The Deindustrialized World 2017-07-20

since the 1970s the closure of mines mills and factories has marked a rupture in working class lives the deindustrialized world interrogates the process of industrial ruination from the first impact of layoffs in metropolitan cities suburban areas and single industry towns to the shock waves that rippled outward affecting entire regions countries and beyond scholars from five nations share personal stories of ruin and ruination and ask others what it means to be working class in a postindustrial world together they open a window on the lived experiences of people living at ground zero of deindustrialization revealing its layered impacts and examining how workers environmentalists activists and the state have responded to its challenges

Post-Industrial América 1985

society to an information society

The Information Society as Post-industrial Society 1981

in recent years major social forces such as ageing populations social trends migration patterns and the globalization of economies have reshaped social welfare policies and practices across the globe multinational corporations ngos and other international organizations have begun to influence social policy at a national and local level among the many ramifications of these changes is that globalizing influences may hinder the ability of individual nation states to effect policies that are beneficial to them on a local level with contributions from thirteen countries worldwide this collected work represents the first major comparative analysis on the effect of globalization on the

international welfare state the welfare state in post industrial society is divided into two major sections the first draws from a number of leading social welfare researchers from diverse countries who point to the nation state as case studies highlighting how it goes about establishing and revising social welfare provisions the second portion of the volume then moves to a more global perspective in its analysis and questioning of the impact of globalization on citizenship ageing and marketization the welfare state in post industrial society seeks to encourage debate about the implications of the most pressing social welfare issues in nation states and integrate analyses of policy and practice in particular countries struggling to provide social welfare support for their needy populations

The Welfare State in Post-Industrial Society 2009-06-10

for more than two decades sociologists have debated the social and political consequences of an emergent postindustrial society this comparative study addresses these debates using original empirical data from five advanced capitalist economies canada the united states sweden norway and finland

Relations of Ruling 1994

the interesting contribution of this book is not just confined to capturing the role changes that a knowledge based society characterizing post industrialism demands but that it is able to bring about a fusion of micro individual and the macro societal role relationships this book makes interesting and useful reading for the serious management practitioner interested in gaining a grasp of the role alterations that are taking place in his own work domain and comprehend its implications the contribution of this work to

sociological theory is in making predictions about the social changes which can come up with the transformation to a knowledge based society vikalpa the interesting contribution of this book is not just confined to capturing the role changes that a knowledge based society characterizing post industrialism demands but that it is able to bring about a fusion of micro individual and the macro societal role relationships this book due to its rigour is essentially academic oriented but the writing style is such that it can also make interesting and useful reading for the serious management practitioner interested in gaining a grasp of the role alterations that are taking place in his own work domain and comprehend its implications unnikrishnan k nair in vikalpa the shift from an industrial to a post industrial society has been documented extensively as has its impact on the macro level institutions of society government the workplace and the economy but how has post industrial life impacted the individual and relationships between individuals hage and powers examine this intriguing question by linking global changes in work patterns information flow and knowledge to the practice of everyday life they conclude that the complexities of society require a different kind of people those with complex selves and creative minds capable of confronting the challenges of the forthcoming century creativity flexibility and emotional astuteness will be the buzzwords of the future as well as personality traits that will enable people to successfully adapt to the ever changing swirl of workplace familial personal and leisure roles based on the tenets of social theory the authors present a window into the future and a plan for personal and interpersonal action their insights will shed light for social psychologists social theorists futurologists organizational theorists network analysts and communication researchers it is stimulating to encounter a work of such intellectual audacity that is so solidly buttressed by sound scholarship and respect for evidence the core argument which is based heavily on symbolic interactionist theory has the ring of

