the effective application of this knowledge now in its second edition violence assessment and intervention the practitioner s handbook secon

Assessment Centres and Global Talent Management 2016-04-08 globalization innovation market share identifying visionary leaders and particularly talent management are just some of the issues that benefit from using assessment and development centres assessment centres and global talent management focuses on topics that influence the design of the assessment centre in terms of the competencies being assessed the exercises that are used and the nature of the event so that they can deliver what is required often to change organizational culture and values practical examples and case studies are sprinkled throughout the book as international contributors explore cross cultural implications and consider how the design development and use of assessment centres should be adapted to different cultures some of the world s leading researchers and practitioners outline their research into new applications for assessment centre methods showing how they have used it to design and implement specific assessment and development centres this is a book from which practitioners can see how science informs good practice and scholars will find the 32 chapters a rich source of ideas for conducting research into emerging issues in the field

Taking Stock of Environmental Assessment 2007-11-13 examining the relationship between law environmental governance and the regulation of decision making this volume both reflective and contextual in approach uses a wide range of theories to explore the key features of modern environmental assessment

Drought Assessment, Management, and Planning: Theory and Case Studies 2012-12-06 drought is an insidious hazard of nature it originates from a deficiency of precipitation that results in a water shortage for some activity or some group africa has suffered the most dramatic impacts from drought during the past several decades the recent droughts in the southern and eastern portions of the continent are testimony to that fact however the vulnerability of all nations to extended periods of water shortage has been underscored again and again during this same time period in the past decade alone droughts have occurred with considerable frequency and severity in most of the developed and developing world significant parts of north and south america australia europe and asia have been plagued recently by extended periods of severe drought often resulting in far reaching economic social and environmental consequences in the western united states for example vast areas are facing the prospects of a sixth or seventh consecutive year of drought in 1993 concern by members of the scientific and policy communities about the inability of governments to respond in an effective and timely manner to drought and its associated impacts exists worldwide numerous calls for action for improved drought planning and management have been issued by national governments professional organizations intergovernmental organizations nongovernmental organizations and others the united nations international decade for natural disaster reduction Idndr is yet another example of an international call for action to reduce the impacts that result from drought and other natural hazards

Conceptualising Risk Assessment and Management across the Public Sector 2022-01-26 conceptualising risk assessment and management across the public sector explores concepts and applications of risk across the public sector to aid risk professionals in establishing a clearer understanding of what risk assessment and management is how it might be unified across sectors and how and where deviations are needed

Violence Assessment and Intervention 2003-06-27 if you are responsible for people they want and expect you to keep them safe on a regular basis violence assessment and intervention the practitioner s handbook shows you the most effective way to take the initial data and make quick decisions about whether the situation requires an immediate response with full resources or a less intense response it gives you easy access to the information you need not only to handle emergency situations but also to prevent them the principle focus of this book is not sociological theory or even clinical assessment but practical intervention monitoring and control of violence it presents techniques for use in any situation whether you are a mental health professional doing phone intake from a victim of domestic violence a corporate human resource or security person getting a call about an incident that just occurred or a law enforcement officer encountering a potential suicide using flow charts and step by step instructions developed while handling thousands of cases the authors give practical advice on how to recognize the signals of potential violence by individuals identify probable victims and assess escalation of the threat written specifically for the practitioner this book provides practical effective methods of violence assessment and intervention during this time of increasing concern about security threat assessment and profiling for violence prediction violence assessment and intervention the practitioner s handbook gives you the tools to decrease the chances of violence and increase safety in your organization

Novel Measurement and Assessment Tools for Monitoring and Management of Land and Water Resources in Agricultural Landscapes of Central Asia 2013-10-04 the book aims to initiate a sustainable use of land and water resources in central asia by the transfer of scientific methods it deals with the most advanced methods worldwide for better monitoring and management of water and land resources we offer an array of methods of measuring assessing forecasting utilizing and controlling processes in agricultural landscapes these are laboratory and field measurement methods methods of resource evaluation functional

mapping and risk assessment and remote sensing methods for monitoring and modeling large areas the book contains methods and results of data analysis and ecosystem modeling of bioremediation of soil and water field monitoring of soils and methods and technologies for optimizing land use systems as well the chapter authors are inventors and advocators of novel transferrable methods the book starts with an analysis of the current state of water and land resources finally concrete proposals for the applicability of novel methods are given

