2013-01-01

continuing tom l mcknight s well known thematic focus on landscape appreciation darrel hess offers a broad survey of all of the physical processes and spatial patterns that create earths physical landscape mcknights physical geography a landscape appreciation provides a clear writing style superior art program and abundant pedagogy to appeal to a wide variety of students this new edition offers a truly meaningful integration of visualization technology the latest applied science and new pedagogy providing essential tools and opportunities to teach and engage students in these processes and patterns

The Physical Geography of Landscape

1988

covering all the key topics of geomorphology for a level this text also relates concepts and ideas to students own lives it includes sections on aspects of landscape earth structure and landscape rocks and landscape slopes and the role of hydrology in the landscape

Physical Geography

2013-07-11

physical geography laboratory manual for mcknight s physical geography a landscape appreciation eleventh edition offers a comprehensive set of lab exercises to accompany any physical geography class the manual is organized to meet your needs providing the flexibility to pick and choose a series of short lab exercises each week lab exercises incorporate google earth tm explorations and provide review of concepts such as doppler radar and continental glaciation while more than 40 qr codes now link you to a variety of media resources including google earth videos color topographic maps and images and satellite movie loops also new to this edition is a lab on soils and a field gis lab exercise high quality color stereoscope images and aerial photographs are now included in lab manual to give you an integrated picture of locations and landforms

Landscapes

2013-10-29

landscapes is a timely and well written analysis of the meaning of cultural landscapes the book delves into the layers of meaning that are invested in ordinary landscapes as well as landscapes of spectacle and power landscapes is a powerful and vivid application of the new cultural geography to case studies not previously visited within cultural geography texts

Landform and Terrain

2007

the word terrain refers to the surface characteristics of the ground that surrounds us terrain forms the skeleton of our landscape underlining our homes and gardens and ultimately giving us our food clothing and building materials we see it daily on our way to work we view it from the plane window as we travel abroad we seek its charms when on holiday the trails we walk the beaches we lie on and the mountain views that entrance us the object of this book is to explain the reasons for the forms and variations of terrain so that we may have a fuller understanding and appreciation of its practical values and charms these fascinate the rambler cyclist and climber but also to the driver and casual visitor the title of this book is landform and terrain the physical geography of landscape these terms have related and somewhat overlapping meanings we use the term terrain for the bare surface of the ground not including vegetation cover by landform we mean the combination of terrain and vegetation which is dependent on climate the actions of water and often of human activity landscape refers to the overall character geographical area which may include several different types of terrain and landform our aim has been to bring together geology soil climate and hydrology in such a way as to give the observer an overall view of the landscape he or she sees around them full illustrated colin mitchell was the son of a landscape painter after a year at harvard and oxford he worked as a soil surveyor in sudan iraq and pakistan obtaining a doctorate in terrain studies from cambridge an fao consultant in china saudi arabia ethiopia and tanzania he is author of the book terrain evaluation and landscape walks in sussex and joint author of phytogeomorphology his special interest is encouraging everyone and especially young people to study and understand the landscapes around them

Physical Geography Laboratory Manual

2017

a stimulating introduction this book explores the concept of landscape in theories and writings of the last twenty to thirty years to aid students in fully comprehending this vast and complex topic

Landscape

2007-08-07

this major new text provides an introduction to the interaction of culture and society with the landscape and environment it offers a broad based view of this theme by drawing upon the varied traditions of landscape interpretation from the traditional cultural geography of scholars such as Carl Sauer to the new cultural geography which has emerged in the 1990s the book comprises three major interwoven strands first fundamental factors such as environmental change and population pressure are addressed in order to sketch the contextual variables of landscapes production second the evolution of the humanised landscape is discussed in terms of processes such as clearing wood the impact of agriculture the creation of urban industrial complexes and is also treated in historical periods such as the pre industrial the modern and the post modern from this we can see the cultural and economic signatures of human societies at different times and places finally examples of landscape types are selected in order to illustrate the ways in which landscape both represents and participates in social change the authors use a wide range of source material ranging from place names and pollen diagrams to literature and heritage monuments superbly illustrated throughout it is essential reading for first year undergraduates studying historical geography human geography cultural geography or landscape history

People, Land and Time

2014-05-12

approaches to landscape introduces and explores the main perspectives in this increasingly popular field of study written in an accessible style and illustrated throughout with relevant photographs maps and diagrams it provides a comprehensive review of the literature and key concepts for landscape studies

