program begins at the entry level then advances to associate professional and expert levels and for some certifications caps things off at the architect level this volume focuses on the abuse of statistical inference in scientific and statistical literature as well as in a variety of other sources presenting examples of misused statistics to show that many scientists and statisticians are unaware of or unwilling to challenge the chaotic state of statistical practices the book provides examples of ubiquitous statistical tests taken from the biomedical and behavioural sciences economics and the statistical literature discusses conflicting views of randomization emphasizing certain

aspects of induction and epistemology reveals fallacious practices in statistical causal inference stressing the misuse of regression models and time series analysis as instant formulas to draw causal relationships treats constructive uses of statistics such as a modern version of fisher's puzzle bayesian analysis shewhart control chart descriptive statistics chi square test nonlinear modeling spectral estimation and markov processes in quality control through engaging contemporary examples making sense of mind only reveals the yogacara school of indian buddhism as a coherent system of ideas and practices for the path to liberation contextualizing its key texts and rendering them accessible and relevant the yogacara or yoga practice school is one of the two schools of mahayana buddhism that developed in the early centuries of the common era though it arose in india mahayana buddhism now flourishes in china tibet korea vietnam and japan while the other major mahayana tradition the madhyamaka middle way focuses on the concept of emptiness that all phenomena lack an intrinsic essence the yogacara school focuses on the cognitive processes whereby we impute such essences through everyday examples and analogues in cognitive science author william waldrón makes yogacara's core teachings on the three turnings of the dharma wheel the three natures the storehouse consciousness and mere perception accessible to a broad audience in contrast to the common characterization of yogacara as philosophical idealism waldrón presents yogacara buddhism on its own terms as a coherent system of ideas and practices with dependent arising its guiding principle the first half of making sense of mind only explores the historical context for yogacara's development waldrón examines early buddhist texts that show how our affective and cognitive processes shape the way objects and worlds appear to us and how we erroneously grasp onto them as essentially real perpetuating the habits that bind us to samsara he then analyzes the early madhyamaka critique of essences this context sets the stage for the book's second half an examination of how yogacara texts such as the samdhinirmocana sutra and asanga's stages of yogic practice yogacarabhūmi build upon these earlier ideas by arguing that our constructive processes also occur unconsciously not only do we collectively yet mostly unknowingly construct shared realities or cultures our shared worlds are also mediated through the storehouse consciousness alayavijñāna functioning as a cultural unconscious vasubandhu's twenty verses argues that we can learn to recognize such objects and worlds as mere perceptions vijñaptimatra and thereby abandon our enchantment with the products of our own cognitive processes finally maitreya's distinguishing phenomena from their ultimate nature dharmadharmatavibhaga elegantly lays out the mahayana path to this transformation in waldrón's hands yogacara is no mere view but a practical system of transformation his presentation of its key texts and ideas illuminates how religion can remain urgent and vital in our scientific and pluralistic age contrary to popular perceptions cultural heritage is not given but constantly in the making a construction subject to dynamic processes of re-inventing culture within particular social formations and bound to particular forms of mediation yet the appeal of cultural heritage often rests on its denial of being a fabrication its promise to provide an essential ground to social cultural identities taking this paradoxical feature as a point of departure and anchoring the discussion to two heuristic concepts the politics of authentication and aesthetics of persuasion the chapters herein explore how this tension is central to the dynamics of heritage formation worldwide horse sense provides an in depth guide to horse care under conditions unique to australia and new zealand it is written in an easy to read style jacket peter drucker has introduced us all to the knowledge era where knowledge is the primary resource and intangibles intellectual capital resources and assets are now largely recognized as the most important sources of organizations competitive advantage with the recognition of the importance of intangibles comes the problem of how to properly identify them and assign them a value within the corporation this is an area of concern in 5 fields 1 accounting and financial reporting 2 performance measurement and management 3 valuation in the finance field 4 the human resources field in terms of management strategy and planning and 5 intellectual capital over the past eight years over 25 methods have been proposed for the valuation of intangibles coming out of these 5 fields in this book andriessen evaluates 25 existing methods of intangible valuation according to highly developed criteria in performing his evaluations andriessen synthesizes the state of the art research from these fields based on extensive research he then presents his own method for valuing intangibles which he began developing and testing as a senior manager at kpmg knowledge advisory services in the netherlands he relates six case studies in which this method was tested in actual companies carefully reviews the results of his tests and then concludes by offering a new and improved method for questions of the financial crisis has not been answered until now what happened at lehman brothers and why was it allowed to fail with aftershocks that rocked the global economy in this news making often astonishing book a former lehman brothers vice president gives us the straight answers right from the belly of the beast in a colossal failure of common sense larry mcdonald a wall street insider reveals the culture and unspoken rules of the game like no book has ever done the book is couched in the very human story of larry mcdonald s horatio alger like rise from a massachusetts gateway to nowhere housing project to the new york headquarters of lehman brothers home of one of the world s toughest trading floors we