Place-Based Evaluation for Integrated Land-Use Management 2016-03-03 in recent years there has been an increasing emphasis placed on local and regional integration in major planning projects and infrastructure development including roads rail and waterways this emphasis is not only on integrating various projects but also integrating them with related issues such as housing industry environment and water in other words land use planning and infrastructure management have become more spatially oriented this book brings together experts in the fields of spatial planning land use and infrastructure management to explore the emerging agenda of spatially oriented integrated evaluation it weaves together the latest theories case studies methods policy and practice to examine and assess the values impacts benefits and the overall success in integrated land use management in doing so the book clarifies the nature and roles of evaluation and puts forward guidance for future policy and practice

Handbook of Social Impact Assessment and Management 2024-03-14 this is an open access title available under the terms of a cc by nc nd 4 0 license it is free to read download and share on elgaronline com this carefully conceived handbook presents a state of the art discussion of the field of social impact assessment sia highlighting contemporary understandings and emerging issues in this continually evolving area of research and practice experienced sia practitioners from around the world share their learnings and advice on a comprehensive range of issues faced in social performance practice

Assessment and Governance of Sustainable Soil Management 2020-01-24 the role of soils for achieving the sustainable development goals is multifarious soils are the essential basis for food and biomass provision in support of food security sdg 2 and energy security sdg 7 soil carbon sequestration is paramount for climate action sdg 13 soil mediated water purification and retention nutrient and matter cycling and soils habitat functions are essential for maintaining ecosystem services and biodiversity sdg 15 healthy soils perform well in all these functions simultaneously however the globally increasing demand for food fiber and bio based products poses massive challenges to soil health minimizing trade offs between biomass production and soil health requires systemic approaches to assessment and governance of sustainable soil management in agriculture and food systems it provides interdisciplinary insights into key questions what are the impacts of agricultural management practices on sustainability targets in specific geophysical and socio economic contexts what are the opportunities and risks of future trends such as climate change digitalization and emerging technologies for soil management and soil health how can institutions and governance instruments be improved to enable decision makers to take action on sustainable soil management the book was initiated in the frame of the national german research program bonares soil as a sustainable resource for the bioeconomy and it is meant to trigger interdisciplinary thinking

Draft Bald Hills Vegetation Management Plan and Environmental Assessment 1991 this book introduces neurouology as an emerging interdisciplinary area that covers the basic and clinical studies of the neural control on the normal lower urinary tract and the lower upper urinary tract dysfunction due to neuropathy disorders it systematically describes all aspects of neurouology from the epidemiology of the neurogenic bladder to the pathology and pathophysiology of the lower urinary tract to the diagnosis and treatment of the neurogenic bladder by conservative therapies or surgeries this book provides a useful resource for medical doctors nurses and students in the field of neurouological conditions in this 2nd edition 15 chapters are added e g on urodynamic practice psychogenic reasons of lutsd standard of care physiotherapy upper urinary tract rehabilitation to enable self catheterization pediatric neurouology new surgical procedures the editors have invited an impressive number of renowned contributors including 98 internationally recognized specialists in this field from 25 countries in europe asia north america and south america this handbook provides a useful resource for medical doctors nurses and students in the field of neurouological conditions

Handbook of Neurouology 2023-11-26 the paper reviews the existing methods used in india for estimation of flow characteristics at ungauged sites it focuses on low and high flows long term mean flow and flow duration curves since it lists the actual formulae it can be used as a quick reference guide for selecting a suitable technique for various geographical regional and or river basins in india

Adaptive, participatory and integrated assessment of the impacts of irrigation on fisheries evaluation of the approach in Sri Lanka 2005 ex post evaluation is important to improving the delivery of transport policy objectives it can be used for multiple purposes at the core of which is the improvement of ex ante assessment a small number of jurisdictions employ ex post evaluation systematically and leading experience is

