Political Theory and Power 2023-08-07 bertrand de juvenel
1903 1987 was one of the great political thinkers of the
twentieth century but he left few disciples the essays contained
in this volume have been selected because they serve to clarify
elaborate and expand upon the themes of his three masterworks
on power sovereignty and the pure theory of politics de juvenel
s thought stands apart from the main branches of twentieth
century political philosophy and is largely independent of schools
and ideologies by drawing on an older more persuasive
philosophical tradition stretching from plato to rousseau de
juvenel sought to restore political science to its ancient function
the explanation of political things with directness and originality
his work addresses questions that go to the heart of the political
science enterprise exploring its nature its mission and its
attitude to theory facts and values in the realm of political
practice de juvenel shares common ground with his
contemporaries while remaining essentially independent he
shares with the left a deep concern for reducing human misery
and ecological depredation and a belief in the need for

government directed economic planning on the other hand he shares the right s abiding suspicion of state power and its belief in the superiority of the market as the presumptive method for economic decision making de jovenel s refreshing freedom from ideological blinders makes him worthy of comparison to orwell but his ambition stretches beyond the novelistic in that he attempts to develop a theory of the good state resting upon a clear sighted understanding of the true nature of political behavior graced with a brilliant introduction by dennis hale and marc landy this volume serves as an ideal introduction to de jovenel s thought it will be of interest to political scientists historians and sociologists