get a close up view of the participants in the lehman collapse especially those who saw it coming with a helpless angry certainty we meet the brahmins at the top whose reckless pedal to the floor addiction to growth finally demolished the nation s oldest investment bank the wall street we encounter here is a ruthless place where brilliance arrogance ambition greed capacity for relentless toil and other human traits combine in a potent mix that sometimes fuels prosperity but occasionally destroys it the full significance of the dissolution of lehman brothers remains to be measured but this much is certain it was a devastating blow to america s and the world s financial system and it need not have happened this is the story of why it did widdis s rich and fascinating book has opened a new perspective from which to think about the soviet cinema kritika this major reimagining of the history of soviet film and its cultural impact explores the fundamental transformations in how film through the senses remade the soviet self in the 1920s and 1930s following the russian revolution there was a shared ambition for a sensory revolution to accompany political and social change soviet men and women were to be reborn into a revitalized relationship with the material world cinema was seen as a privileged site for the creation of this sensory revolution film could both discover the world anew and model a way of inhabiting it drawing upon an extraordinary array of films noted scholar emma widdis shows how soviet cinema as it evolved from the revolutionary avant garde to socialist realism gradually shifted its materialist agenda from emphasizing the external senses to instilling the appropriate internal senses consciousness emotions in the new soviet subject echocardiography is rhetorical criticism and critical analysis of mass media ultrasound is used to demonstrate and classify numerous vascular diseases including a cerebrovascular and transcranial lower and upper limb arterial a deep vein thrombosis a deep and superficial venous refluxa renal hepatoportal mesenteric and penile making sense of vascular ultrasound is designed to give users a hands on practical approach t in this book aoife daly argues that where courts decide children s best interests for example about parental contact the un convention on the rights of the child s right to be heard is insufficient and autonomy should instead be the focus global law and practice indicate that children are regularly denied due process rights in their own best interest proceedings and find their wishes easily overridden it is argued that a children s autonomy principle respecting children s wishes unless significant harm would likely result would ensure greater support for children in proceedings and greater obligations on adults to engage in transparent decision making this book is a call for a reconceptualisation of the status of children in a key area of children s rights your infant is crying and you don t know why your toddler refuses every kind of food except one your preschooler wages war with you each morning over what to wear every day parents struggle unsuccessfully to understand why their children act the way they do now child development expert priscilla j dunstan breaks down those barriers to understanding with this revolutionary and accessible guide that teaches a new way of parenting custom designed for each child s personality the product of eight years of groundbreaking research this book will help you understand how your child interacts with the world dunstan begins from the premise that every child has his or her own dominant sensory interface with the world some children are highly sensitive to touch others to sound or to sight and some are unusually sensitive to all outside stimuli especially taste and smell this sensitivity affects how your child behaves learns and communicates from the very first days of life uncovering your child s dominant sense and knowing what your own dominant sense is is essential for finding common ground and creating bonds of trust and intimacy with your child use this book to take comprehensive sense tests to determine your child s dominant sense and your own understand how sensory overload plays out from infancy to age five at home and in school learn why your child s sensory personality shapes the way he or she instinctively reacts to new experiences and people appreciate the richness of your

child's emotional life and help your child thrive in the outside world for every parent who has ever looked at a child's behavior and thought what is he trying to tell me child sense shows you how to find the answer in making sense of war amir weiner reconceptualizes the entire historical experience of the soviet union from a new perspective that of world war ii breaking with the conventional interpretation that views world war ii as a post revolutionary addendum weiner situates this event at the crux of the development of the soviet not just the stalinist system through a richly detailed look at soviet society as a whole and at one ukrainian region in particular the author shows how world war ii came to define the ways in which members of the political elite as well as ordinary citizens viewed the world and acted upon their beliefs and ideologies the book explores the creation of the myth of the war against the historiography of modern schemes for social engineering the holocaust ethnic deportations collaboration and postwar settlements for communist true believers world war ii was the purgatory of the revolution the final cleansing of soviet society of the remaining elusive human weeds who intruded upon socialist harmony and it brought the polity to the brink of communism those ridden with doubts turned to the war as a redemption for past wrongs of the regime while others hoped it would be the death blow to an evil enterprise for all it was the armageddon of the bolshevik revolution the result of weiner's inquiry is a bold compelling new picture of a soviet union both reinforced and enfeebled by the experience of total war the essays on the active powers of man 1788 was thomas reid's last major work it was conceived as part of one large work intended as a final synoptic statement of his philosophy the first and larger part was published three years earlier as essays on the intellectual powers of man edited as vol 3 of the edinburgh edition of thomas reid these two works are united by reid's basic philosophy of common sense which sets out native principles by which the mind operates in both its intellectual and active aspects the active powers shows how these principles are involved in volition action and the ability to judge morally reid gives an original twist to a libertarian and realist tradition that was prominently represented in eighteenth century british thought by such thinkers as samuel clarke and richard price

in this book aoife daly argues that where courts decide children s best interests for example about parental contact the un convention on the rights of the child s right to be heard is insufficient and autonomy should instead be the focus global law and practice indicate that children are regularly denied due process rights in their own best interest proceedings and find their wishes easily overridden it is argued that a children s autonomy principle respecting children s wishes unless significant harm would likely result would ensure greater support for children in proceedings and greater obligations on adults to engage in transparent decision making this book is a call for a reconceptualisation of the status of children in a key area of children s rights