ITF Roundtable Reports Ex-Post Assessment of Transport Investments and Policy Interventions 2017-02-28 this book provides a valuable addition to the social impact assessment sia literature while the volume addresses several good examples of how to case studies it also firmly addresses the importance of the need for firm conceptual and theoretical guidelines for sia practice the volume is an excellent contribution to the sia literature and i highly recommend it to both practitioner and researcher alike geoff syme australasian journal of environmental management an innovative collection which takes social impact assessment to the frontiers of environmental and social policy and citizen awareness unusually this collection includes both sophisticated quantitative tools and equally important chapters on participation stakeholder involvement and environmental mediation a most valuable source book michael redclift king s college london uk social impact assessment sia is the process of analysing and managing the intended and unintended consequences on the human environment of planned interventions policies programmes plans projects so as to bring about a more sustainable and equitable biophysical and human environment this important handbook presents an indispensable overview of the range of new methods and of the conceptual advances in sia recent increased attention to social considerations has led to substantial development in the techniques useful to and the thinking in sia a distinguished group of contributors provides an up to date and comprehensive account of the cutting edge in sia development this handbook outlines a new understanding and definition of sia and as such will be an invaluable reference tool for both practitioners and scholars at different levels working in the fields of sia and environmental studies including both impact assessment and management

The International Handbook of Social Impact Assessment 2003-01-01 the range of problems that arise due to violence mental health problems substance abuse and familial breakup require fast accurate risk assessment these two volumes by kemshall and pritchard explores the techniques needed to solve such problems

Good Practice in Risk Assessment and Risk Management 2 1997 fisma and the risk management framework the new practice of federal cyber security deals with the federal information security management act fisma a law that provides the framework for securing information systems and managing risk associated with information resources in federal government agencies comprised of 17 chapters the book explains the fisma legislation and its provisions strengths and limitations as well as the expectations and obligations of federal agencies subject to fisma it also discusses the processes and activities necessary to implement effective information security management following the passage of fisma and it describes the national institute of

standards and technology s risk management framework the book looks at how information assurance risk management and information systems security is practiced in federal government agencies the three primary documents that make up the security authorization package system security plan security assessment report and plan of action and milestones and federal information security management requirements and initiatives not explicitly covered by fisma this book will be helpful to security officers risk managers system owners it managers contractors consultants service providers and others involved in securing managing or overseeing federal information systems as well as the mission functions and business processes supported by those systems learn how to build a robust near real time risk management system and comply with fisma discover the changes to fisma compliance and beyond gain your systems the authorization they need

FISMA and the Risk Management Framework 2012-12-31 flood catastrophes which happened world wide have shown that it is not sufficient to characterize the hazard caused by the natural phenomenon flood with the well known 3m approach measuring mapping and modelling due to the recent shift in paradigms from a safety oriented approach to risk based planning it became necessary to consider the harmful impacts of hazards the planning tasks changed from attempts to minimise hazards towards interventions to reduce exposure or susceptibility and nowadays to enhance the capacities to increase resilience scientific interest shifts more and more towards interdisciplinary approaches which are needed to avoid disaster this book deals with many aspects of flood risk management in a comprehensive way as risks depend on hazard and vulnerabilities not only geophysical tools for flood forecasting and planning are presented but also socio economic problems of flood management are discussed starting with precipitation and meteorological tools to its forecasting hydrological models are described in their applications for operational flood forecasts considering model uncertainties and their interactions with hydraulic and groundwater models with regard to flood risk planning regionalization aspects and the options to utilize historic floods are discussed new hydrological tools for flood risk assessments for dams and reservoirs are presented problems and options to quantify socio economic risks and how to consider them in multi criteria assessments of flood risk planning are discussed this book contributes to the contemporary efforts to reduce flood risk at the european scale using many real world examples it is useful for scientists and practitioners at different levels and with different interests

