design scalable big data solutions using hadoop spark and aws cloud native services key features build data pipelines that require distributed processing capabilities on a large volume of data discover the security features of emr such as data protection and granular permission management explore best practices and optimization techniques for building data analytics solutions in amazon emr book description amazon emr formerly amazon elastic mapreduce provides a managed hadoop cluster in amazon services aws that you can use to implement batch or streaming data pipelines by gaining expertise in amazon emr you can design and implement data analytics pipelines with persistent or transient emr clusters in aws this book is a practical guide to amazon emr for building data pipelines you ll start by understanding the amazon emr architecture cluster nodes features and deployment options along with their pricing next the book covers the various big data applications that emr supports you ll then focus on the advanced configuration of emr applications hardware networking security troubleshooting logging and the different sdks and apis it provides later chapters will show you how to implement common amazon emr use cases including batch etl with spark real time streaming with spark streaming and handling upsert in s3 data lake with apache hudi finally you ll orchestrate your emr jobs and strategize on premises hadoop cluster migration to emr in addition to this you ll explore best practices and cost optimization techniques while implementing your data analytics pipeline in emr by the end of this book you ll be able to build and deploy hadoop or spark based apps on amazon emr and also migrate your existing on premises hadoop workloads to aws what you will learn explore amazon emr features architecture hadoop interfaces and emr studio configure deploy and orchestrate hadoop or spark jobs in production implement the security data governance and monitoring capabilities of emr build applications for batch and real time streaming data analytics solutions perform

interactive development with a persistent emr cluster and notebookorchestrate an emr spark job using aws step functions and apache airflowwho this book is for this book is for data engineers data analysts data scientists and solution architects who are interested in building data analytics solutions with the hadoop ecosystem services and amazon emr prior experience in either python programming scala or the java programming language and a basic understanding of hadoop and aws will help you make the most out of this book