truth this is a thoroughly remarkable book broad in scope significant in its implications and better than any i know making eminently good sense of the eddying social currents and bewildering social changes that characterize contemporary society i predict that it will have a major and lasting impact on the field morris rosenberg university of maryland this book is one of those rare works that courageously turns established assumptions on their heads and challenges the whole field of sociology to shift directions it offers a version of functionalism calling for continuous change rather than stability with functional prerequisites at the individual level it deplores current sociology s dominant emphasis on power and money offering in their place the unequal distribution of knowledge as the key organizing principle rather than formulating theory primarily at the macro or micro level it focuses on the meso level where micro and macro are linked through a unique revision of role theory hage and powers take symbolic interaction as their starting perspective but modify and extend the work of george herbert mead in imaginative ways at the same time they draw selectively on the work of structuralists merton and nadel to develop a thoughtful linkage between micro and macro sociological processes in a social structure in which flexible networks rather than formal organizations are the key components post industrial lives could well become the touchstone for broad debate on the nature of sociological theory and the paradigm that stimulates a widely ranging body of new empirical research ralph turner university of california los angeles hage and powers bring their in depth sociological analysis of the changes central to post industrial and post modern life home to where we live and work they succeed in the best sense of the sociological imagination to bridge the micro and macro the personal and the structural they not only build a theoretical framework for understanding the changes in society but encourage us to appreciate that as the old role scripts and hierarchical controls give way to networks of interacting people we have more

independence to fashion our own personal connections to others
barbara sherman hey l illinois state university the authors have
given a remarkable coherent theoretical outline of postindustrial
society this book is written in an extraordinarily clear and
understandable scientific prose american journal of sociology most
of the books on post industrial society and more recently on post
modernism are distinguished by their vagueness and imprecision
in contrast this book examines in detail the effects of increasing
societal complexity and change on the structure of roles and vice
versa the book does a masterful job of utilizing criticizing and
extending classic and contemporary theoretical literatures in
developing a well reasoned conceptual perspective by focusing on
roles role sets status sets person sets and role relationships the
authors link changes in the macrostructural forces of modern
societies in terms of increased complexity of networks and
matrices to meso level changes in organizational forms and to
micro level transformations in self emotions and styles of
interaction and all of this fine analytical work is done in a highly
readable fashion which realizes the rare goal of appealing to
students practitioners lay persons and academics the authors
have therefore made the analysis of post industrial society
theoretically sophisticated while at the same time making it
empirically and experientially relevant jonathan h turner university
of california riverside

Post-Industrial Lives 1992-06-16

all industrialization is deeply rooted within the specific
geographies in which it took place and echoes of previous
industrialization continue to reverberate in these places through to
the modern day this book investigates the overlap of memory and
the impacts of industrialization within today s communities and
the senses of place and heritage that grew alongside and in
reaction to the growth of mines mills and factories the economic

and social change that accompanied the unchecked accumulation of wealth and exploitation of labor as the industrial revolution spread throughout the world has numerous lasting impacts on the socioeconomics of today likewise the planet itself is now reeling the memory and heritage of these processes reach into the communities that owe the industrial revolution their existence but these populations also often suffered adverse impacts to their health and environment through the large scale and rapid extraction of natural resources and production of goods through the themes of memory community and place working post industrial landscapes and the de romanticization of industrial pasts this book examines the endurance and decline of these communities the spatial processes of industrial byproducts and the memory and heritage of industrialization and its legacies while based in the traditions of geography this collection also draws upon and will be of great interest to students and scholars of cultural anthropology archaeology sociology history architecture civil engineering and heritage memory museum and tourism studies using global examples the authors provide a uniquely geographic understanding to industrial heritage across the spaces places and memories of industrial development

Geographies of Post-Industrial Place, Memory, and Heritage 2020-11-23

traditional public policy toward the family the authors of this book argue has produced an array of fragmented mechanical programs in response to specific perceived dysfunctions in family performance policy has been biased by a restrictive perception that families unlike the nuclear two parent household are either ailing or aberrant in response to these observations the authors portray the family as a natural ongoing and dynamically adaptive element of western civilization they suggest that legislators and

policy analysts should view the household as a tangible social and economic asset and an appropriate technology with which a number of tasks such as child care education health disability and unemployment insurance social security and the welfare of the aged now performed by more complex and costly formal institutions may be better accomplished

The Family In Postindustrial America 2019-06-21

we are living in the age of imagination and communication this book about the new ways time is experienced and organised in post industrial workplaces argues that the key feature of working time within knowledge and other workplaces is unpredictability creating a culture that seeks to insert acceptance of unpredictability as a new standard

Working Time, Knowledge Work and Post-Industrial Society 2015-03-16

in nearly all oecd countries the labour market has been in flux in recent decades this book examines the labour markets and the institutional frameworks that condition their functioning in four different countries canada the united states denmark and sweden through a comparative study of these cases the book discusses the nation specific patterns that exist in a world that seems to become increasingly subject to common social and economic development