Approaches to Landscape

1999-01-20

the past decade has witnessed a remarkable resurgence in the intellectual interplay between geography and the humanities in both academic and public circles the metaphors and concepts of geography now permeate literature philosophy and the arts concepts such as space place landscape mapping and territory have become pervasive as conceptual frameworks and core metaphors in recent publications by humanities scholars and well known writers envisioning landscapes making worlds contains over twenty five contributions from leading scholars who have engaged this vital intellectual project from various perspectives both inside and outside of the field of geography the book is divided into four sections representing different modes of examining the depth and complexity of human meaning invested in maps attached to landscapes and embedded in the spaces and places of modern life the topics covered range widely and include interpretations of space place and landscape in literature and the visual arts philosophical reflections on geographical knowledge cultural imagination in scientific exploration and travel accounts and expanded geographical understanding through digital and participatory methodologies the clashing and blending of cultures caused by globalization and the new technologies that profoundly alter human environmental experience suggest new geographical narratives and representations that are explored here by a multidisciplinary group of authors this book is essential reading for students scholars and interested general readers seeking to understand the new synergies and creative interplay emerging from this broad intellectual engagement with meaning and geographic experience

Envisioning Landscapes, Making Worlds

2012-03-15

this unusual encyclopedia brings together in depth information on more than 450 natural geographic features from around the world and offers an array of creative tools to promote critical thinking and classroom discussion with earth undergoing rapid environmental change students and the general public alike should be knowledgeable about the world s geographic features this authoritative two volume reference enables readers do just that it describes continents and oceans individual mountains islands caves and rivers and ecological entities such as wildlife refuges and national parks each entry provides a geographic overview of the feature s significance location description geologic history biota protected areas and environmental issues but the coverage goes even deeper so that entries also discuss the cultural importance of each natural place covering everything from indigenous beliefs to traditional folklore to

contemporary legends the encyclopedia stands apart from other works not only in the depth of its coverage but also in its range it discusses lesser known as well as prominent geographical features and offers critical thinking aids that will help students see how the natural world relates to their daily lives teaching and learning tools include an appendix called opposing viewpoints that allows students to understand landforms involved in current conflicts and disputes as well as an activities discussion questions appendix

Earth's Landscape [2 volumes]

2015-02-03

draws together some important lines of thought that have developed in the field over the past three or four decades and welds them with the traditional framework of physical geography

Landscape

1981-01-02

incorporating text and art this essential study tool contains chapter notes with key terms and page references as well as questions for review

Physical Geography Eighth Edition

2004-07-01

this book presents recent advances in landscape analysis and landscape planning based on selected studies conducted in different parts of europe included are methodological problems and case studies presented and discussed during scientific sessions organized by the commission of landscape analysis and landscape planning of the international geographical union igu within the framework of the igu regional conference in kraków poland august 18 22 2014 the subject of landscape analysis and landscape planning has been of interest to geographers since the beginning of the twentieth century this relatively new area of study which focuses on the landscape resource patches and spatial interconnections was first introduced as landscape ecology landschaftsoekologie by carl Troll one of the twentieth century's most influential physical geographers today landscape studies involve adopting a holistic view of geographic environments and are closely connected to rapidly developing ecosystem sustainable landscape and ecosystem services

approaches modern techniques employing geographical information systems are used to support spatial landscape analyses

Landscape Analysis and Planning

2015-03-20

the issues raised by landscapes and their meanings are fundamental not only to historical geography but to any humanistic study and render the geographical study of landscapes of interest to scholars in many disciplines

Ideology and Landscape in Historical Perspective

2006-03-16

landscape evolution in the united states is an accessible text that balances interdisciplinary theory and application within the physical geography geology geomorphology and climatology of the united states landscape evolution refers to the changing terrain of any given area of the earth s crust over time common causes of evolution or geomorphology land morphing into a different size or shape over time are glacial erosion and deposition volcanism earthquakes tsunamis tornadoes sediment transport into rivers landslides climate change and other surface processes the book is divided into three main parts covering landscape components and how they are affected by climactic tectonic and ocean systems varying structural provinces including the cascadia volcanic arc and california transpressional system and the formation and collapse of mountain systems the vast diversity of terrain and landscapes across the united states makes this an ideal tool for geoscientists worldwide who are researching the country s geological evolution over the past several billion years presents the complexities of physical geography geology geomorphology and climatology of the united states through an interdisciplinary highly accessible approach offers more than 250 full color figures maps and photographs that capture the systematic interaction of land rock rivers glaciers global wind patterns and climate provides a thorough assessment of the logic rationale and tools required to understand how to interpret landscape and the geological history of the earth features exercises that conclude each chapter aiding in the retention of key concepts