Flood Risk Assessment and Management 2011-01-04 due to rapid economic growth and enhancing employment opportunities manufacturing and infrastructural projects play a vital role especially in developing nations even though voluminous literature is available on environmental impact assessment eia guidelines on conducting good quality assessments are lacking it may be recognized that good eia reports can only facilitate government decision making with sustainability considerations the book is the result of the review of more than 150 eia reports and the analysis of shortcomings observed by the author it will serve to bridge the gap in the limited understanding of eia concepts by practitioners and practical aspects by fresh graduates the book describes the output and salient features of a good quality eia report and case studies to facilitate professionals preparing and appraising these reports it will be of immense use to environment ministries eia practitioners eia appraisal authorities project proponents academics and ngos especially in the emerging economies

Handbook of Environmental Impact Assessment 2021-03-29 this book reviews the state of the art of natural disasters like floods and landslides highlighting the possibility of safe and correct land planning and management by means of a global approach to territory in fact the events deriving from slope dynamics gravitational phenomena and fluvial dynamics floods are commonly triggered by the same factor heavy rainfall occur at the same time and are closely related for this reason this book analyses floods and slope stability phenomena as different aspects of the same dynamic system the drainage basin

Floods and Landslides: Integrated Risk Assessment 1999 the main objective of this volume is to provide information and guidance on eia and sea good practice with particular application to developing countries and countries in transition to market economies it is intended to support local practitioners in the design and implementation of appropriate country specific eia and sea arrangements and in addressing emerging demands for a more integrated approach to decision making in support of sustainable development

Environmental Impact Assessment and Strategic Environmental Assessment 2004 the purpose of this book is to help engineers and scientists better understand contaminated sediment sites and identify and design remedial approaches that are more efficient and effective contaminated sediment management is a difficult and costly exercise that is rarely addressed with easily identified and implemented remedies it is hoped that this book can help identify and implement management approaches that provide an optimal if not entirely satisfactory solution to sediment contaminant problems

Processes, Assessment and Remediation of Contaminated Sediments 2013-07-20 winner of an outstanding academic title award from choice magazine encyclopedia of environmental management gives a comprehensive overview of environmental problems their sources their assessment and their solutions through in depth entries and a topical table of contents readers will quickly find answers to questions about specific pollution and management issues edited by the esteemed sven erik jørgensen and an advisory board of renowned specialists this four volume set shares insights from more than 500 contributors all experts in their fields the encyclopedia provides basic knowledge for an integrated and ecologically sound management system nearly 400 alphabetical entries cover everything from air soil and water pollution to agriculture energy global pollution toxic substances and general pollution problems using a topical table of contents readers can also search for entries according to the type of problem and the methodology this allows readers to see the overall picture at a glance and find answers to the core questions what is the pollution problem and what are its sources what is the big picture or what background knowledge do we need how can we diagnose the problem both qualitatively and quantitatively using monitoring and ecological models indicators and services how can we solve the problem with environmental technology ecotechnology cleaner technology and environmental legislation how do we address the problem as part of an integrated management strategy this accessible encyclopedia examines the entire spectrum of tools available for environmental management an indispensable resource it guides environmental managers to find the best possible solutions to the myriad pollution problems they face also available online this taylor francis encyclopedia is also available through online subscription offering a variety of extra benefits for researchers students and librarians including citation tracking and alerts active reference linking saved searches and marked lists html and pdf format options contact us to inquire about subscription options and print online combination packages us tel 1 888 318 2367 email e reference taylorandfrancis com international tel 44 0 20 7017 6062 email online sales tandf co uk

Encyclopedia of Environmental Management, Four Volume Set 2012-12-13 forming the 10th volume from this successful international conference series this book presents the work of scientists practitioners and other experts regarding recent technological and scientific developments associated with the management of surface and sub surface water resources