Post-industrial Labour Markets

2005-07-08

examining the occupational variation within non standard employment this book combines case studies and comparative writing to illustrate how and why alternative occupational employment patterns are formed through expert contributions a framework is

Post-industrial Society 1977

reanimating industrial spaces explores the relationships between people and the places of former industry through approaches that incorporate and critique memory work the chapters in this volume consider four broad questions what is the relationship between industrial heritage and memory how is memory involved in the process of place making in regards to industrial spaces what are the strengths and pitfalls of conducting memory work what can be learned from cross disciplinary perspectives and methods the contributors have created a set of diverse case studies including iron smelting in uganda puerto rican sugar mills and concrete factories in albania which examine differing socio economic contexts and approaches to industrial spaces both in the past and in contemporary society a range of memory work is also illustrated from ethnography oral history digital technologies excavation and archival and documentary research

Magnificent Myth 1978

study on the economic importance of information in the postindustrial society discusses historical and current trends in economic conditions and economic structure incl interindustry shift technological change inflation unemployment transnationalisation of telecommunications and the importance of

service sector public sector etc outlines economic policy educational policy and research policy options with partic reference to the uk bibliography and graphs

Non-Standard Employment in Post-Industrial Labour Markets 2015-02-27

in north american and european cities youth live in precarious social and economic conditions the issue of employment has become a political problem in this volume sociological economical and ethnographical perspectives are used to explain ethnic discrimination inequalities at school unemployment and marginalization work remains a central value in young peoples lives who not only are victimized but also try to find escapes originally in french this extended and updated book contains contributions by enrico pugliese saskia sassen min zhou françois dubet paul anisef paul axelrod ida susser and others

Reanimating Industrial Spaces 2016-06-16

taken from a series of conferences this collection of papers by leading labour experts from the united states and the former soviet union examines the profound changes in industrial systems and work organisation currently affecting both societies the authors focus on the emergence of new labour market institutions the evolution of managerial philosophy changes in workers values and attitudes toward economic security economic inequality and the legitimacy of worker participation in management and ownership comparison reveals both striking differences and similarities in the transformation of the two systems in the post industrial age and helps demystify some simplistic notions about the workings of market systems

The Wealth of Information 1983

while it is often acknowledged that we live in a postindustrial age our economic concepts have lagged far behind our postmodern sensibility in this incisive new work the well known sociologist fred block sheds obsolete and shopworn economic analysis by presenting a bold sweeping reconceptualization of the economy postindustrial possibilities provides a fresh understanding of the dynamics of postindustrial change while offering a roadmap for future economic thinking block takes as his point of departure the tired concepts of neo classical economics which while still dominant fall short as tools for comprehending contemporary economic forces in block s mind the failure to revise the concepts of industrial economics means that the reality of today s economy is increasingly understood as through a glass darkly intent on reinvigorating thinking in this area block masterfully critiques the central categories of neo classical economics such as the market labor and capital block argues that the neo classical tradition has obscured the fact that capitalist prosperity has been built not on free markets but rather on systematic constraints on market freedom he further suggests that measurements of capital have become increasingly problematic and that the concept obscures the critical sources of productivity within organizations in his far reaching analysis of the gross national product block shows that there is a growing divergence between the factors that determine people s well being and trends in measured gnp postindustrial possibilities sets forth a new intellectual paradigm that might be called qualitative growth one of its primary foci is a shift toward improved product quality and greater priority for various non commodity satisfactions such as leisure interesting work economic security and a safe and clean environment it also promotes a recognition that greater economic efficiency rests not on infusions of capital but on cooperative labor relations and on institutional reform wide ranging intellectually vibrant and lucid postindustrial

possibilities will engender controversy and debate it is an enormous contribution that social scientists and policymakers will need to come to terms with

