Clearing, Settlement and Custody 2013-01

the financial crisis shows that the banking industry requires a transformation as its business model and practices are no longer sustainable even so such transformation cannot be made without clearing the bull moving beyond old and tired orthodoxies in order to properly diagnose the problem drawing on more than twenty years of experience in banking author jonathan ledwidge shows how the financial crisis exposed the industry s poor system of values leaving it mired in conflict with its human environment specifically this includes how poor leadership virtually unmanageable organizations dysfunctional suppliers infuriated customers alienated employees and dissatisfied communities all arise from the inability of banks to understand that values are more important than valuations as a result there is now a total disconnect between banks and their human environment that disconnect cannot be fully addressed by conventional solutions involving more regulations more governance and more controls banks have a very human problem and thus by definition what they require is a human transformation clearing the

bull provides both a clear diagnosis as well as a detailed and comprehensive roadmap for the banking industry's human transformation and while doing so it remains totally engaging and accessible to bankers and non bankers alike

The Clearing 2021-06-15

america's air quality is better today than ever before in modern history and continues to steadily improve how did this remarkable turnaround come about basing his conclusions on a painstaking compilation of long term empirical data on air quality and emissions data extending from the pre federalization era to the present some dating back a century goklany challenges the orthodoxy that credits federal regulation for improving air quality he shows that the air had been getting cleaner prior to and probably would have continued to improve regardless of federalization states and localities after all have always been engaged in a race to improve the quality of life which means different things at different stages of economic development goklany's empirical data refute once and for all the race to the bottom rationale for centralized federal regulation moreover technological advances and consumer preferences continue to play important roles in improving air quality goklany accordingly offers a regulatory reform agenda that would improve upon the economic efficiency and environmental sensitivity of air quality regulation