Water Resources Management X 2019-07-16 pain assessment and pharmacologic management by highly renowned authors chris pasero and margo mcaffery is destined to become the definitive resource in pain management in adults it provides numerous reproducible tables boxes and figures that can be used in clinical practice and emphasizes the benefits of a multimodal analgesic approach throughout in addition patient medication information forms for the most commonly used medications in each analgesic group can be copied and given to patients this title is an excellent resource for nurses to become certified in pain management presents best practices and evidence based guidelines for assessing and managing pain most effectively with the latest medications and drug regimens features detailed step by step guidance on effective pain assessment

to help nurses appropriately evaluate pain for each patient during routine assessments provides reproducible tables boxes and figures that can be used in clinical practice contains patient medication information forms for the most commonly used medications in each analgesic group to be copied and given to patients offers the authors world renowned expertise in five sections underlying mechanisms of pain and the pathophysiology of neuropathic pain includes figures that clearly illustrate nociception and classification of pain by inferred pathology assessment includes tools to assess patients who can report their pain as well as those who are nonverbal such as the cognitively impaired and critically ill patients several pain rating scales are translated in over 20 languages nonopioids includes indications for using acetaminophen or nsais and the prevention and treatment of adverse effects opioids includes guidelines for opioid drug selection and routes of administration and the prevention and treatment of adverse effects adjuvant analgesics presents different types of adjuvant analgesics for a variety of pain types including persistent chronic pain acute pain neuropathic pain and bone pain prevention and treatment of adverse effects is also covered includes helpful appendices that provide website resources and suggestions for the use of opioid agreements and for incorporating pain documentation into the electronic medical record covers patients from young adults to frail older adults provides evidence based practical guidance on planning and implementing pain management in accordance with current tjc guidelines and best practices includes illustrations to clarify concepts and processes such as the mechanisms of action for pain medications features spiral binding to facilitate quick reference

Pain Assessment and Pharmacologic Management - E-Book 2010-10-04 drought is a complex natural hazard and the uncertainties surrounding its onset and impacts make investment decisions inherently difficult on the other hand drought is considered one of the costliest and most destructive natural hazards with the threat of higher frequency and greater intensity of future drought events due to climate change the debate in drought management has evolved from whether to implement reactive or proactive drought management approaches in other words whether to invest or not in proactive drought actions to how to invest in proactive drought action different and evolving drought events can be mitigated with varying proactive measures but the best trade off between efficacy and profitability be it a financial or an economic profit must be targeted the report investigates the broad concept of the economics of drought management provides a conceptual two tier framework for the assessment of proactive and reactive actions and disseminates case studies for the implementation of the framework in decision making processes this report aims to assist decision makers policymakers planners and national authorities responsible for planning and programming to conduct an exhaustive economic assessment related to drought with the knowledge gained from the report a critical step in the drought investment decision making process can be effectively undertaken

Economic assessment of drought risk management 2024-03-22 in asia the fisheries sector is important in terms of food security livelihoods and foreign exchange earnings however as in many parts of the world there are signs that capture fisheries are fully exploited or overfished management of fisheries in the region is often hampered by lack of information on the status of fisheries in terms of biological social economic policy and governance aspects this regional project documents an alarming decline on coastal fishery resources based on historic research surveys in south and southeast asia socio economic analyses and policy reviews highlight the importance of the fisheries sector but also the challenges facing it potential interventions to improve fisheries management in the countries are outlined and defined with environmental socioeconomic and institutional objectives Assessment, management and future directions for coastal fisheries in Asian countries 2003-12-08 floods can have a devastating impact on life property and economic resources however the systematic collection of damage data in the aftermath of flood events can contribute to future risk mitigation such data can support a variety of actions including the identification of priorities for intervention during emergencies the creation of complete event scenarios to tailor risk mitigation strategies the definition of victim compensation schemes and the validation of damage models to feed cost benefit analysis of mitigation actions volume highlights include compilation of real world case studies elaborating on the survey experiences and best practices associated with flood damage data collection storage and analysis that can help strategize flood risk mitigation in an efficient manner coverage of different flooding phenomena such as riverine and mountain floods spatial analysis from local to global scales and stakeholder perspectives e g public decision makers researchers private companies contributions from leading experts in the field researchers and practitioners including civil protection actors working at different spatial and administrative level insurers and professionals working in the field of natural hazard risks mitigation flood damage survey and assessment new insights from research and practice will be a valuable resource for earth scientists hydrologists meteorologists geologists geographers civil engineers insurers policy makers and planners read an interview with the editors to find out more eos org editors vox the value of disaster damage data