Youth and Work in the Post-Industrial City of North America and Europe **2002-10-01**

wiefek presents evidence of a link between individual level economic concerns and political opinion conceptualizing economic anxiety by applying social psychological theory to the distinct characteristics of the new american economy she presents evidence that this postindustrial economic anxiety shapes beliefs and policy opinions above and beyond ideology partisanship and income journalists and political commentators have written extensively on the political consequences of the strains created by the transformation of the u s economy over the last thirty years yet the individual level anxiety accompanying america s transition to a postindustrial globalized economy has not been explored in any systematic way in fact what clear empirical evidence we do have strongly suggests that citizens do not link their personal fortunes to their political opinions wiefek argues that the way in which political scientists normally go about looking for these connections misses what citizens experience in their daily lives particularly their emotional reactions the measures commonly used by political scientists do not tap the specific features of america s post 1973 economic transformation or the anxiety insecurity and fear it engenders wiefek presents a conceptualization of economic anxiety that draws upon psychological sociological economic and political science theories and findings and the distinct nature of the new economy using data from a mail survey she estimates the impact of economic anxiety and presents strong evidence of its predictive power on

political opinion she concludes with a discussion of the political implications of these findings and argues that the progressive political potential of shared anxieties will require reversing the anti government bias endemic to our current public dialogue

Social Polarization in Post-Industrial Metropolises 2015-08-17

even as the global economy of the twenty first century continues its dramatic and unpredictable transformations the landscapes it leaves in its wake bear the indelible marks of their industrial past whether in the form of abandoned physical structures displaced populations or ecological impacts they persist in memory and lived experience across the developed world this collection explores the affective and more than representational dimensions of post industrial landscapes including narratives practices social formations and other phenomena focusing on case studies from across europe it examines both the objective and the subjective aspects of societies that increasingly produce fewer things and employ fewer workers

Labor Parties in Postindustrial Societies 1991

tales of demise and decline have come to characterize news on the state of religion and congregations in america in the postindustrial promise author anthony healy finds that the changes in religious life and among congregations are being misunderstood instead of seeing the changes as the result of the presumed aspects of postmodern life individualism the collapse of social groups and the scrapping of tradition healy sees what has occurred as a postindustrial transformation in which an economy based on manufacturing has been replaced by one based on

corporate and consumer services this transformation has changed what we value and how we live as well as how we work it has also changed congregations and religious life but not necessarily in the way that many people think contrary to the stories of decline healy finds that in this time of postindustrial dislocation people are again putting down religious roots congregations are making it possible for people to reconnect with the stories and traditions of previous generations and have become the places in society where the reembodying of religious and cultural narratives is taking place different from the postmodern script this postindustrial explanation leads us to fresh insights into the change that has occurred among religious bodies their congregants and their communities this book provides pastors lay leaders teachers scholars and seminarians with a solid grounding in the basic aspects of the postindustrial transformation and offers direction to help religious leaders develop responsive and viable places of ministry mission and program in this time of change

Double Shift: Transforming Work in Postsocialist and Postindustrial Societies 2016-09-16

society to an information society

Postindustrial Possibilities 1990-05-01

the work is provocative and ambitious and the writing is clear choice it is a topic in need of systematic analysis joel i nelson understands and in fact has mastered the issues it will undoubtedly be a major contribution his approach is fresh and refreshing he has the appropriate conceptual tools to complete his synthesis i believe not only scholars sociologists economists political scientists and historians would find post industrial

capitalism useful but policymakers might also find it of interest the book can also be used as a text in an advanced undergraduate class and in a graduate seminar nelson's thesis is coherent and logically developed i imagine this book as a college text or on a desk in washington dc nelson's last book economic inequality was a huge success certainly the many who relied on it in their teaching and research will welcome and use post industrial capitalism lionel l lewis state university of new york at buffalo too often authors focus only on the positive aspects or on the downside of postindustrialism joel i nelson is proposing something that fits neatly between the two camps nelson's strategy of building a new explanation based on a synthesis of these older approaches is very attractive there are no other books that attempt this post industrial capitalism might also be used in an advanced undergraduate course on economic sociology or social change it will be also acquired by professionals in sociology social work political science and economics the sequence of the topics are clear and concise each chapter pulls together arguments that heretofore have been scattered across numerous books and articles and across disciplines for that matter charles m tolbert ii professor of sociology and rural sociology louisiana state university the social and economic well being of many americans is increasingly at risk disparities in earnings and wealth are escalating reversing a century of declining inequality excesses of the free market are growing and growing more difficult to contain politics are increasingly conservative across the ideological spectrum with economic competitiveness considered more important than equality and humanitarian aid post industrial capitalism offers an alternative to the dominant and unsuccessful marxist and industrialist views by providing a framework for explaining the widening polarization within american society this work demonstrates a more comprehensive explanation of inequality and locates its source in the transformation of american business it provides a fresh illustration of schumpeter's insistence

on the ability of capitalism to develop by creatively destroying its past it not only describes the shifts in corporate resources illustrates their use by the corporate sector and traces their implications for inequality across the institutional spectrum but also demonstrates how these strategies have been used by companies to intensify competition effect greater political control and widen the economic gap in america scholars interested in the question of modernity and post industrialization theorists of multiple theoretical persuasions and students interested in social stratification inequality and social change will find postindustrial capitalism to be extremely valuable