Physical Geography: Landscape Appreciation

2002-05-01

this compelling book offers a fresh perspective on how the natural world has been imagined built on and transformed by human beings throughout history and around the globe coverage ranges from the earliest societies to preindustrial china and india from the emergence in europe of the modern world to the contemporary global economy the focus is on what the places we have created say about us our belief systems and the ways we make a living also explored are the social and environmental consequences of human activities and how conflicts over the meaning of progress are reflected in today s urban rural and suburban landscapes written in a highly engaging style this ideal undergraduate level human geography text is illustrated with over 25 maps and 70 photographs note many additional photographs related to the themes addressed in the book are available at the author s website greatmirror.com

Landscape Evolution in the United States

2012-12-21

this book first published in 1981 explores why it is that the modern built environment while successfully providing material comfort and technical efficiency none the less breeds despair and depression rather than inspires hope and commitment the source of this paradox where material benefits appear to have been gained only at the expense of intangible values and qualities is found in humanism the persistent and powerful belief that all problems can be solved through the use of human reason but humanism has become increasingly confused rationalistic callously devoted to efficiency and authoritarian these confusions and contradictions together with the anti nature stance of humanism and its failure to teach humane behaviour lead the author to conclude that humanism is best rejected such rejection does not advocate the inhuman and anti human but requires instead a return to the humility that lies at the origin of humanism a respect for objects creatures environments and people this environmental humility is explored in the context of individuality of settings ways of seeing landscapes appropriation and ways of building places this title will be of interest to students of human geography

Understanding the Cultural Landscape

2005-01-02

an innovative contribution to the literature of cultural geography this book explores the evolution of landscape both material and symbolic from the standpoint of the populations cultures and human decision making processes that shape and give it meaning focusing on evolution behavior symbolism and ecology norton offers a critique of the literature of cultural and social geography and articulates a framework of central issues that connect a wide range of theoretical approaches in the first four chapters norton gives detailed consideration to both traditional and contemporary literature and methodologies and to the links between cultural geography and other social science concepts and analytical methods the remaining chapters are concerned with the causes and consequences of cultural landscape evolution and the variables affecting it including language religion politics society economy and the physical environment in addressing these areas of cultural geography norton promotes an approach that integrates the contributions of geography with those of anthropology sociology psychology and history his analysis provides a useful synthesis of the conceptual and empirical content of cultural geography and suggests promising new directions for research in the field norton s work will prove a valuable classroom and library resource for students and scholars in cultural and social geography and related areas of sociology and anthropology

Human Geography

2000-08

argues that much of what surrounds americans is depressing ugly and unhealthy and traces america s evolution from a land of village commons to a man made landscape that ignores nature and human needs

Rational Landscapes and Humanistic Geography

2015-07-30

conversations with landscape moves beyond the conventional dualisms associated with landscape exploring notions of landscape and its relation with humans through the metaphor of conversation such an approach conceives of landscape as an actor in the ongoing communication that is inherent in any perception recognising the often ignored mutuality of encounters between human and non human actors with contributions drawn from a variety of disciplines including anthropology geography archaeology philosophy literature and the visual arts this book explores the affects and emotions engendered in the conversations between landscape and humans offering scope for an original and coherent approach to the study of landscape this book will appeal to scholars and researchers across a range of social sciences and humanities

The Making of the Dutch Landscape: an Historical Geography of the Netherlands

1971

landscape and history explores a complex relationship over the past five centuries the book is international and interdisciplinary in scope drawing on material from social economic and cultural history as well as from geography archaeology cultural geography planning and landscape history in recent years as the author points out there has been increasing interest in and concern for many aspects of landscape within british european and wider contexts this has included the study of the history development and changes in our perception of landscape as well as research into the links between past landscapes and political ideologies economic and social structures cartography art and literature there is also considerable concern at present with the need to evaluate and classify historic landscapes and to develop policies for their conservation and management in relation to their scenic heritage and recreational value this is manifest not only in the designation of particularly valued areas with enhanced protection from planning developments such as national parks and world heritage sites but in the countryside more generally further ian d whyte argues changes in european union policies relating to agriculture with a greater concern for the protection and sustainable management of rural landscapes are likely to be of major importance in relation to the themes of continuity and change in the landscapes of britain and europe