Title List of Documents Made Publicly Available 1989 the practice of regulatory impact assessment has long needed a critical evaluation this volume which is interdisciplinary and international and combines academic and practitioner insights hits the spot to great effect colin scott ucd college of business and law and ucd school of law ireland better state regulation is a key component of economic reform this is the first book to comprehensively explore international experience in the use of regulatory impact assessment ria which involves assessing the potential benefits and costs of any regulatory change the contributors reveal that ria is being adopted by an increasing number of countries as a route to better regulation with varying degrees of success the book includes contributions from leading experts on regulatory reform and introduces a range of case studies from developed developing and transitional economies comprehensive in its approach this book contributes to the literature on evidence based decision making as part of the new public management by rigorously examining the principles of better regulation and focusing on the problem of applicability and adoption of ria practices around the world it will greatly aid understanding of regulatory policy design and implementation the book will be invaluable for academics and researchers of public policy and management in developed developing and transitional countries it will also be of great practical relevance to government administrators and policymakers challenged by the need to understand the scope and limitations of ria

Flood Damage Survey and Assessment 2017-06-28 environmental and social impact assessment esia is an important and often obligatory part of proposing or launching any development project delivering a successful esia needs not only an understanding of the theory but also a detailed knowledge of the methods for carrying out the processes required riki therivel and graham wood bring together the latest advice on best practice from experienced practitioners to ensure an esia is carried out effectively and efficiently this new edition explains how an esia works and how it should be carried out demonstrates the links between socio economic cultural environmental and ecological systems and assessments incorporates the world bank s ifc performance standards and best practice examples from developing as well as developed countries includes new chapters on emerging esia topics such as climate change ecosystem services cultural impacts resource efficiency land acquisition and involuntary resettlement invaluable to undergraduate and msc students of esia on planning ecology geography and environment courses this internationally oriented fourth edition of methods of environmental and social impact assessment is also of great use to planners esia practitioners and professionals seeking to update their skills

General Management Plan/environmental Assessment, Wilderness Suitability Study 1990 first published in 2010 routledge is an imprint of taylor francis an informa company

Regulatory Impact Assessment 2007 an introduction to environmental impact assessment this text is designed to be used by students of planning environmental studies and geography

Methods of Environmental and Social Impact Assessment 2017-09-13 risk assessment is considered by many analysts to be an objective scientific tool it is considered to be variously influenced by broader issues which in turn have important practical implications both for risk assessors and decision makers risk assessment and risk management examines a range of practical applications of risk assessment methods and risk management procedures in the broad context of environmental science and technology written by acknowledged experts in the field the articles cover a variety of areas with reference to subjects as diverse as the use of risk assessment in government using computer modelling as an aid to risk assessment in the case of accidental contamination of rivers and estuaries quantitative cancer risk assessment related to carcinogens in the environment landfilling of household wastes environmental risk assessment and management of chemicals and aquatic risk assessment and management of pesticides this book provides a detailed and wide ranging review of the many aspects of risk assessment and risk management which have excited so much debate and controversy in recent times it will be essential reading for all those involved in the assessment and management of risk particularly in the context of environmental science

Handbook of Strategic Environmental Assessment 2011 technological advancements have become an integral part of life impacting the way we work communicate make decisions learn and play as technology continually progresses humans are being outpaced by its capabilities and it is important for businesses organizations and individuals to understand how to optimize data and to implement new methods for more efficient knowledge discovery and information management and retrieval innovative applications of knowledge discovery and information resources management offers in depth coverage on the pervasiveness of technological change with a collection of material on topics such as the impact of permeable work life boundaries burnout and turnover big data usage and computer based learning it proves a worthy source for academicians practitioners it leaders it professionals and advanced level students interested in examining the ways in which technology is changing the world