The Impact of Economic Anxiety in Postindustrial America 2003-12-30

cities in the north atlantic coal and steel belt embodied industrial power in the early twentieth century but by the 1970s their economic and political might had been significantly diminished by newly industrializing regions in the global south this was not simply a north american phenomenon the precipitous decline of mature steel centers like pittsburgh pennsylvania and hamilton ontario was a bellwether for similar cities around the world contemporary narratives of the decline of basic industry on both sides of the atlantic make the postindustrial transformation of old manufacturing centers seem inevitable the product of natural business cycles and neutral market forces in remaking the rust belt tracy neumann tells a different story one in which local political and business elites drawing on a limited set of internationally circulating redevelopment models pursued postindustrial urban visions they hired the same consulting firms shared ideas about urban revitalization on study tours at conferences and in the pages of professional journals and began to plan cities oriented around services rather than manufacturing all

well in advance of the economic malaise of the 1970s while postindustrialism remade cities it came with high costs in following this strategy public officials sacrificed the well being of large portions of their populations remaking the rust belt recounts how local leaders throughout the rust belt created the jobs services leisure activities and cultural institutions that they believed would attract younger educated middle class professionals in the process they abandoned social democratic goals and widened and deepened economic inequality among urban residents

Transcending the Nostalgic 2021-10-15

this insightful volume asks if and to what extent gender divisions in working life are changing the contributors discuss the implications from a labour market perspective and a family work level perspective which are combined to examine if and where patterns of gender integration can be found research from several european countries is presented as well as from the us to provide comparative and international perspectives a wide range of related issues are tackled including questions of methodology and measurement as well as segregation patterns welfare state provisions and the use of parental leave the volume provides suggestions for integration at different levels of society and by applying a multidisciplinary approach and illustrating developments on different analytical levels the authors further the discussion on how integration can be pursued

The Postindustrial Promise 2005-04-01

those who address conflict resulting from differing socio economic groups stratification systems focus on the arousal of negative emotions less frequently explored are the effects of positive emotions particularly among the middle classes in industrial and post industrial societies in more developed societies those

experiencing positive emotional energy far outnumber those who endure negative emotions jonathan h turner sees the distribution of positive and negative emotions in developed societies as another basis for grouping people into socio economic classifications such distribution explains the commitments of middle classes to the system and the lack of class based social movements from lower classes turner argues for marx s theory when a population s vast majority is consistently experiencing negative emotions the potential for revolution within society increases turner explains why class conflict potential is low in developed societies and how it might increase if the middle classes lose their share of resources he notes the beginnings of this shift but says that the overall positive emotions of the middle class have not yet transitioned from positive to negative capitalism will persist but it will be a reformed capitalism especially in the united states as taxes and regulation by government assure higher levels of resource redistribution to members of a society

The Information Society as Post-industrial Society 1981

remaking post industrial cities lessons from north america and europe examines the transformation of post industrial cities after the precipitous collapse of big industry in the 1980s on both sides of the atlantic presenting a holistic approach to restoring post industrial cities developed from the influential 2013 remaking cities congress conference chair donald k carter brings together ten in depth case studies of cities across north america and europe documenting their recovery from 1985 to 2015 each chapter discusses the history of the city its transformation and prospects for the future the cases cross cut these themes with issues crucial to the resilience of post industrial cities including

sustainability doing more with less public engagement and equity social economic and environmental the most important issue cities face today and for the foreseeable future this book provides essential lessons learned from the mistakes and successes of these cities and is an invaluable resource for practitioners and students of planning urban design urban redevelopment economic development and public and social policy

The Coming of Post-industrial Society 1999

the contributors to this edited volume covering a range of social issues ranging from family and aging to sexuality and culture and the arts critically examine the relevance of social policy as it is understood in the west and addresses the question of whether singapore s response is unique

