genres are important when it comes to reading for a variety of
reasons first if we can identify the genre of the text we can predict
some of the content and language used within it speech prediction
is a popular reading technique that allows you to become a
proficient reader next by identifying the genre of the text you can
employ a topdown strategy that also helps you read the text if we
can identify a text as a horoscope a set of instructions etc we
expect to find specific functions and specific linguistic instances
both structural and lexical thirdly identifying the genre also helps

you decide whether or not to read a text so if you can determine that the text is a horoscope you can choose not to read it

text entry systems covers different aspects of text entry systems and offers prospective researchers and developers global guidelines for conducting research on text entry in terms of design strategy evaluation methodology and requirements a discussion of the history and current state of the art of entry systems and specific guidelines for designing entry systems for a specific target depending on devices modalities language and different physical conditions of users text entry has never been so important as it is today this is in large part due to the phenomenal relatively recent success of mobile computing text messaging on mobile phones and the proliferation of small devices like the blackberry and palm pilot compared with the recent past when text entry was primarily

through the standard qwerty keyboard people today use a diverse array of devices with the number and variety of such devices ever increasing the variety is not just in the devices but also in the technologies used entry modalities have become more varied and include speech recognition and synthesis handwriting recognition and even eye tracking using image processing on web cams statistical language modeling has advanced greatly in the past ten years and so therein is potential to facilitate and improve text entry increasingly the way people communicate this book covers different aspects of text entry systems and offers prospective researchers and developers global guidelines for conducting research on text entry in terms of design strategy evaluation methodology and requirements history and current state of the art of entry systems including coverage of recent research topics specific guidelines for designing entry systems for a specific target depending on devices modalities language and different physical conditions of users

based on the analysis of a specially compiled corpus of internationally recognized english as a foreign language efl reading tests at different levels of proficiency this volume explores the relation between the complexity of written texts and the difficulty of reading comprehension tests it brings together linguistic investigations into the text inherent complexity of the tests and a study of the data derived from their administration to groups of italian university students the study of text complexity draws on corpus linguistics text linguistics and systemic functional linguistics both quantitative and qualitative analyses are carried out on the language used in the reading texts and in the related tasks that make up the corpus of tests the assessment of test

difficulty on the other hand is informed by research on language testing and in particular by findings and methodologies of classical test theory and item response theory relevant aspects of these theories are used to analyze and interpret both the data obtained from the administration of the tests and the data collected by means of feedback questionnaires completed by test takers the application of such diverse methodologies and the subsequent comparison of the results of the analyses has brought out interesting correlations between text inherent complexity perceived test difficulty and actual test difficulty