Origin of Landscape Science

2003

geography is useful indeed necessary to survival everyone must know where to find food water and a place of rest and in the modern world all must make an effort to make the earth our home habitable but much present day geography lacks drama with its maps and statistics descriptions and analysis but no acts of chivalry no sense of quest not long ago however geography was romantic heroic explorers ventured to forbidding environments oceans mountains forests caves deserts polar ice caps to test their power of endurance for reasons they couldn t fully articulate why climb everest because it is there in this book the author considers the human tendency stronger in some cultures than in others to veer away from the middle ground of common sense to embrace the polarized values of light and darkness high and low chaos and form mind and body in so doing venturesome humans can find salvation in geographies that cater not so much

to survival needs or even to good comfortable living as to the passionate and romantic aspirations of their nature

Physical Geography

Physical Geography

2004-11

as a concept landscape does not respect disciplinary boundaries

Explorations in the Understanding of Landscape

1989-03-03

this book brings together a collection of original essays that engage with cultural geography and landscape studies to produce new ways of understanding place space and landscape in greek literature from the fifth and fourth centuries bce the authors draw on an eclectic collection of contemporary approaches

to bring the study of ancient greek literature into dialogue with the burgeoning discussion of spatial theory in the humanities the essays in this volume treat a variety of textual spaces from the intimate to the expansive the bedroom ritual space the law courts theatrical space the poetics of the city and the landscape of war and yet all of the contributions are united by an interest in recuperating some of the many ways in which the ancient greeks in the archaic and classical periods invested places with meaning and in how the representation of place links texts to social practices

Geography Of Nowhere

1994-07-26

landscape modelling integrates the differing perspectives of the many disciplines that deal with the landscape it is motivated not only by the desire for scientific understanding but also by the real time demands of 21st century postindustrial society which include the twin imperatives of stabilizing damaged ecosystems on the one hand and finding effective ways to use the landscape on the other the discipline has the specific goal of designing and assessing future scenarios of landscape development while not losing sight of its past history both ecological and socio cultural this book encompasses the interrelated disciplines of geography landscape ecology and geoinformatics and by drawing on their theories and methodologies introduces the concept of a living landscape with human action an inseparable part of its evolution it offers researchers and decision makers a number of ideas on how our landscape can best be utilized the content reflects the need for sustainable landscape development at the same time as considering long term continuity as a major condition which enables us to maintain the diversity and multifunctionality of landscapes at regional and macro regional scales employing advanced terminology and methods this book provides specific results especially for scientists and landscape professionals

Conversations With Landscape

2016-05-13

harm de blij contends in this book that geography continues to hold us all in an unrelenting grip and that we are all born into natural and cultural environments that shape what we become individually and collectively

Landscape and History since 1500

2004-03-03

this book presents the polycentric and multiscale view of landscape which has been developed in russia within a framework of physical geography since the early twentieth century the authors develop the ideas of hierarchical organization of a landscape and strong relationships between abiotic and biotic components with equal attention to both vertical fluxes and lateral transfer three dimensional representation of landscape involves strong emphasis on abiotic drivers of pattern development including relief geological structures and runoff the objective of this book is to demonstrate the multiplicity of models and multiscale approach to description and explanation of landscape pattern functioning dynamics and evolution the contributions deal with various hierarchical levels ranging from within unit interior variability to between units interaction at landscape level as well as regional and supra regional zonal patterns divided into 8 clear parts the 28 chapters treat spatial pattern in one of the following aspects indicator of actual matter and energy flows control over actual processes including disturbance expansion as well as determinant of future development indicator of genesis and prerequisite for future trends driver for short term dynamics of processes response to climatic and anthropogenic influences factor of settlement network and land use adaptation at various historical epochs framework for actual land use spatial arrangement this contributed volume is written for researchers and students in the field of landscape ecology physical geography environmental impact assessment and ecological planning