After Industry - The Economic and Social Consequences of Deindustrialization 2021-05-07

in general however the welfare states that we have inherited from the post war years provide only limited coverage against these new risks

Post-Industrial Capitalism 1995-07-05

there has been much written on the new creative economy but most work focuses on the so called creative class with lifestyle preferences that favor trendy new restaurants mountain biking and late night clubbing this creative class flagship cultural destinations and other forms of commodity driven cultural

production now occupy a relatively uncritical place in the revitalization schemes of most cities up and down the urban hierarchy in contrast this book focuses on small to medium size post industrial cities in the us canada and europe that are trying to redress the effects of deindustrialization and economic decline through cultural economic regeneration it examines how culture infused economic opportunities are being incorporated into planning in distinct ways largely under the radar in many working class communities and considers to what extent places rooted in an industrial past are able to envisage a different economic future for themselves it questions whether these visions replicate strategies employed in larger cities or put forth plans that better suit the unique histories and challenges of places that remain outside the global limelight exploring the intersection between a cultural and sustainable economy raises issues that are central to how urban regeneration is approached and neighborhood needs and assets are understood case studies in this book examine spaces and planning processes that hold the possibility of addressing inequality by forging new economic and social relationships and by embarking on more inclusive and collaborative experiments in culture based economic development these examples often focus on building upon the assets of existing residents and broadly define creativity and talent they also acknowledge both the economic and non monetary value of cultural practices this book maintains a critical edge incorporating left critiques of mainstream creative economy theories and practices into empirical case studies that depart from standard cultural economy discourse structural barriers and unequal distributions of power make the search for viable urban development alternatives especially difficult for smaller post industrial cities and risk derailing even creative grassroots initiatives while acknowledging these obstacles this book moves beyond critique and focuses on how the growing economy surrounding culture the arts and ecological design can be

harnessed and transformed to best benefit such cities and improve the quality of life for its residents

Remaking the Rust Belt 2016-05-26

this book aims to present an alternative based on natural processes and an environmental approach to post excavation site management e.g post coal mining heaps these sites are places where various mineral excavation by products are collected nevertheless some post mineral excavation sites are oligotrophic terrestrial wetland and water habitat islands providing unique biodiversity enrichment in the landscape these oligotrophic mineral habitats are essential in over fertilized eutrophic agricultural and urban industry surroundings some post mineral excavation sites are places where the wildlife can develop and support the functional processes of novel ecosystems implementing the newest biogeochemical and comprehensive knowledge into urban industry landscape management will help to establish the ecosystem s processes and environmental functioning there are several post industrial sites in europe where the wildlife areas developed due to natural processes are becoming wildlife hotspots in densely populated urban industry areas in this respect many of the oligotrophic mineral terrestrial wetland and water habitats of anthropogenic origin should not be categorized as environmentally dangerous and undergo economic utility focused reclamation facing the actual environmental constraints of the anthropocene epoch the book s chapters presenting the natural basics and perquisites of the environmental ecosystem mosaics will be interesting for a broad range of environmentalists scientists and students miners economists and sociologists

Gender Segregation 2016-12-05

this text explores one of the most fundamental changes in the history of human society the transition from rural to urban ways of living it covers a range of urban technologies including new building materials and designs

Revolt from the Middle 2017-09-08

as a product of its time the call centre utilises new developments in telecommunications and information technology to offer cost efficient delivery systems for customer care efficiency productivity and flexibility are all embodiments of neoliberal market capitalism and are all personified in the call centre operation as well as the structure of the labour market in general thus the individual and the workplace are embedded in a variety of global processes in order to frame the context in which call centre operations exist today and their employees mainly young men and women negotiate the increasingly risky and individualised task of developing an identity or sense of belonging in the world labour markets and identity on the post industrial assembly line sets out the economic social and political changes over the last three decades that have restructured the labour market altered the balance between labour management and the state and unleashed global market capitalism upon previously sheltered areas of the economy and social life in both Britain and elsewhere this ground breaking book offers one of the first real qualitative sociological investigations of a relatively new form of employment to see what life is like on the post industrial assembly line whilst also taking a close look at the nature of class identity and subjectivity in relation to young people coming of age in a world dramatically altered over the last three decades
